Plotinus on Love: An Introduction to His Metaphysics through the Concept of Eros Alberto Bertozzi, 2020-12-29
Winner of the 2021 Outstanding Academic Titles award in Choice a publishing unit of the Association of College Research Libraries ACRL Plotinus metaphysics is often portrayed as comprising two movements the derivation of all reality from a single source the One and the return of the individual soul to it Alberto Bertozzi argues that love is the origin culmination and regulative force of this double movement The One is both the self loving source of the derivation and articulation of all reality in levels of unity and love and the ultimate goal of the longing of the soul whose return to its source is a gradual transformation of the love it originally received from the One Touching on virtually all major concepts of Plotinus philosophy Plotinus on Love is at once an investigation of a lesser studied Plotinian theme and an introduction to his metaphysics
