Stout,1967-10-11 **Arctic Shorebirds in North America** Jonathan Robert Bart,Victoria Helen Johnston,2012-09-01 Each year shorebirds from North and South America migrate thousands of miles to spend the summer in the Arctic There they feed in shoreline marshes and estuaries along some of the most productive and pristine coasts anywhere With so much available food they are able to reproduce almost explosively and as winter approaches they retreat south along with their offspring to return to the Arctic the following spring This remarkable pattern of movement and activity has been the object of intensive study by an international team of ornithologists who have spent a decade counting surveying and observing these shorebirds In this important synthetic work they address multiple questions about these migratory bird populations How many birds occupy Arctic ecosystems each summer How long do visiting shorebirds linger before heading south How fecund are these birds Where exactly do they migrate and where exactly do they return Are their populations growing or shrinking The results of this study are crucial for better understanding how environmental policies will influence Arctic habitats as well as the far ranging winter habitats used by migratory shorebirds **Arctic Shorebirds in North America** Jonathan Robert Bart,Victoria Helen Johnston,2012-08-02 i Arctic Shorebirds in North America i represents a study that is one of the remarkable achievements of wildlife fieldcraft like those done by Aldo Leopold in the 1930s and by the Craighead Brothers in the 1960s To conduct a study of this scientific caliber in the great expanse and harsh climate of the Arctic makes it one of the great wildlife investigations whose value will only grow with time Larry Niles Conserve Wildlife Foundation of New Jersey It is most timely that Jonathan Bart and Victoria Johnston have gathered information on shorebirds that breed in the Arctic regions of North America Data on these birds is generated at a wide range of locations by many different individuals and teams and this book puts it into perspective It is particularly valuable to have this treatise when so many shorebird species worldwide are in marked decline Clive Minton Australasian Wader Studies Group When the PRISM program for pan Arctic shorebird monitoring was introduced everyone agreed with its laudable aims but it seemed impractical How could shorebird biologists with limited time and resources acquire robust data on the size and trend of shorebird populations across the American Arctic Now the credibility gap has been bridged i Arctic Shorebirds in North America i presents the rigorous practical methods that will be the foundation of Arctic shorebird monitoring for years to come I look forward to Arctic PRISM
