A Look at Tomorrow's Tactical Air Forces Lane Pierrot,1997 A Look at Tomorrow's Tactical Air Forces Lane Pierrot,1997 **A Look at Tomorrow's Tactical Air Forces** Lane Pierrot,Jo Ann Vines,1997 **Hearings on National Defense Authorization Act for Fiscal Year 1998--H.R. 1119 and Oversight of Previously Authorized Programs Before the Committee on National Security, House of Representatives, One Hundred Fifth Congress, First Session** United States. Congress. House. Committee on National Security. Subcommittee on Military Research and Development,1997 **Technological Change and the Future of Warfare** Michael E. O'Hanlon,2011-04-01 In light of the spectacular performance of American high technology weapons in the 1991 Persian Gulf War as well as the phenomenal pace of innovation in the modern computer industry many defense analysts have posited that we are on the threshold of a revolution in military affairs RMA The issue has more than semantic importance Many RMA proponents have begun to argue for major changes in Pentagon budgetary priorities and even in American foreign policy more generally to free up resources to pursue a transformed U S military and to make sure that other countries do not take advantage of the purported RMA before we do This book takes a more measured perspective Beginning with a survey of various types of defense technologies it argues that while important developments are indeed under way most impressively in electronics and computer systems the overall thrust of contemporary military innovation is probably not of a revolutionary magnitude Some reorientation of U S defense dollars is appropriate largely to improve homeland defense and to take advantage of the promise of modern electronics systems and precision guided munitions But radical shifts in U S security policy and Pentagon budget priorities appear unwarranted especially if those shifts would come at the expense of American military engagement in overseas defense missions from Korea to Iraq to Bosnia **Circular** United States. Office of Education,1964 **List of Publications** United States. Congressional Budget Office,2002 **US Aviation and Aerospace Industry Handbook Volume 2 Military Equipment and Developments** IBP, Inc,2013-08 2011 Updated Reprint Updated Annually US Aviation and Aerospace Industry Handbook Volume 1 BASIC TRENDS AND REGULATIONS Arms Trade and Economic Development Jurgen Brauer,Paul Dunne,2004-08-02 With the US invasion of Iraq the issue of arms trading is once again at the forefront of world events Arms importing countries often ask their suppliers to offset the cost by reinvesting some of the money in their country

Constructing Regional Security W. Durch,2016-04-30 In this book William Durch examines conventional weapons proliferation since World War II the role of arms transfers in fueling regional conflict and prospects for curbing the global arms trade Noting that supply side arms control efforts which seek to constrain the companies and countries that produce and distribute major conventional weapons have a poor international track record Durch argues for a broader approach that tries to get at the demand side of the equation Addressing the political and regional dynamics that impel arms acquisitions he looks at how arms control might be combined with confidence and security building measures to contain demand and how

value based arms trade control measures like codes of conduct could be implemented in stepwise fashion consistent with US national interests in regional stability

Defense Policy Choices for the Bush Administration, 2001-2005 Michael E. O'Hanlon, 2010-12-01 This latest study in the Brookings series on U S defense strategy and the defense budget reviews current American military capabilities and offers suggestions for the new administration and Congress Michael O Hanlon makes sense of the hot political topic of military readiness questions the continued relevance of the current two war framework for structuring most conventional combat forces and challenges the wisdom of current plans for the procurement of advanced jet fighters helicopters and submarines The book also focuses on missile defense other means of homeland defense the so called revolution in military affairs and possible conflicts between Taiwan and China that could involve U S forces Throughout the author looks for ways to close the gap between the cost of projected U S defense forces and the budget actually available to the Pentagon

The Political Economy of NATO Todd Sandler, Keith Hartley, 1999-04-13 Using simple economic methods while accounting for political and institutional factors this book puts forward a political economy viewpoint of NATO s current status and its future prospects A host of NATO policy concerns are addressed including the optimal membership for the alliance its role in peacekeeping missions worldwide the appropriate methods for deterring terrorism and proper procurement practices for the next generation of weapons Additional topics concern defense burden sharing arms trade NATO s institutional structure and NATO s role vis a vis other international organizations Although the analysis is rigorous the book is intended for a wide audience drawn from political science and economics

O'Hanlon, 2011-08-01 This updated edition incorporates lessons from the war in Afghanistan other developments since September 11 and a critical assessment of the Bush administration's defense strategy and budget plan both of which were formulated and publicly unveiled after the release of the book's first edition O'Hanlon has insightfully separated what the nation needs to maintain an adequate defense from what the military and its suppliers want crafting a realistic and affordable proposal for defense spending for the coming decade Robert D Reischauer President Urban Institute The best unclassified study to date of the military implications of a China Taiwan conflict for the United States His sobering analysis makes a compelling case for a cautious arms sales policy toward Taiwan as well as prudent U S military planning Mike Mochizuki George Washington University *Budget Options for National Defense*, 2000 Budget options, 1977 **Legislative Branch Appropriations for 1999: Justification of the budget estimates**, 1998 *Legislative Establishment Appropriation Bill* United States. Congress. House. Committee on Appropriations, 1999 **National Insecurity** Melvin A. Goodman, 2013-02-15 Mel Goodman has spent the last few decades telling us what's gone wrong with American intelligence and the American military and now in *National Insecurity* he tells us what we must do to change the way the system works and how to fix it Goodman is not only telling us how to save wasted billions he is also telling us how to save ourselves Seymour M Hersch *The New Yorker* Upon leaving the White House in 1961 President Eisenhower famously warned Americans about the dangers of a military industrial complex and was clearly worried about the destabilizing effects of a national economy based on outsized investments in military spending As more and more Americans fall into poverty and the global economy spirals downward the United States is spending more on the military than ever before What are the consequences and what can be done Melvin A Goodman a twenty four year veteran of the CIA brings peerless authority to his argument that US military spending is indeed making Americans poorer and less secure while undermining our political standing in the world Drawing from his firsthand experience with war planners and intelligence strategists Goodman offers an insider's critique of the US military economy from President's Eisenhower's farewell warning to Barack Obama's expansion of the military's power He outlines a much needed vision for how to alter our military policy practices and spending in order to better position the United States globally and enhance prosperity and security at home Melvin A Goodman is the Director of the National Security Project at the Center for International Policy A former professor of international security at the National War College and an intelligence adviser to strategic disarmament talks in the 1970s he is the author of several books including the critically acclaimed *The Failure of Intelligence* Monthly Catalog of United States Government Publications, 1997
