corporate excellence The contributors to this volume include scholars from Harvard University MIT Concordia University
McGill University and the University of Toronto **Corporate Communications** William V. Ruch, 1984-12-21 William V
Ruch examines and compares corporate communications systems in the United States and Japan to discover what each can
learn from the other The author demonstrates that business organization in each country is highly reflective of the overall
culture In American corporations communication is intended to transmit information rapidly it is direct efficient and invites
confrontation Japanese corporate communication also transmits information but adds an element of emotional message In
both countries business communication is characterized by direction American companies have strong downward systems
Japanese companies have strong upward systems Most channels of communication used in American firms are also used in
Japan but some Japanese techniques could not and should not be used in the United States Ruch argues that American and
Japanese corporations cannot learn a great deal from one another In fact the only thing that Americans should learn is the
value of a strong system of upward communication The Japanese should learn that they need a faster system of decision
making than the ringi system currently in use **Whitaker's Cumulative Book List**, 1979 **The Managerial**
