N E Thing Co The Ubiquitous Concept:

N.E. Thing Co Derek Knight,Iain Baxter &,N.E. Thing Company,Ingrid Baxter,Oakville Galleries,1995-01-01

McLuhan in Space Richard Cavell,2002-01-01 Demonstrates how McLuhan extended insights derived from advances in physics and artistic experimentation into a theory of acoustic space which he then used to challenge the assumptions of visual space that had been produced through print culture Engendering an avant-garde Leah Modigliani,2018-04-06

Engendering an avant garde is the first book to comprehensively examine the origins of Vancouver photo conceptualism in its regional context between 1968 and 1990 Employing discourse analysis of texts written by and about artists feminist critique and settler colonial theory the book discusses the historical transition from artists creation of defeatured landscapes between 1968 71 to their cinematographic photographs of the late 1970s and the backlash against such work by other artists in the late 1980s It is the first study to provide a structural account for why the group remains all male It accomplishes this by demonstrating that the importation of a European discourse of avant garde activity which assumed masculine social privilege and public activity effectively excluded women artists from membership **Documentary Protocols (1967-1975)** Vincent

Bonin,Michèle Thériault,2010 Documentary protocols 1967 1975 is the third part of a major project that also included two exhibitions Documentary protocols I and Documentary protocols II presented at the Gallery in 2007 and 2008 This was conceived and developed by Vincent Bonin The publication Documentary protocols 1967 1975 constitutes an exercise in the critical examination of the nature of curatorial work and research at the Gallery It is an attempt to grasp and describe the paradigm of self determination in Canadian art that emerged in the mid 1960s and the rupture that occurred in the mid 1970s between certain aesthetic positions and political objectives P 6 **Handbook of Research on the Impact of**

Fandom in Society and Consumerism Wang, Cheng Lu,2019-10-25 Fans of specific sports teams television series and video games to name a few often create subcultures in which to discuss and celebrate their loyalty and enthusiasm for a particular object or person Due to their strong emotional attachments members of these fandoms are often quick to voluntarily invest their time money and energy into a related product or brand thereby creating a group of faithful and passionate consumers that play a significant role in multiple domains of contemporary culture The Handbook of Research on the Impact of Fandom in Society and Consumerism is an essential reference source that examines the cultural and economic effects of the fandom phenomenon through a multidisciplinary lens and shapes an understanding of the impact of fandom on brand building Featuring coverage on a wide range of topics such as religiosity cosplay and event marketing this publication is ideally designed for marketers managers advertisers brand managers consumer behavior analysts product developers psychologists entertainment managers event coordinators political scientists anthropologists academicians researchers and students seeking current studies on the global impact of this particularly devoted community *Ubiquitous and Pervasive Computing: Concepts, Methodologies, Tools, and Applications* Symonds, Judith,2009-09-30 This publication covers the latest

innovative research findings involved with the incorporation of technologies into everyday aspects of life Provided by publisher PhotoGraphic Encounters William F. Garrett-Petts, Donald Lawrence, Kamloops Art Gallery, 2000-10 Literacy is broadly understood to refer to the ability to read and write But the term is heavily value laden and is often used to elevate print at the expense of other forms of communication In PhotoGraphic Encounters the authors challenge this reductive notion of literacy and propose instead an integrated span of literacies reaching across disciplinary boundaries to discover a text that draws upon both the visual and the verbal PhotoGraphic Encounters discusses Canadian writers like Margaret Atwood George Bowering Robert Kroetsch and Daphne Marlatt and Canadian artists like Fred Douglas Ernie Kroeger Brenda Pelkey and Michael Snow then looks at the cross fertilization of visual and verbal processes in their works The authors present a new narrative practice one that fully engages lived experience The vernacular they argue is vital to our participation as readers and viewers of high art Making the connection between the vernacular and high culture creates an enabling moment in artistic production and reception and in teaching learning and talking about art and literature PhotoGraphic Encounters offers a compelling perspective on questions of literacy in a postmodern culture Artists writers scholars and critics alike will want this volume in their libraries Includes more than 120 B W photographs 20 colour plates index bibliography

The Future of the Internet: Ubiquity, mobility, security Harrison Rainie, Janna Quitney Anderson, 2008

Automotive Prosthetic Charissa N. Terranova, 2014-01-15 In the twenty first century we are continually confronted with the existential side of technology the relationships between identity and the mechanizations that have become extensions of the self Focusing on one of humanity's most ubiquitous machines *Automotive Prosthetic Technological Mediation and the Car in Conceptual Art* combines critical theory and new media theory to form the first philosophical analysis of the car within works of conceptual art These works are broadly defined to encompass a wide range of creative expressions particularly in car based conceptual art by both older established artists and younger emerging artists including Ed Ruscha Martha Rosler Richard Prince Sylvie Fleury Yael Bartana Jeremy Deller and Jonathan Schipper At its core the book offers an alternative formation of conceptual art understood according to technology the body moving through space and what art historian curator and artist Jack Burnham calls relations This thought provoking study illuminates the ways in which the automobile becomes a naturalized extension of the human body incarnating new forms of car art and spurring a technological reframing of conceptual art Steeped in a sophisticated take on the image and semiotics of the car the chapters probe the politics of materialism as well as high low debates about taste culture and art The result is a highly innovative approach to contemporary intersections of art and technology

Pervasive Computing Design for Sustainability Håkan Gulliksson, This book contains the knowledge an interaction designer should know about pervasive design for sustainability Relevant design research is discussed and framed in a story and value based participatory approach Sustainability is the most important design goal This is the first message A second message is that information technologies and in particular pervasive computing are invaluable keys in the quest for sustainability Thirdly there is a lack of knowledge on sustainability

issues in the interaction design community In this book a unique meta level framework structures an extensive discussion of design for sustainability The framework is based on a principle of justice that is complemented by circumstances for sustainability chosen from the perspective of interaction design We suggest and present the following circumstances limited shared resources socio technical components and structures technology development vision and reflection cognitive and behavioural support joint ventures and political action Topics discussed within the circumstances include experience design ethics Latours s modes of existence design fiction computer games futures studies theories for reflection and behavioural change personal informatics and practice theory The convolute concludes with a number of case studies where interaction design research is summarized and studied from the perspective of sustainability We start out with thoughts on sustainable consumption sustainable character and the sustainable family that gets a section each Adding to them are annotated case studies from research on design fiction game and performance value based design practice theory multi level perspective design and design for a sustainable society The book is a polyphonic convolute which means that there will be some overlap in the reports from the different discourses Development in the areas related to interaction design can be sensed by identifying the surfacing themes In total the e book consists of the equivalence of 530 pages excluding references and index H kan Gulliksson is a lecturer on Interaction technology and Sustainable design at Ume University for more than ten years

The Nature of Ideas Philosophical Union of the University of California,1926 **Insights into Chinese Agriculture**

Yunhua Zhang,2018-06-29 This book uses simple economic theories to explain how China s agricultural economic phenomena exists in reality It also helps the reader to get a clear understanding of economic phenomena insight into the hog cycle and food safety as well as other economic and social phenomena The language of this book is not only easy to understand but also uses ancient poetry and humor to make the subject interesting as it speaks to the history and current situation of Chinese agriculture It also opens a window for the people to read about agriculture This is a unique book on agricultural science that fills an important gap in works on agricultural science and agricultural economics C Magazine ,1996 *The Shaping of Ambient Intelligence and the Internet of Things* Simon Elias Bibri,2015-11-05 Recent advances in ICT have given rise to new socially disruptive technologies AmI and the IoT marking a major technological change which may lead to a drastic transformation of the technological ecosystem in all its complexity as well as to a major alteration in technology use and thus daily living Yet no work has systematically explored AmI and the IoT as advances in science and technology S their ethical social cultural political and environmental effects and a philosophical analysis and evaluation of the implications of such effects An interdisciplinary approach is indeed necessary to understand the complex issue of scientific and technological innovations that S T are not the only driving forces of the modern high tech society as well as to respond holistically knowledgeably reflectively and critically to the most pressing issues and significant challenges of the modern world This book is the first systematic study on how AmI and the IoT applications of scientific discovery link up with other developments

in the spheres of the European society including culture politics policy ethics and ecological philosophy It situates AmI and the IoT developments and innovations as modernist science based technology enterprises in a volatile and tense relationship with an inherently contingent heterogeneous fractured conflictual plural and reflexive postmodern social world The issue s topicality results in a book of interest to a wide readership in science industry politics and policymaking as well as of recommendation to anyone interested in learning the sociology philosophy and history of AmI and the IoT technologies or to those who would like to better understand some of the ethical environmental social cultural and political dilemmas to what has been labeled the technologies of the 21st century Arthibliographies Modern ,1997
