New Worlds, New Geographies John Rennie Short, 2000-03-01 John Rennie Short maintains that the new world order is neither new nor orderly His book *New Worlds New Geographies* connects global change urban transformation and scholarly integrity The disintegration of the comforting illusion that the present is just a continuation of the past demands a closer evaluation of how to live one's life in the fragmented chaotic world of postmodernity and the current distrust of rationality and progress In a personal yet analytical style Short elucidates the struggles of governments and individuals to situate themselves within changing nation states and the restructurings of urban spaces into a kind of global village Short insists that it is the responsibility of academics to help make order out of the chaos of postmodernity and make sense of the relationships between people and the environment the social and the spatial the structural and the personal From the restructuring of a new world order to the reappraisal of the role of academics this accessible collection of essays calls for a progressive human geography to help cope with the political changes of a postmodern age *New Worlds New Geographies* represents a reluctant postmodernist and resident alien's attempt to make sense of a changing world

John Butman, Simon Targett, 2025-04-08 Three generations of English merchant adventurers not the Pilgrims as we have so long believed were the earliest founders of America Profit not piety was their primary motive Some seventy years before the Mayflower sailed a small group of English merchants formed The Mysterie Company and Fellowship of Merchant Adventurers for the Discovery of Regions Dominions Islands and Places Unknown the world's first joint stock company Back then in the mid sixteenth century England was a small and relatively insignificant kingdom on the periphery of Europe and it had begun to face a daunting array of social commercial and political problems Struggling with a single export woolen cloth the merchants were forced to seek new markets and trading partners especially as political discord followed the straitened circumstances in which so many English people found themselves At first they headed east and dreamed of Cathay China with its silks and exotic luxuries Eventually they turned west and so began a new chapter in world history The work of reaching the New World required the very latest in navigational science as well as an extraordinary appetite for risk As this absorbing account shows innovation and risk taking were at the heart of the settlement of America as was the profit motive Trade and business drove English interest in America and determined what happened once their ships reached the New World The result of extensive archival work and a bold interpretation of the historical record New World Inc draws a portrait of life in London on the Atlantic and across the New World that offers a fresh analysis of the founding of American history In the tradition of the best works of history that make us reconsider the past and better understand the present Butman and Targett examine the enterprising spirit that inspired European settlement of America and established a national culture of entrepreneurship and innovation that continues to this day *War in the World* Jeremy Black, 2017-09-16 War was a central theme in the world history of the late fifteenth and sixteenth centuries with military capability and activity central to its states societies economies and cultures *War in the World 1450-1600* provides an account of warfare in the period placing it in global context It offers a corrective to a narrative that has emphasised European developments and obscured the history of non European military systems and cultures of war Highlighting conflict between non Western powers which constituted most of the conflict around the world as well as giving due attention to warfare between Western and non Western powers Black emphasises the breadth and variety of military trajectories and connections This comparative context also provides a framework for considering the idea of a European based Military Revolution A wide ranging account of world military history in a period of substantial development the book will be essential reading for those interested in global history and conflict *War in the World 1450-1600* is designed as a companion volume to Jeremy Black's *Beyond the Military Revolution Warfare in*
