## Low Flying Aircraft:

*Low Flying Aircraft* T. M. McNally, 2008 *Low Flying Aircraft* is a collection of interrelated stories in which one life is equally capable of influencing another under a sky the size of history. Spanning a period of fourteen years, the stories are connected by the pasts of Orion McClenahan and Helen Jowalski, childhood friends whose fathers shared a law practice in Chicago. In 1976, a freak accident changes their lives irrevocably, and the stories are about the people Orion and Helen grow up to be, the people they love, and the people they lose along the way. In *Paris the Easy Way*, Sam is a stable manager who steps in to the lives of others while trying to avoid his own. Troubled by the disappearance of his brother in Cambodia and his own complicated relationship with his brother's wife, Sam finally accepts the mysteries that surround him. *Lightning gravity* love I've never properly understood, any of it. Anna, a columnist writing on the complexities that face young modern women, loses all sense of her identity while visiting her father, a dying man who wants a grandson almost as much as he wants a daughter like Milly, the heroine of his favorite western novel. The voices in this collection describe a world of uncertain borders where individuals are sustained by thin, brief moments of direction. Orion, a disillusioned photojournalist, sets himself free from his wealthy family and their Midwestern habits by discarding the things of his life: a clock radio, a blender, paperbacks. He will board a plane and fly to Central America in order to document the situation, do some good. In *Breathing is Key*, Sarah momentarily decides to stay with her abusive boyfriend because she doesn't know where else to go. I think we have a lot here, she says, and not all of it's bad. In story after story, personal histories unfold, always, what lies in wait is the possibility for connection. A brother who dies young, a first love, an abandoned husband, each persists in the realm of memory, adding texture and meaning to the lives they influence. In *The Future of Ruth*, a woman comes to understand that the proof of one's life lay in her death, and the trees that might spread out and over a soul. In revolutionary Nicaragua, on a ranch in Arizona, from a Vermont ski slope, the souls in *Low Flying Aircraft* soar, all hoping to catch a glimpse of the shape of things to come, of possibility. *Low-flying Aircraft and Other Stories* J. G. Ballard, 1978

James Graham Ballard, 1985 [The Panavia Tornado at Low-Level](#) Scott Rathbone, 2024-11-30 The small group of enthusiasts and photographers who had braved the winter weather and gathered on the slopes of the Lake District's iconic valleys on Wednesday 9 January 2019 were witnesses to the end of an era. The RAF Tornado GR 4 that raced past them in some cases at a lower altitude than the onlookers made the last ever low level flight by this aircraft in the United Kingdom. Low Flying System. Never again would the Mighty Fin, an aircraft that had been a familiar sight among the valleys of the UK for around forty years, provide such a spectacle. First flown in August 1974, the Tornado arguably became one of the RAF's most important aircraft of the Cold War. Indeed, the Tornado was the mainstay of RAF strike aircraft from its early days as a nuclear-capable low level interdiction strike fighter, the GR 1, in RAF service through to its retirement as a more versatile medium to high level strike fighter, the GR 4. Along with the shorter-lived Air defense Variant, the F 2 F 3, the Tornado was

without doubt one of the best loved aircraft types amongst photographers and crews with the sheer number of the initial GR 1s allowing them to populate eleven front line squadrons as well as the training units of the Tri National Tornado Training Establishment and the Tornado Weapons Unit Altogether over twenty units flew variants of the type in the RAF alone The Tri National Tornado Training Establishment also catered for the other partner nations of Germany and Italy with all crews finding their way into the United Kingdom Low Flying System on a regular basis It was in fact the impending introduction of the Tornado and the resulting increase in low level activity that forced a restructuring of the UKLFS in 1979 In this book Scott Rathbone provides a pictorial record of the Tornado in its element that of low level With images dating back to the 1980s almost all variants are accounted for as are the majority of RAF squadrons and units from other nations air arms color is in abundance with various camouflage patterns and special schemes as seen and photographed in the UKLFS and elsewhere including the United States of America over four decades This then is a unique tribute to a remarkable aircraft
