Napoleon's Glands & Other Ventures in Biohistory Karlen Arno, 1984

Biography of a Germ Arno Karlen, 2001-05-15

Arno Karlen author of *Man and Microbes* focuses on a single bacterium in *Biography of a Germ* giving us an intimate view of a life that has been shaped by and is in turn transforming our own *Borrelia burgdorferi* is the germ that causes Lyme disease In existence for some hundred million years it was discovered only recently Exploring its evolution its daily existence and its journey from ticks to mice to deer to humans Karlen lucidly examines the life and world of this recently prominent germ He also describes how it attacks the human body and how by changing the environment people are now much more likely to come into contact with it Charming and thorough and smart this book is a wonderfully written biography of your not so typical biographical subject

The Impact of Illness on World Leaders Bert E. Park, M.D., 2016-11-11

In *The Impact of Illness on World Leaders* Bert E Park explores the relationship between leadership and neurologic illness Basing his study on a rigorous examination of primary and secondary source material from medicine history and political science Park diagnoses illnesses which affected the thinking and actions of Anthony Eden and Adolf Hitler among others He discusses the historical situations in which these political leaders functioned and the effects their illnesses might have had on the decisions they made Park argues that the impact of aging and disease on leadership abilities is an important potentially devastating problem which has been ignored by the people in a position to deal with it Physicians who attend men in power supported by government officials and politicians often disguise their patients infirmities and keep them in office long after they are able to function effectively In those few instances when the problem has been addressed it has often been done by journalists or other persons not qualified to make a medical judgment about a leader s health and they have relayed erroneous information e g the myth of Hitler s syphilis Part of the goal of *The Impact of Illness on World Leaders* is to correct such popular misconceptions Park concludes his study of leadership and illness with suggestions for monitoring the health of leaders and deposing them if their health compromises their ability to lead

An Underground Education Richard Zacks, 1999-04-20

The best kind of knowledge is uncommon knowledge Okay so maybe you know all the stuff you re supposed to know that there are teenier things than atoms that Remembrance of Things Past has something to do with a perfumed cookie that the Monroe Doctrine means we get to take over small South American countries when we feel like it But really is this kind of knowledge going to make you the hit of the cocktail party or the loser spending forty five minutes examining the host s bookshelves Wouldn t you rather learn things like how the invention of the bicycle affected the evolution of underwear Or that the 1949 Nobel Prize for Medicine was awarded to a doctor who performed lobotomies with a household ice pick Or how Catherine the Great really

died Or that heroin was sold over the counter not too long ago For the truly well rounded intellectual nothing fascinates so much as the subversive the contrarian the suppressed and the bizarre Richard Zacks auto didact extraordinaire has unloosed his admittedly strange mind and astonishing research abilities upon the entire spectrum of human knowledge ferreting out endlessly fascinating facts stories photos and images guaranteed to make you laugh gasp in wonder and occasionally shudder at the depths of human depravity The result of his labors is this fantastically illustrated quasi encyclopedia that provides alternative takes on art business crime science medicine sex lots of that and many other facets of human experience Immensely entertaining and arguably enlightening An Underground Education is the only book that explains the birth of motion pictures using photos of naked baseball players Richard Zacks is the author of History Laid Bare Love Sex and Perversity from the Ancient Etruscans to Warren G Harding which was excerpted in classy magazines like Harper s and earned the attention of the even classier New York Times which noted that Zacks specializes in the raunchy and perverse The Georgia State Legislature voted on whether to ban the book from public libraries He has studied Arabic Greek Latin French Italian and Hebrew and received the Phillips Classical Greek Award at the University of Michigan He has also told his publisher that he made a living in Cairo cheating royalty from a certain Arab country at games of chance although the claim remains unverified His writing has appeared in the New York Times The Atlantic Monthly Time Life Sports Illustrated The Village Voice TV Guide and similarly diverse publications Zacks is married and busy warping the minds of his two children Georgia and Ziegfield He resides in New York City and can be reached via e mail at rzacks echonyc com

The Book of Human Skin Michelle Lovric, 2010-04-05 The book of human skin is a large volume with many pages of villainy writ upon it There are people who are a disease you know 13 May 1784 Venice Minguillo Fasan heir to the decaying gothic Palazzo Espagnol is born Yet Minguillo is no ordinary child he is strange devious and all those who come near him are fearful Twelve years later Minguillo is faced with an unexpected threat to his inheritance a newborn sister Marcella His untempered jealousy will condemn his sister to a series of fates as a cripple a madwoman and a nun But in his insatiable quest to destroy her he may have underestimated his sister s ferocious determination and her unlikely allies who will go to extraordinary lengths to save her

Man and Microbes Arno Karlen, 1996-05-22 A noted medical historian places recent outbreaks of deadly diseases in historical perspective with accounts of other alarming and recurring diseases throughout history and of the ways in which humans have adapted Reprint 17 500 first printing

Ailing, Aging, Addicted Bert E. Park, 2021-10-21 What role did drug abuse play in John F Kennedy s White House and how was it kept from the public How did general anesthetics and aging affect the presidency of Ronald Reagan Why did Winston Churchill become more egocentric Woodrow Wilson more self righteous and Josef Stalin more paranoid as they aged and how did those qualities alter the course of history Was Napoleon poisoned with arsenic or did underlying disease account for his decline at the peak of his power Does syphilis really explain Henry VIII s midlife transformation Was there more than messianism brewing in the brains of some

zealots of the past among them Adolf Hitler Joan of Arc and John Brown Most important of all when does one man's illness cause millions to suffer and when is it merely a footnote to history To answer such questions requires the clinical intuition of a practicing physician and the scholarly perspective of a trained historian Bert Park who qualifies on both counts offers here fascinating second opinions basing his retrospective diagnoses on a wide range of sources from medicine and history Few books so graphically portray the impact on history of physiologically compromised leadership misdiagnosis and inappropriate medical treatment Park not only untangles medical mysteries from the past but also offers timely suggestions for dealing with such problems in the future As a welcome sequel to his first work *The Impact of Illness on World Leaders* this book offers scholars physicians and general readers an entertaining albeit sobering analysis **Guy de Maupassant's Selected Works (First International Student Edition) (Norton Critical Editions)** Guy de Maupassant, 2016-08-27 Smith

successfully captures Maupassant's depiction of nineteenth century French culture using terminology that allows these wonderful texts to reach a fresh generation of readers A solid translation of some wonderful short stories Library Journal The Norton Critical Edition includes Thirty of Maupassant's best short stories centering on war the supernatural and French life translated by Sandra Smith An introduction and explanatory footnotes by Robert Lethbridge Essays letters and newspaper articles on the subjects that influenced Maupassant's writing including politics war love despair and the supernatural Sixteen critical assessments from Maupassant's time to our own including those by Joseph Conrad David Coward Mary Donaldson Evans Rachel Killick Roger L Williams Ruth A Hottell and Katherine C Kurk A Chronology and a Selected Bibliography

Command Failure in War Philip Langer, Robert Pois, 2004-05-12 Why do military commanders most of them usually quite capable fail at crucial moments of their careers Robert Pois and Philip Langer one a historian the other an educational psychologist study seven cases of military command failures from Frederick the Great at Kunersdorf to Hitler's invasion of Russia While the authors recognize the value of psychological theorizing they do not believe that one method can cover all the individuals battles or campaigns under examination Instead they judiciously take a number of psycho historical approaches in hope of shedding light on the behaviors of commanders during war The other battles and commanders studied here are Napoleon in Russia George B McClellan's Peninsular Campaign Robert E Lee and Pickett's Charge at Gettysburg John Bell Hood at the Battle of Franklin Douglas Haig and the British command during World War I Bomber Harris and the Strategic Bombing of Germany and Stalingrad The Physiology of Psychological Disorders James G. Hollandsworth Jr., 2013-11-11 Explanations of abnormal behavior that emphasize the importance of physiological determinants of disorder are relatively unpopular among psychologists especially among those who work as clinicians in an applied setting The reasons for this are theoretical and historical as well as practical Physiology and its associated biological disciplines of biochemistry pharmacology and genetics are traditionally more associated with medicine their use to underpin explanations and treatments of behavioral abnormality has consequently demanded knowledge to which most psychologists are not exposed

and skills that are unavailable to them The dichotomy thus created between medical and psychological approaches has caused many psychologists to disregard physiological factors Even when the latter are recognized as important many psychologists have been unwilling to admit to the fact in the belief that by doing so they will commit themselves to an overly medical model of psychological disorder undermining what they see as preferred views of abnormality As I have become increasingly aware in following the progress of this book in the United States the theoretical issues in this debate have been further sharpened by professional rivalries present but less explicit on the European scene from which I write between medical and nonmedical health care workers regarding facilities for and approaches to the treatment of the mentally disturbed Faced with these divisions of interest psychologists have available two courses of action

A People's History of the Peculiar Nick Belardes, 2014-04-08 Did you know that Thomas Jefferson's grandson was an axe murderer Do you delight knowing that some dinosaurs were as teeny tiny as hens Wonder what it's like to live in Hell Town at the End of the World How about an ailment so surreal it's named after Alice in Wonderland In A People's History of the Peculiar historian Nick Belardes has dug into the raw source material found in historical archives scientific studies and libraries the world over to find facts lists definitions and astonishing information guaranteed to provide readers with the best cocktail conversation topics for many years to come Also found here are first person interviews with people who can explain the unexplained from the permanently puzzling Mothman conspiracy to secret Star Wars Jedi religious cults and the charmingly eccentric reason why British aerospace engineers sent teddy bears floating out into space These real world facts are outlandish enough to sharpen the brain and occupy readers' minds for hours of entertainment

Bible and Bedlam Louise J. Lawrence, 2018-08-23 Bible and Bedlam first critically questions the exclusion and stereotyping of certain biblical characters and scholars perceived as mad as such judgements illustrate the sanism prejudice against individuals who are diagnosed or perceived as mentally ill perpetuated within the discipline of Western biblical studies Second it seeks to highlight the widespread ideological gatekeeping protection and policing of madness in both western history and scholarship with regard to celebrated biblical figures including Jesus and Paul Third it initiates creative exchanges between biblical texts interpretations and contemporary voices from mad studies and sources autobiographies memoirs etc which are designed to critically disturb disrupt and displace commonly projected and often pejorative assumptions surrounding madness Voices of those subject to diagnostic labelling such as autism schizophrenia and or psychosis are among those juxtaposed here with selected biblical interpretations and texts

The Afterlife of Edgar Allan Poe Scott Peeples, 2007 Scott Peeples here examines the many controversies surrounding the work and life of Poe shedding light on such issues as the relevance of literary criticism to teaching the role of biography in literary study and the importance of integrating various interpretations into one's own reading of literature

Bibliography of the History of Medicine, *The Spirits of America* Eric Burns, 2004 In The spirits of America Burns

relates that drinking was the first national pastime and shows how it shaped American politics and culture from the earliest colonial days He details the transformation of alcohol from virtue to vice and back again and how it was thought of as both scourge and medicine He tells us how the great American thirst developed over the centuries and how reform movements and laws sprang up to combat it Burns brings back to life such vivid characters as Carrie Nation and other crusaders against drink He informs us that in the final analysis Prohibition the culmination of the reformers quest had as much to do with politics and economics and geography as it did with spirituous beverage The Dread Disease James T. Patterson, 1987 In a subtle and penetrating cultural history Patterson examines reactions to the disease through a century of American life Readers interested in the cultural dimensions of science and medicine as well as historians sociologists and political scientists will be enlightened and challenged by this book Uncle John's Ultimate Bathroom Reader Bathroom Readers' Institute, 2012-11-01 Uncle John's all new 8th edition is packed with everything that Bathroom Reader fans have come to expect from this stellar series short medium and long articles covering a whole host of topics everything from dumb crooks to funny quotes to forgotten history Read about Ice cream origins Olympic cheaters Celebrity mummies The first Thanksgiving Groucho's wit and wisdom Weird tales of the Ouija board The creation of Frankenstein's monster Earring Magic Ken and other weird dolls And much much more
