Napoleon and the Awakening of Europe , 1954 *Russia* Geoffrey A. Hosking, 1997 Discusses the sixteenth century roots of the lack of a unified Russian identity the division between the gentry and the peasantry and the widening gap in the eighteenth and nineteenth centuries which led to revolution and continues to affect Russia today *Napoleon's Last Victory and the Emergence of Modern War* Robert M. Epstein, 1994 Presenting a significant new interpretation of Napoleonic warfare Robert M Epstein argues persuasively that the true origins of modern war can be found in the Franco Austrian War of 1809 Epstein contends that the 1809 war with its massive and evenly matched armies multiple theaters of operation new command and control schemes increased firepower frequent stalemates and large scale slaughter had more in common with the American Civil War and subsequent conflicts that with the decisive Napoleonic campaigns that preceded it Jacket flap

The Origins of Major War Dale C. Copeland, 2013-02-15 One of the most important questions of human existence is what drives nations to war especially massive system threatening war Much military history focuses on the who when and where of war In this riveting book Dale C Copeland brings attention to bear on

why governments make decisions that lead to sustain and intensify conflicts Copeland presents detailed historical narratives of several twentieth century cases including World War I World War II and the Cold War He highlights instigating factors that transcend individual personalities styles of government geography and historical context to reveal remarkable consistency across several major wars usually considered dissimilar The result is a series of challenges to established interpretive positions and provocative new readings of the causes of conflict Classical realists and neorealists claim that dominant powers initiate war Hegemonic stability realists believe that wars are most often started by rising states Copeland offers an approach stronger in explanatory power and predictive capacity than these three brands of realism he examines not only the power resources but the shifting power differentials of states He specifies more precisely the conditions under which state decline leads to conflict drawing empirical support from the critical cases of the twentieth century as well as major wars spanning from ancient Greece to the Napoleonic Wars
