**Applied Sociology of Health and Illness** Costas S. Constantinou, 2014-05-29 This inspirational new text covers the basic principles of the sociology of health and illness in an eminently readable way By creatively employing the fictitious character of Frank Bennet a new medical student who cannot understand why he has to attend so many sessions in sociology in order to become

a doctor the book examines the most commonl *Narrative in Health Care* John D Engel,Joseph Zarconi,Lura Pethtel,Sally Missimi,2017-11-22 Narrative medicine has developed an identity already Clinicians of many disciplines are being summoned to a practice that recognizes patients by receiving their accounts of self Starting from different positions the four authors have converged in a strong and shared commitment to narrative health care They conceptualize narrative health care practices within frameworks derived from the social sciences and psychology and to a lesser degree phenomenology and autobiographical theory They relate the development of narrative medicine to relationship centered care patient centered care and complex responsive process of relating theory positing that narrative medicine can help clinicians to develop the skills required to practice relationship centered care The book details with exercises resource texts and abundant scholarly apparatus how these skills can be developed and strengthened This work will change health care Because of its scholarly rigor its multi voiced sources and its highly practical features lists activities key ideas and key references primary texts written by health care professionals and patients this work will be a guide in the field for those who practice medicine or nursing or social work The book establishes that there is a field to be practised a need to practise it and a means to develop the wherewithal to do so **How to Do Things with Narrative** Jan Alber,Greta Olson,2017-11-20 This volume combines narratological analyses with an investigation of the ideological ramifications of the use of narrative strategies The collected essays do not posit any intrinsic or stable connection between narrative techniques and world views Rather they demonstrate that world views are inevitably expressed through highly specific formal strategies This insight leads the contributors to investigate why and how particular narrative techniques are employed and under what conditions Reframing Disability and Quality of Life Narelle Warren,Lenore Manderson,2013-03-12 This volume brings together two parallel fields of interest One is the understanding among psychologists and other social scientists of the limits to psychometric measurement and the challenges in generating information about quality of life and wellbeing that enable comparison across time and place at both individual and population levels The second is the interest among anthropologists and others in the lived experience of chronic illness and disability including the unpredictable fluctuations in perceived health and capability Chronic conditions and physical impairments are assumed to impact negatively on people s quality of life affecting them psychologically socially and economically While some of these conditions have declined in prevalence as a result of prenatal diagnosis early successful interventions and changes in medical technology and surgery many of these conditions are on the increase as a consequence of improved life saving medication and technology and greater longevity Quality of life is often used as an indicator for successful and high quality health services and good access to medical attention and surgery for hip replacements or laser surgery to improve vision for instance But it is also used as an argument against interventions when such interventions are seen to prolong life for its own sake Yet we also know that people vary their idea of quality as a result of the context of fluctuations in their own health status the presence or absence of pain or discomfort and as a result of

variations in social and economic contextual factors In exploring these questions this volume contributes to emerging debates related to individual health outcomes but also to the social and other individual determinants that influence everyday life Understanding these broader contextual factors will contribute to our knowledge of the kinds of services support systems and infrastructure that provide people with good quality of life and a sense of wellbeing regardless of their physical health capability and functioning The volume includes scholars from all continents who have been encouraged to think critically and to engage with the descriptive methodological social policy and clinical implications of their work

**Social Work With African American Males** Waldo E. Johnson Jr.,2010-05-26 African American males have never fared as poorly as they do currently on a number of social indicators They are less likely to complete high school than their white male and female or African American female peers they are more likely to exhibit depressive symptoms and they have fewer sanctioned coping strategies Arguably no other group in American society has been more maligned regularly faced with tremendous odds that uniquely threaten their existence When they do receive education mental health and physical health services it is often in correctional settings They are marginalized in public policies on secondary and higher education attainment marriage and parental expectations public welfare health housing and community development Yet they remain overlooked in health and social science research and are stereotyped in the popular media Taking a step back from the traditionally myopic view of African American males as criminals and hustlers this groundbreaking book provides a more nuanced and realistic portrait of their experiences in the world Chapter authors both established and emerging scholars of social problems relevant to African Americans offer a comprehensive overview of the social and economic data on black males to date and the significant issues that affect them from adolescence to adulthood Via in depth qualitative interviews as well as comprehensive surveys and data sets their physical mental and spiritual health and emerging family roles are considered within both individual and communal contexts Chapters cover health issues such as HIV and depression fatherhood and family roles suicide violence academic achievement and incarceration With original research and a special eye toward enhancing social work and social welfare intervention practice with this often overlooked subpopulation of American society this volume will be of great interest to researchers interested in African American issues students practitioners and policy makers

**Institutionalizing Illness Narratives** Mathew George,2016-08-01 This book is an ethnographic work that uses a critical medical anthropology approach to examine the concept of fever care in the context of southern India Through a study of fevers the study provides a critical overview to medical practice itself as it is said that the history of fevers is also the history of medicine This association between fevers and medicine is as relevant today as this in depth study of fever care reveals Acknowledging the central role of health institutions in creating and propagating notions about illness in society the author examines fever care through a study of hospitals The study examines various discourses on fevers prevalent in the southern state of Kerala which influence policy and programmatic dimensions of the state health services system Fever care

implies those aspects related to provisioning and cost involved among public and private sector hospitals A second and more important dimension of this book is a critique of the culture of biomedical practice informed by the social constructivist framework and approaches in the field of science studies Overall the book studies the processes by which physical symptoms like fever are treated as epidemics to be controlled and are therefore brought within a biomedical system thereby opening up options for commercialization of care
