Apache is the most popular web server on the Internet because it is free reliable and extensible The availability of the source code and the modular design of Apache makes it possible to extend web server functionality through the Apache API For the most part however the Apache API has only been available to C programmers and requires rebuilding the Apache server from source mod_perl the popular Apache module used primarily for enhanced CGI performance changed all that by making the Apache API available to Perl programmers With mod_perl it becomes simple to develop Apache modules with Perl and install them without having to rebuild the web server Writing Apache Modules with Perl and C shows how to extend web server capabilities regardless of whether the programming language is Perl or C The book explains the design of Apache mod_perl and the Apache API It then demonstrates how to use them to perform for tasks like the following Rewriting CGI scripts as Apache modules to vastly improve performance Server side filtering of HTML documents to embed special markup or code

thinking about this work Including tutor voices is an important tradition of the tutor education textbook because these are voices that speak to the issues concerning tutors in a range of institutions and programs across the country **Producing for Web 2.0** Jason Whittaker, 2005-07-12 Web Production for Writers and Journalists is a clear and practical guide to planning setting up and managing a website Supported by a regularly updated and comprehensive website at www.producingroutledge.com the book includes illustrated examples of good page design and site content online support tutorials and information at www.producingroutledge.com advice on content maintenance and how to use sites effectively an extensive list of resources and Internet terminology Now written specifically for journalists and writers the second edition includes a comprehensive section on how ethics and regulation affect web producers tutorials for the main applications used by web producers today information on incorporating Flash and video into a website guides to good practice for students of journalism broadcasting and media studies
