These materials can be applied to a wide range of surfaces including those made of metal, wood, paper, and plastic. They can be used to paint canvas, works of art, to coat beautiful things with a layer of protection, or for practical uses like polishing furniture. The most popular kind of paints are oil-based paints, which are created using pigments that when dried leave an oily layer on the surface. Due to their lower levels of toxicity, as compared to paintings made with an oil base, acrylics have grown in popularity in recent years. As homeowners attempt to make their homes appear newer with fresh coats of paint, industry analysts predict that sales will increase even further.
