## Abstract

This psychoanalytic study of affective labour focuses on its two central elements: human contact and love. It is based on a multi-sited organizational ethnography of the fine dining sector in Istanbul, Turkey, where new restaurant areas known as ‘show kitchens’ place chefs in face-to-face contact with patrons. To understand the psychosocial processes of affective production, we analyse chefs’ and patrons’ experiences of encounters in and around ‘show kitchens’. We demonstrate that affect is produced through unconscious contact mediated by socio-cultural representations, which are hegemonized by the ethos of love for one’s job. We contribute to the extant literature on affective labour by studying the desirous interplay between producers and consumers of affect. Specifically, we theorize the role of the psyche in affective production, and offer a new, psychoanalytic conceptualization of affective labour. We conclude by discussing our conceptualization’s organizational and political implications.

## Introduction

‘The first robot chef is coming soon!’ announced CNN Türk (2018), referring to a newly developed robot with artificial intelligence and bionic arms that prepared and cooked food by mimicking human gestures. Although the claim was that the robot could follow recipes to the letter, Turkish Twitter was unimpressed. ‘It would not have *the taste of hand* [idiosyncratic delicious flavour]’.

**Druid of Harley Street** E. Graham Howe, 2012-03-13 In early 20th century Britain interest in psychoanalysis was high leading to the formation of the famous Tavistock Clinic in 1920 E Graham Howe was one of the clinic's founders and the first to publish articles on psychotherapy At the same time he was attacked by the scientific psychiatry and psychoanalysis communities because he took concepts derived from spiritual practice and existential phenomenology and applied them to an understanding of psychotherapy Howe's writings included more than a dozen books and countless articles on a broad range of subjects from schizophrenia to Asian spiritual practices Through these works he exerted a profound influence on intellectuals such as R D Laing Alan Watts and Henry Miller to name a few Howe also wrote in a simple and clear style making his work accessible to the general public The Druid of Harley Street samples the best of his essays offering timely insights for followers of Jung Roberto Assagioli and Mark Epstein students of somatic therapies and spiritual and meditation practitioners The book also offers a fascinating glimpse of a great mind the notable people in his life and the heady times in which he lived **Winnicott and Labor's Eclipse of Life** Nathan Gerard, 2023-09-11 Nathan Gerard draws upon the

pathbreaking insights of pediatrician and psychoanalyst D W Winnicott to offer a new set of ideas in the novel domain of contemporary work life and its discontents Locating Winnicott within a broad landscape of critical scholarship that dissects work's perils the book positions Winnicott as both a radical critic and creative advocate for building a different kind of work life one that might make room for the presence of self By shuffling the discourse on neoliberal subjectivity to reclaim what Winnicott calls unit status of the separate self Gerard differentiates Winnicott from the relational tradition by advocating for Winnicott's non relational aspects Through such analysis the book reveals how work and home have become two sides of the same impoverished coin each contributing to a legitimately bad environment that perpetuates self absence and annihilates one's unique sense of feeling real and alive Winnicott and Labor's Eclipse of Life will be of interest to readers of Winnicott and psychoanalysis organization and management studies and anyone hoping to deepen their engagement with the dynamics

Godley, 2018-02-15 In contrast to the way inheritance is understood in scientific discourse and culture more broadly inheritance in psychoanalysis is a paradox Although it's impossible strictly speaking for the unconscious to be inherited this volume demonstrates how the concept of inheritance can occasion a rich reassessment and reinvention of psychoanalytic theory and practice The collection enacts a critical traversal of inheritance for psychoanalysis from the most basic assumptions of natural or biological inheritance such as innateness heredity evolution and ontogenesis to analysis of the ways cultural traditions can be challenged and transformed and finally to the reinvention of psychoanalytic practice in which the ethics of inheritance is fully realized as the individual's responsibility to transform the social bond Featuring strong interdisciplinary analysis rooted in both psychoanalysis and philosophy this volume further engages science politics and cultural studies and addresses contemporary political challenges such as autism and transgenderism      **Families, Labour and Love** Maureen Baker, 2020-07-29 We think of our family life as very personal but in fact it is shaped by influences well beyond our control Families Labour and Love identifies the ways in which family and personal life in three settler societies Australia New Zealand and Canada has been shaped by colonisation immigration globalisation demographic changes law and policy Baker shows that these three countries each a former colony developed similar family trends and similar family policies Strongly gendered patterns of paid and unpaid work played a major role in family life The family practices of indigenous people were largely overlooked as were those of recent immigrant groups However local conditions also produced significant differences in family experiences among the three countries Richly illustrated with examples comparative data and textual sources Families Labour and Love provides a broad ranging analysis of the family which will appeal to students researchers and policy makers Maureen Baker

**Review** ,1918 **Plurality and Perspective in Psychoanalysis** Adam Rosen-Carole,2013-02-28 Psychoanalysis is a historical discourse of suffering and healing under conditions of modernity rather than a metaphysical discourse of universal truth and must be so due to the ontological indeterminacy of psychic life Demonstrating this proceeds through the substantiation of two primary theses First pluralism in psychoanalysis thus the perspectival character of psychoanalytic knowing is irreducible Second psychic life is partially pliable to interpretive constitution rather than a self subsistent object domain fully available to third personal objective description Together these theses provide the framework for a radical rethinking of the authority of psychoanalytic knowledge and practice and of the nature of psychoanalytic claims to objectivity Psychoanalytic interpretations are best understood as existentially interrogative they test who and how one might be and if successful to some extent identity formative The validity conditions of psychoanalytic knowledge thus concern the creation discovery of satisfactory forms of practice orienting self narration rather than those regularly operative in the natural sciences However an adequate assessment of psychoanalytic claims requires that the claims of science are given due consideration and the impediments to practice orienting self narration under conditions of late modernity are acknowledged

*The Annual of Psychoanalysis, V. 20* Jerome A. Winer,2013-05-13 Volume 20 of *The Annual of Psychoanalysis* ably traverses the analytic canvas with sections on Theoretical Studies Clinical Studies Applied Psychoanalysis and Psychoanalysis and Philosophy The first section begins with Arnold Modell s probing consideration of the paradoxical nature of the self provocatively discussed with John Gedo Modell focuses on the fact that the self is simultaneously public and private dependent and autonomous Alice Rosen Soref next explores innate motivation and self protective regulatory processes from

the standpoint of recent infancy research her notion of a lifelong two track model of self and relatedness helps establish a normative baseline that can anchor psychoanalytic theory George Mahl makes an interesting contribution to Freud studies in the form of a new chronology of Freud's works and the number of pages they contain in the Standard Edition The section ends with Robert Galatzer Levy and Mayer Gruber's quasi experiment about disgust They test and disconfirm the hypothesis that disgust is an affective response to an abstract sense of disorder rather than a transformation of a concrete bodily experience by systematically exploring references to concepts of disgust in the Old Testament Section II on Clinical Studies opens with Henry Smith's fascinating elaboration of Freud's notion of screen memories into a theory of screening that denotes the general process by which mental content is organized He illustrates his thesis by invoking the screen language employed by a patient throughout her analysis Ernest Wolf next explores the tension between being a scientist and a healer in Freud and his followers to illuminate struggles within the psychoanalytic movement and to help account for current attitudes toward abstinence neutrality and gratification Kenneth Newman focuses on this same triptych of technical precepts He argues in the spirit of Winnicott and Kohut that analysts can only alter the hostile internal environments of their patients by becoming usable objects and cultivating an optimally responsive analytic environment A particularly rich collection of applied analytic studies forms Section III of the volume Individual chapters focus on the childhood of Vincent van Gogh W W Meissner the psychological healing process depicted in George Eliot's *Silas Marner* Richard Almond the self psychological meaning of blood brotherhood in D H Lawrence's *Women in Love* James Cowan ecstatic mysticism in the 19th century Indian saint Sri Ramakrishna Sudhir Kakar the disintegration of the Tyrone family in Eugene O'Neill's *Long Day's Journey into Night* Frank and Annette Lachmann and the nature and analytic significance of Freud's aesthetic response to Michelangelo's *Moses* Gary Goldsmith Finally in Section IV George Brook examines the commonsense psychological knowledge of everyday life that is the nonpsychoanalytic knowledge on which much of clinical psychoanalysis ultimately depends Taken together the four sections of Volume 20 of *The Annual* offer an exciting overview of contemporary psychoanalysis Section I highlights recent trends in psychoanalytic theorizing and the testing of psychoanalytic propositions Section II explores the relevance of new theoretical perspectives to clinical work Section III demonstrates the applicability of these new perspectives to psychobiographical and literary analysis and Section IV provocatively explores the points of connection between everyday ideas and attitudes and the tenets of psychoanalytic practice
