## Short Grammar Of Contemporary Bulgaria:

**A Short Grammar of Contemporary Bulgarian** Kjetil Rå Hauge, 1999      **A Short Grammar of Contemporary Bulgarian** Kjetil Rå Hauge, 1999      *Bulgarian Grammar* Ruselina Nicolova, 2017-06-06 This Bulgarian Grammar is a semantically and functionally oriented type of academic grammar New semantic interpretations often based on logical analysis are offered in the area of determination pronouns verbs etc Morphological facts are related to syntax and pragmatics Theoretically and methodologically the description fits into the context of contemporary linguistics and is suitable for typological studies since Bulgarian offers rich and interesting material      **South Slavic Discourse Particles** Mirjana N. Dedai?, Mirjana Miskovi?-Lukovi?, 2010 Discourse particles discourse markers and pragmatic markers refer to phenomena that linguists have begun to probe only since the mid 1980s Long ignored in traditional linguistics and textbook grammars and still relegated to marginal status in South Slavic these linguistic phenomena have emerged as invaluable devices for cutting edge theories of the semantics pragmatics interface This book which is a pioneering study in such linguistic phenomena in South Slavic languages is also among the first of its kind for a related group of languages It builds on the recent findings of some of the most influential linguistically oriented theories such as Relevance Theory Argumentation Theory and coherence based approaches to explain the meaning and use of certain discourse pragmatic particles markers in Bulgarian Macedonian Serbian Bosnian Croatian and Slovene These particles markers are part of the contemporary and historical lexicons of the South Slavic languages varying across regions and time but also differing in origin This book which draws from naturally occurring data written media and constructed examples aims at a wider audience including scholars working in semantics pragmatics and Slavic languages and applied specialists interested in this area of research The authors hope that this book will be conceived as a starting point for a structured inquiry into the flourishing field of discourse particles in South Slavic      Annual Workshop on Formal Approaches to Slavic Linguistics Steven Franks, Frank Y. Gladney, Mila Tasseva-Kurkchieva, 2005      **Annual Workshop on Formal Approaches to Slavic Linguistics** Wayles Browne, 2003      **Clitics** Andrew Spencer, Ana R. Luis, 2012-07-12 In most languages we find little words which resemble a full word but which cannot stand on their own Instead they have to lean on a neighbouring word like the d ve and unstressed em of Kim d ve helped em Kim would have helped them These are clitics and they are found in most of the world s languages In English the clitic forms appear in the same place in the sentence that the full form of the word would appear in but in many languages clitics obey quite separate rules of placement This book is the first introduction to clitics providing a complete summary of their properties their uses the reasons why they are of interest to linguists and the various theoretical approaches that have been proposed for them The book describes a whole host of clitic systems and presents data from over 100 languages      *The Cambridge Handbook of Slavic Linguistics* Danko Šipka, Wayles Browne, 2024-05-31 The linguistic study of the Slavic language family with its rich syntactic and phonological structures complex writing systems and diverse

socio historical context is a rapidly growing research area Bringing together contributions from an international team of authors this Handbook provides a systematic review of cutting edge research in Slavic linguistics It covers phonetics and phonology morphology and syntax lexicology and sociolinguistics and presents multiple theoretical perspectives including synchronic and diachronic Each chapter addresses a particular linguistic feature pertinent to Slavic languages and covers the development of the feature from Proto Slavic to present day Slavic languages the main findings in historical and ongoing research devoted to the feature and a summary of the current state of the art in the field and what the directions of future research will be Comprehensive yet accessible it is essential reading for academic researchers and students in theoretical linguistics linguistic typology sociolinguistics and Slavic East European Studies *Balkanistica* ,2009 Aktionsart and Bulgarian verbal aspect Anelia Stefanova Ignatova,2014-12-19 *Degrees of Explicitness* John Leafgren,2002-07-26 This book explores factors relevant in the choices speakers and writers make in regard to explicitness of reference to the subjects and objects in their utterances Bulgarian is a particularly felicitous target language for this type of study since it possesses a rich inventory of available packaging techniques ranging from zero reference to various stressed and unstressed single forms to actual doubled reduplicated constructions The study systematically addresses the need to avoid referential and grammatical ambiguity and the crucial influence of emphasis Another and perhaps most interesting central factor is the status of what the communication is about which is assessed on two different levels The book makes use of data from both published Bulgarian fiction and naturally occurring oral conversations The fundamental similarities between these modes of communication with respect to noun phrase selection is demonstrated but explanations are also proposed for the observable differences **Vocative!** Barbara Sonnenhauser,Patrizia Noel Aziz Hanna,2013-07-15 Vocatives have rarely been comprehensively discussed in their various facets With 12 contributions covering the diversity of vocative marking structures and functions as well as the relevance of vocatives for theoretical and methodological reasoning this volume contributes to closing a significant gap in linguistic research It provides a detailed picture of the vocative as a structure between system and performance **Profiling Grammar** Paul Fletcher,Martin J. Ball,David Crystal,2016-02-02 This book brings together twelve previously unpublished language profiles based on the original Language Assessment Remediation and Screening Procedure LARSP The languages featured are Afrikaans Bulgarian Cantonese Finnish Greek Hindi Hungarian Japanese Kannada Korean Malay and Swedish Each chapter includes a grammatical sketch of the language details of typical language development in speakers of the language as well as a description of and justification for the profile itself The book will be an invaluable resource for speech language pathologists and others wishing to analyse the grammatical abilities of individuals speaking one of these languages This new collection complements a previous book in this series on the same theme *Assessing Grammar The Languages of LARSP* Ball et al 2012 Advances in formal Slavic linguistics 2021 Petr Biskup,Marcel Börner,Olav Mueller-Reichau,Iuliia Shcherbina,2023-12-13 *Advances in formal Slavic linguistics 2021* offers a

selection of articles that were prepared on the basis of talks given at the conference Formal Description of Slavic Languages 14 or at the satellite workshop on secondary imperfectives in Slavic which were held on June 2 5 2021 at the University of Leipzig The volume covers all branches of Slavic languages and features synchronic as well as diachronic analyses It comprises a wide array of topics such as degree achievements clitic climbing in Czech and Polish typology of Slavic participles aspectual markers in Russian and Czech doubling in South Slavic relative clauses congruence and case agreement in close apposition in Russian cataphora in Slovenian Russian and Polish participles prefixation and telicity in Serbo Croatian Bulgarian adjectives negative questions in Russian and German and imperfectivity in discourse The numerous topics addressed demonstrate the importance of Slavic data and the analyses presented in this collection make a significant contribution to Slavic linguistics as well as to linguistics in general

**Universals in Comparative Morphology** Jonathan David Bobaljik, 2012-09-28 An argument for and account of linguistic universals in the morphology of comparison combining empirical breadth and theoretical rigor This groundbreaking study of the morphology of comparison yields a surprising result that even in suppletion the wholesale replacement of one stem by a phonologically unrelated stem as in good better best there emerge strikingly robust patterns virtually exceptionless generalizations across languages Jonathan David Bobaljik describes the systematicity in suppletion and argues that at least five generalizations are solid contenders for the status of linguistic universals The major topics discussed include suppletion comparative and superlative formation deadjectival verbs and lexical decomposition Bobaljik's primary focus is on morphological theory but his argument also aims to integrate evidence from a variety of subfields into a coherent whole In the course of his analysis Bobaljik argues that the assumptions needed bear on choices among theoretical frameworks and that the framework of Distributed Morphology has the right architecture to support the account In addition to the theoretical implications of the generalizations Bobaljik suggests that the striking patterns of regularity in what otherwise appears to be the most irregular of linguistic domains provide compelling evidence for Universal Grammar The book strikes a unique balance between empirical breadth and theoretical detail The phenomenon that is the main focus of the argument suppletion in adjectival gradation is rare enough that Bobaljik is able to present an essentially comprehensive description of the facts at the same time it is common enough to offer sufficient variation to explore the question of universals over a significant dataset of more than three hundred languages

*A Short History of Modern Bulgaria* R. J. Crampton, 1987-03-12 This survey of Bulgaria traces its history from the liberation from the Ottoman Empire to 1985

**Linguistic Supertypes** Per Durst-Andersen, 2011-02-28 The book offers a completely new view of language and of languages such as Russian Chinese Bulgarian Georgian Danish and English by dividing them into three supertypes on the basis of a step by step examination of their relationship to perception and cognition their representation of situations and their use in oral and written discourse The dynamic processing of visual stimuli involves three stages input experience intake understanding and outcome a combination The very choice among three

modalities of existence gives a language a certain voice either the voice of reality based on situations the speaker's voice involving experiences or the hearer's voice grounded on information This makes grammar a prime index all symbols are static and impotent and need a vehicle i.e. grammar which can bring them to the proper point of reference Language is shown to be a living organism with a determinant category aspect mood or tense which conquers territory from other potential competitors trying to create harmony between verbal and nominal categories It is demonstrated that the communication processes are different in the three supertypes although in all three cases the speaker must choose between a public and a private voice before the grammar is put into use

**Advances in formal Slavic linguistics 2018** Andreas Blümel, Jovana Gajić, Ljudmila Geist, Uwe Junghanns, Hagen Pitsch, 2021-09-09 Advances in Formal Slavic Linguistics 2018 offers a selection of articles that were prepared on the basis of talks presented at the conference Formal Description of Slavic Languages FDSL 13 or at the parallel Workshop on the Semantics of Noun Phrases which were held on December 5-7 2018 at the University of Göttingen The volume covers a wide array of topics such as situation relativization with adverbial clauses causation concession counterfactuality condition and purpose clause embedding by means of a correlate agreeing vs transitive need constructions clitic doubling affixation and aspect evidentiality and mirativity pragmatics coming with the particle *li* uniqueness definiteness maximal interpretation exhaustivity kinds and subkinds bare nominals multiple determination quantification demonstratives possessives complex measure nouns and the NP-DP parameter The set of object languages comprises Russian Czech Polish Bulgarian Macedonian Serbo-Croatian and Torlak Serbian The numerous topics addressed demonstrate the importance of Slavic linguistics The original analyses prove that substantial progress has been made in major fields of research

**Definiteness in Bulgarian** Olga M. Mladenova, 2008-09-25 In its evolution from a synthetic to an analytic language Bulgarian acquired a grammaticalized category of definiteness The book presents the first attempt to explore in detail how this happened by comparing the earliest Modern Bulgarian texts with contemporary dialect and standard Bulgarian data The basic units of analysis are the various types of nominal structures headed by nouns or pronouns The analysis requires the strict terminological disentanglement of form from content and the adoption of a default inheritance model of definiteness that allow the exhaustive classification and tagging of nominal structures encountered in the texts Tagging makes it possible to apply quantitative analysis to nominal structure and to assess the types available in the early texts from a current native speaker perspective Based on an S-curve model of language change the study establishes that overt markers of definiteness were first made available to identifiability based definites then to inclusiveness based definites quantitative generics and unique referents The overt markers of indefiniteness followed suit separating indefinites from non-specifics and typifying generics This progression of definiteness was directed by variables such as person animacy gender number and noun class and started in contexts in which definiteness closely interacted with possessivity Such an analysis leads to the realization that the two-dimensional S-curve model does not account for all language change and that

there is a need for a three dimensional model It also demonstrates that contrary to previous assumptions there is continuity between the early Slavic marker of definiteness long form adjectives and the Modern Bulgarian article This discovery in conjunction with geolinguistic arguments sheds new light on the role that relations inside the Balkan Sprachbund played in the grammaticalization of Bulgarian definiteness
