Is there a significant difference between engagement with a game and engagement with a movie or novel? Can interactivity contribute to immersion, or is there a trade-off between the immersive "world" aspect of video and their interactive "game" dimension? As Marie-Laure Ryan demonstrates in *Narrative as Virtual Reality 2*, the questions raised by the new interactive technologies have their precursors and echoes in pre-electronic literary and artistic traditions.

Approaching the idea of virtual reality as a metaphor for total art, Ryan applies the concepts of immersion and interactivity to develop a phenomenology of narrative experience that encompasses reading, watching, and playing. The book weighs traditional literary narratives against the new textual games made possible by the digital revolution of the past thirty years, including hypertext, electronic poetry, interactive drama, digital installation art, computer games, and multiplayer online worlds like *Second Life* and *World of Warcraft*.

In this completely revised edition, Ryan reflects on the developments that have taken place over the past fifteen years in terms of both theory and practice and focuses on the increase of narrativity in video games and its corresponding loss in experimental digital literature, following the cognitive approaches to criticism that have theorized immersion as the product of fundamental processes of world construction and mental simulation, she details the many forms that interactivity has taken—or hopes to take—in digital texts, from reformulating the presentation of signs to affecting the level of story.

Praise for the first edition:

"A major achievement of great value to students of literature, the new media, and art and aesthetics in general. Its richness of detail and comprehensiveness of overall design make it an object of intensive reading, a challenge for intellectual interaction, and last but not least, a source of pleasure for the mind."—*Philo Tech*

"A study of breathtaking depth and scope and, like all the very best academic books, it has some of the attributes of a good novel: it is elegantly written; it is enthralling; and it leaves the reader buzzing with new and exciting ideas. It is essential reading for anyone with an interest in virtual reality, and is a rich source of information, inspiration, and insight for a wider readership concerned with the relations between fiction, technologies, and their users."—*Intervistas: The Journal of Cult Media*

"Ryan's book fosters critical thought and debate, and it does so without being overly prolixative or unnecessarily vague.... [Ryan] creates a virtual reality for us to explore and take delight in."—*TEOQ*

"What intrigued me the most was Ryan's description of the emotional aspect of immersion which entails the contemplation of purely imaginary states of affairs in an evolutionary ascent that works toward the evolution of the species."—*Textbook of English Studies*

"Perhaps the most detailed and thorough study to date."—*Comparative Literature Studies*

Narrative As Virtual Reality:

Narrative as Virtual Reality Marie-Laure Ryan, 2003-10-03 As Ryan considers the fate of traditional narrative patterns in digital culture she revisits one of the central issues in modern literary theory the opposition between a presumably passive reading that is taken over by the world a text represents and an active deconstructive reading that imaginatively participates in the text's creation

Narrative as Virtual Reality Marie-Laure Ryan, 2001 Is there a significant difference in attitude between immersion in a game and immersion in a movie or novel The author demonstrates in this book that the questions raised by new interactive technologies have their precursors and echoes in pre-electronic literary and artistic traditions

Experiencing Immersion in Antiquity and Modernity Emma Cole, 2025-07-10. This book examines the links between experiencing immersion in antiquity and modernity. Immersive experiences are big business within today's creative economy. Forms range from immersive museum exhibitions, theatrical performances, art installations, and experiences facilitated through virtual and augmented reality technologies. Yet the idea of immersion is not new: paintings, sculpture, and theatre have all been theorised historically in terms of illusion, realism, and immersion. From antiquity to modernity, there has been an interest in theorising the relationship between reality and virtual realities and in contemplating whether feeling present in an alternate universe is a sought-after experience or something problematic and dangerous. The chapters in this volume explore the warnings against immersion voiced by Plato and embodied in the figure of the Homeric sirens, contrasted with the pro-immersion perspectives championed by Aristotelian mimesis and embodied in the concept of *enargeia*. The volume also examines the integration of the ancient world into immersive novels, games, museum exhibitions, and theatrical performances. Practice as Research contributions explore the benefits of this synergy from practitioner perspectives. Contributors from diverse fields, including classical reception studies, art history, game studies, heritage studies, and theatre studies, approach the interplay between antiquity and modernity from varied standpoints. Together, they uncover previously unforeseen connections across disciplines and lay the groundwork for future research and additional classically inflected immersive experiences.

Interactive Storytelling Lissa Holloway-Attaway, John T. Murray, 2023-10-30. This two-volume set, LNCS 14383 and LNCS 14384, constitutes the refereed proceedings of the 16th International Conference on Interactive Digital Storytelling (ICIDS 2023) held in Kobe, Japan, during November 11–15, 2023. The 30 full papers presented in this book, together with 11 short papers, were carefully reviewed and selected from 101 submissions. Additionally, the proceedings include 22 Late-Breaking Works. The papers focus on topics such as theory, history, and foundations; social and cultural contexts; tools and systems; interactive narrative design; virtual worlds; performance; games and play; applications; and case studies and late-breaking works.

Interactive Storytelling Anne-Gwenn Bosser, David E. Millard, Charlie Hargood, 2020-10-26. This book constitutes the refereed proceedings of the 13th International Conference on Interactive Digital Storytelling (ICIDS 2020) held in Bournemouth, UK, in November 2020. The 15 full papers and 8 short papers presented together with 5 posters were carefully reviewed and selected from 70 submissions. The conference offers topics in game narrative and interactive storytelling, including the theoretical, technological, and applied design practices, narrative systems, storytelling technology, and humanities-inspired theoretical inquiry, empirical research, and artistic expression.

Posthuman Worlds Adolfo Cacheiro,2022 Posthuman Worlds Roberto Bola o s Narrative and Virtual Reality presents interpretations of several novels and one short story by Roberto Bola o As befits the global setting of most of these narratives they are analyzed from the perspective of global culture and politics Particular attention is paid to

transnational European politics as this topic is central to an understanding of the intertwined themes of politics and the law in Bolaño's work. In *Distant Star* and *Labyrinth* these themes exist within the context of a preoccupation with personal identity and ideology. Adolfo Cacheiro utilizes psychoanalytic interpretation and philosophical exegesis to clarify the subjective component of this preoccupation in the aforementioned texts. The law is also a prominent theme of *The Savage Detectives* which Cacheiro interprets in relation to mythology. One of the most innovative aspects of this book is the discussion of the role of virtual reality in *Amulet* and *2666*. These novels are read as representations of a posthuman world that manifest an intertextual relationship with science fiction. In *2666* virtual reality unifies the diverse components of a world system in time and space. A phenomenological investigation of this reality supports the conclusion that the principle subject matter of *2666* is a naturalistic theology based on technology.
