The Folktale Stith Thompson, 1977 As interest in folklore increases the folktale acquires greater significance for students and teachers of literature The material is massive and scattered thus few students or teachers have accessibility to other than small segments or singular tales or material they find buried in archives Stith Thompson has divided his book into four sections which permit both the novice and the teacher to examine oral tradition and its manifestation in folklore The introductory section discusses the nature and forms of the folktale A comprehensive second part traces the folktale geographically from Ireland to India giving culturally diverse examples of the forms presented in the first part The examples are followed by the analysis of several themes in such tales from North American Indian cultures The concluding section treats theories of the folktale the collection and classification of folk narrative and then analyzes the living folklore process This work will appeal to students of the sociology of literature professors of comparative literature and general readers interested in folklore

Semiotics and Verbal Texts Jane Gravells, 2016-12-27 This book offers an innovative approach to analysing written texts grounded in principles of semiotics Envisaging whole news media representations as signs and using the real world example of the BP Deepwater Horizon crisis the author demonstrates how business crises are constructed through language Gravells identifies patterns of language which show a progression from one kind of current news representation to a different kind of coverage This coverage positions the crisis as having symbolic and conventional meaning within varied social contexts including the arts business and the environment Using a wealth of examples from the BP story to illustrate her practical research approach Gravells draws language maps of different phases of the crisis representation showing how an early iconic phase of representation moves through an indexical to a symbolic phase and projects a return to a naturalised icon This book will be of interest to researchers and students of semiotics those exploring research methods and linguists with an interest in business and media communications

Giving People Ideas - Text and Concept Godela Weiss-Sussex,2017-12-02 A special double issue of Publications of the English Goethe Society to celebrate the 70th birthday of Professor Martin Swales UCL UK This volume collects papers from a conference held at the Institute of Germanic and Romance Studies in October 2010 The conference aimed to analyse how literary texts articulate and give voice to ideas and ideologies In contrast to most philosophy literature rarely makes claims to systematic conceptual rigour Literary statements are always conjectural they are also conditioned by the conventions of the genre in which they are made Because literature is such a hypothetical medium of expression it is uniquely suited to philosophical experimentation Indeed because literature invokes imagined or remembered experience it functions as a laboratory in which ideas may be tested against experience Literature s formal qualities which allow for statement and counter statement move and counter move make it a highly sophisticated mode of discourse in which to test out ideas Concepts can be played against each other and genre conventions may be adhered to or subverted in order to create multiple layers of signification The papers presented are published here in this special issue of Publications of the English Goethe Society and take account of German or European poetry drama or prose literature from 1750 to the present day
