An Illustrated Short History of Progress Ronald Wright, 2006 In these acclaimed CBC Massey Lectures Ronald Wright argues that each time history repeats itself the price goes up The twentieth century was a time of runaway growth in human population consumption and technology placing a colossal load on all natural systems He demonstrates how our modern predicament is as old as civilization a 10 000 year experiment we have participated in but seldom controlled Only by understanding the patterns of human triumph and disaster can we recognize the experiment's inherent dangers and shape its outcome Wright's provocative text evokes striking images across time and space starting with Paul Gauguin's painting *D'où Venons Nous Que Sommes Nous Où Allons Nous* Where do we come from What are we Where are we going three questions that perfectly summarize the focus of his lectures In this new edition illuminating illustrations and sidebars complement Wright's arguments and allow readers to witness further evidence supporting his cautionary tale

A Double-Edged Sword Brenda E.

Novack,2014-05-19 On first consideration one might not be inclined to view Adolf Hitler and Dietrich Bonhoeffer in relation to Jehanne d Arc Joan of Arc but Brenda E Novack does just that She demonstrates how these three prominent figures who influenced world history all acted in accordance with what they claimed or perceived to be divine sanction of their participation in violence Taking the reader on a unique exploration of their lives and deaths Novack identifies significant similarities and differences in notions of divine call and human response conveyed by these personalities and determines how they align or fail to align with the biblical prophetic tradition Taking Jehanne d Arc as her foundational study the author engages important theological issues such as the nature of revelation evil and morality The process culminates in the construction of a model of righteous warfare and human agency presented as a tool for evaluating claims to divinely sanctioned violence and as a potentially effective alternative to an outmoded and currently inadequate just war model Case studies of Hitler and Bonhoeffer tentatively establish the model s ability to steer humanity away from unnecessary destruction toward justice compassion and peace

This book presents and elaborates on how the teaching of global ethics in healthcare contributes to furthering ideals of cosmopolitanism solidarity equality respect for differences and concern with what human beings and specifically patients have in common regardless of where they live and who they are Global problems such as pandemic diseases disasters lack of care and medication homelessness and displacement call for global responses The new area of global bioethics is providing answers by arguing that ethical discourse should first of all criticize the structures of violence and injustice that underlie many threats to global health Education of health professionals should articulate that they are citizens of the world like their patients This book first demonstrates that a moral vision of global education is necessary to gain a global dimension It is argued that a global framework of ethical principles is available the challenge is to elaborate and specify that framework into specific educational approaches and models The book subsequently analyzes goals and challenges of global education in

Computing Our Way to Paradise? Robert Rattle,2010-01-16 Rattle s new book challenges key assumptions concerning the role of Internet and communication technologies ICTs in globalization processes The author argues that while globalization is predicated upon a strong extensive and interconnected global ICT network of products processes and services the real environmental and health benefits remain far from certain ICTs have been promoted as the next economic wave with the potential to generate jobs wealth and prosperity to surpass that of the industrial era It is assumed the environmental impacts will be negligible or even beneficial in this shift towards a service economy Rattle investigates these current and expected trends in ICTs and their potential contribution to sustainable development His book is an indispensable overview for researchers and instructors in globalization Internet communication technologies and environmental anthropology or sociology as well as a resource for policy makers in environmental protection sustainable development sustainable consumption and the social role of science and technology Blast, Corrupt, Dismantle, Erase Brett Josef

Inventing 'Easter Island' Beverley Haun,2008-04-05 Easter Island or Rapa Nui as it is known to its inhabitants is located in the Pacific Ocean 3600 kilometres west of South America Annexed by Chile in 1888 the island has been a source of fascination for the world beyond the island since the first visit by Europeans in 1722 due to its intriguing statues and complex

history *Inventing Easter Island* examines narrative strategies and visual conventions in the discursive construction of Easter Island as distinct from the native conception of Rapa Nui. It looks at the geographic imaginary that pervaded the eighteenth century, a period of overwhelming imperial expansion. Beverley Haun begins with a discussion of forces that shaped the European version of island culture and goes on to consider the representation of that culture in the form of explorer texts and illustrations as well as more recent texts and images in comic books and kitsch from off the island. Throughout *Easter Island* is used as a case study of the impact of imperialism on the view of a culture from outside. The study hinges on three key points: an inquiry into the formation of Easter Island as a subject; an examination of how the constructed space and culture have been shaped, reshaped and represented in discursive spaces; and a discussion of cultural memory and how the constraints of foreign texts and images have shaped thought and action about Easter Island. Richly illustrated and unique in its findings, *Inventing Easter Island* will appeal to cultural theorists, anthropologists, educators and anyone interested in the history of the South Pacific.

Downstream from Eden David L Knight, 2012-05-30 *Downstream from Eden* is a celebration of water in a less than perfect world. It will inspire you and bring you hope. Probably the most comprehensive study of water and the Bible you will find anywhere. Well researched and highly readable with stories from Icelandic waterfalls to the Aral Sea from the origins of the universe to the Apocalypse, the author weaves a conversation that turns water into wine. You will sip and savor page after page. Water is an urgent global concern with 800 million people living today in parched conditions or with unsafe water. The UN Water for Life Decade 2005-2015 highlights the need for sustainable water solutions. *Downstream from Eden* adds a unique voice to this discussion with insights from the Bible, science, history and literature on issues of social justice, the environment and personal spirituality. Fascinating material. David Knight is a profound, reflective and interesting writer. Ramez Atallah, The Bible Society of Egypt. A beautiful study of water. Read it slowly and enjoy. You will be refreshed, spirit and soul. Barry Mackay, Habitat for Humanity India, retired. Includes A Manifesto for Action, Ten Disciplines for Living, *Downstream from Eden* and Questions for Small Group and Book Club discussion.
