Electrification Administration United States. Rural Electrification Administration,1937 **International Handbook of Rural Demography** László J. Kulcsár,Katherine J. Curtis,2011-12-15 This is the third in an essential series of Springer handbooks that explore key aspects of the nexus between demography and social science With an inclusive international perspective and founded on the principles of social demography this handbook shows how the rural population which recently dropped below 50 per cent of the world total remains a vital segment of society living in proximity to much needed developmental and amenity resources The rich diversity of rural areas shapes the capacity of resident communities to

address far reaching social environmental and economic challenges Some will survive become sustainable and even thrive while others will suffer rapid depopulation This handbook demonstrates how these future development trajectories will vary according to local characteristics including but not limited to population composition The growing complexity of rural society is in part a product of significant international variations in population trends making this comparative and comprehensive study of rural demography all the more relevant Collating the latest research on international rural demography the handbook will be an invaluable aid to policy makers as they try to understand how demographic dynamics depend on the economic social and environmental characteristics of rural areas It will also aid researchers assessing the unique factors at play in the rural context and endeavoring to produce meaningful results that will advance policy and scholarship Finally the handbook is an ideal text for graduate students in a spread of disciplines from sociology to international development
