the European Convention on Human Rights Martyn Bond, 2018-10-01 Respect for human rights lies at the heart of what it means to be European. Martyn Bond. The right to life, prohibition of torture, freedom of thought, conscience and religion, freedom of expression, the right to marriage. Did you know that these rights and many others are protected by the European Convention on Human Rights? The author of this book illustrates each of these rights in a simple and clear way using specific examples. He also sets the action of the European Court of Human Rights in the wider context of Council of Europe activities pursuing the same ideals. Martyn Bond is a journalist who has reported from London, Brussels, Strasbourg and Berlin. He is also a former European civil servant. Over the past half century he has witnessed and reported on many of the events that have shocked or amused, delighted or disturbed European readers, listeners and viewers. He firmly believes that respect for human rights lies at the heart of what it means to be European. Introduction to the International Human Rights Regime

Manfred Nowak, 2021-10-01 Human rights are the only universally recognized system of contemporary values which during the last 50 years has been gradually developed and defined by all States in a comprehensive international legal framework. The international human rights regime is closely related to international peace and security, development and a global trend towards pluralist democracy, good governance and the rule of law. International humanitarian and criminal law can today be considered as specific aspects of international human rights law which after the end of the Cold War has become increasingly complex and difficult to oversee. The present textbook attempts to provide a first and at the same time comprehensive introduction into the idea and significance of human rights, its philosophical and theoretical foundations, historical development, the main structures and procedures of international human rights protection by the United Nations and regional organizations: Council of Europe, Organization of American States, African Union, OSCE and others, and modern trends such as preventive mechanisms, international criminal law, human rights as essential elements of peace keeping and peace building operations, humanitarian intervention or the relationship between human rights and terrorism. The book perceives human rights as an interdisciplinary topic and illustrates the theory of human rights with a considerable number of practical case studies, graphics, statistics, procedural charts and textboxes. It serves as a textbook for students of law, political science, international relations and other academic fields related to human rights but may as well be used as a first introduction for those working in the field: for NGO activists, legal practitioners and others interested in the fascinating world
