The Perception and Management of Drug Safety Risks Bruno Horisberger, Rolf Dinkel, 2012-12-06 In the past two decades public debate about the risks benefits and safety associated with drugs has intensified Public disputes over risks are brought to court when individuals seek compensation for health problems attributed to a pharmaceutical product The issue reaches legislatures and regulatory agencies when consumer advocates seek to influence the standards of drug usage Front page news tends to focus on accidents or other risk events with drugs Drug risk and drug safety have become an important political issue Drug regulatory agencies have been instituted and their responsibility has increased The approval to market a drug is dependent on a set of sophisticated studies executed according to strict protocols and scientifically defined criteria Drug surveillance activities have gained recognition and reporting systems to identify drug safety problems have been strengthened The understanding and management of drug safety is nonetheless beset by doubts disagreements and disputes Conflict occurs over the significance of risk the adequacy of evidence the methodologies used to evaluate and measure risk the standards that guide regulation and the optimal means of communicating risk information to the public

Safety Evaluation of Biotechnologically-derived Pharmaceuticals Susan A. Griffiths, C. Lumley, 2012-12-06 Considerable investment has been made by both pharmaceutical and biotechnology companies in pharmaceutical products of biotechnology However because relatively few of these products have been marketed lack of relevant experience means that uncertainty still surrounds the most appropriate strategy for their safety evaluation The 13th CMR International Workshop held in February 1997 provided the opportunity for regulatory authority and industry experts from Europe Japan and the USA to share their experiences of designing safety evaluation programmes for specific product classes colony stimulating factors growth factors hormones interferons interleukins monoclonal antibodies for therapeutic use and gene therapy products Participants worked together to recommend those studies that should be considered for such safety evaluation and those that may be unnecessary These recommendations subsequently made a valuable contribution to the ICH guideline Safety Studies for Biotechnological Products which was finalised at ICH 4 in Brussels in July 1997 The Workshop proceedings

not only describe the recommendations but also provide the reader with an appreciation of the science behind safety evaluation strategies used by experts the influence of different regulatory systems on these strategies and the type of data required by both toxicologists and clinicians before they have sufficient confidence to administer pharmaceutical products of biotechnology to humans Environmental Health Perspectives ,1993 Drug Industry Antitrust Act United States.
