The Oxford Handbook of Names and Naming

Carole Hough, 2016-05-03 In this handbook scholars from around the world offer an up to date account of the state of the art in different areas of onomastics in a format that is both useful to specialists in related fields and accessible to the general reader Since Ancient Greece names have been regarded as central to the study of language and this has continued to be a major theme of both philosophical and linguistic enquiry throughout the history of Western thought The investigation of name origins is more recent as is the study of names in literature Relatively new is the study of names in society which draws on techniques from sociolinguistics and has gradually been gathering momentum over the last few decades The structure of this volume reflects the emergence of the main branches of name studies in roughly chronological order The first Part focuses on name theory and outlines key issues about the role of names in language focusing on grammar meaning and discourse Parts II and III deal with the study of place names and personal names respectively while Part IV outlines contrasting approaches to the study of names in literature with case studies from different languages and time periods Part V explores the field of socio onomastics with chapters relating to the names of people places and commercial products Part VI then examines the interdisciplinary nature of name studies before the concluding Part presents a selection of animate and inanimate referents ranging from aircraft to animals and explains the naming strategies adopted for them

The Power of a Woman's Voice in Medieval and Early Modern Literatures Albrecht Classen, 2012-02-13 The study takes the received view among scholars that women in the Middle Ages were faced with sustained misogyny and that their voices were seldom heard in public and subjects it to a critical analysis The ten chapters deal with various aspects of the question and the voices of a variety of authors both female and male are heard The study opens with an enquiry into violence against women including in texts by male writers Hartmann von Aue Gottfried von Stra burg Wolfram von Eschenbach which indeed describe instances of violence but adopt an extremely critical stance towards them It then proceeds to show how women were able to develop an independent identity in various genres and could present themselves as authorities in the public eye Mystic texts by Hildegard of Bingen Marie de France and Margery Kempe the medieval conduct poem known as *Die Winsbeckin* the *Devout Books of Sisters* composed in convents in South West Germany but also quasi historical documents such as the memoirs of Helene Kottaner or Anna Weckerin s cookery book demonstrate that far more women were in the public gaze than had hitherto been assumed and that they possessed the self confidence to establish their positions with their intellectual and their literary achievements

CULTURE OF NAMES IN AFRICA Emma Umana Clasberry, 2012-01-12 INTRODUCTION

Personal name is a vital aspect of cultural identity As a child you may have loved or hated your name But you were rarely indifferent to it What s in a name Shakespeare asked That which we call a rose by any other name would smell as sweet he

explained Perhaps in England or somewhere else in Europe but not in Africa Personal names in African have meanings can affect personality hinder or enhance life initiatives They serve to establish a connection between name and cultural background and thus provide some information about cultural affinity and more such as express one's spirituality philosophy of life political or socio economic status as defined by a given ethnic cleavage African names tell stories convert abstract ideas to stories and tell story of the story about different aspects of one's life They commemorate any unusual circumstance the family or community once experienced or world event that took place around the time of a child's birth Outside a given cultural environment names boost and nurture cultural pride and identity showcase a people's appreciation of their culture and their readiness to defend and live their culture with pride and dignity Naming practices that tell histories behind the names were the norms in Nigeria Ibibio and in fact in Africa until the encroachment of two historical forces in Africans affairs Christianization and colonization more than any other forces in history shattered the connection between personal name and cultural affinity and have ever since contributed to the gradual erosion of African culture of names On the continent the combined efforts of their human agents the missionaries and British colonial personnel directly and indirectly through their policies and practices caused African Nigerians to give up their culture relevant names in favor of foreign ones Apart from direct erosion of culture of names colonial administration a term I use mostly to refer to the combined efforts of the missionaries and British colonial personnel in Nigeria abrogated many religious socio economic and political traditions which were intimately intertwined with the people's naming practices Their attempt to replace African traditions with European ones through coercing Africans to accept Western values and beliefs consequently disabled many desirable African traditional structures including authentic African naming practices and caused some to fall into disuse A third force was early European African trade Although the impact of the presence of European merchants in Nigeria was minimal in this regard some of their activities have also left a dent on African naming practices by introducing foreign bodies into the people's names database Even though these alien forces invaded and injected foreign values into Africa over a century ago their impact on naming practices continues to be felt by Africans European intrusion in relation to African naming practices did not end on the continent The Trans Atlantic Trade on human cargo was another major historical event that did not only forcefully disconnect many Africans from their cultural root and natural habitat but also mutilated authentic African naming practices among them Consequently Africans in Diaspora had European names imposed upon them by their slave masters Today many Africans on the continent and in Diaspora continue to carry names which are foreign names whose meanings they do not know names the bearers can not even pronounce correctly in some ethnic contexts and names which have no relevance to nor any form of link with the bearers cultural background In effect culture of names as many other African customary practices has lost its savor Some peoples of African descent still cherish these colonized names Some do not and are making practical efforts to reclaim authentic African cul
