**Metacognitive Approaches to Developing Oracy** Roy Evans, Deborah Jones, 2013-09-13 The acquisition of speech and language represent significant achievements for all children. These aspects of child development have received substantial attention in the research literature and a considerable body of theoretical knowledge exists to chart progress from infancy to maturity. Cross cultural studies have identified the common purposes served by the acquisition of oral language by children and the essential similarity in the sequence through which speech develops irrespective of geography and culture. What is less clear is precisely how children learn to say what they mean and how teachers and parents can support and enhance the development of meaningful speech in their children. Until now children's speech has been underused as a means of promoting learning in the formal school setting. New requirements within the National Curriculum are trying to address this gap but there remains a lack of clarity as to what this means for practice and how it relates to the broad base of curricular objectives. This book brings together a body of work from different countries; it offers an improved understanding of how strategies for developing speaking and listening may impact metacognitive awareness and raise standards of literacy and dialogic thinking for all children. This book was previously published as a special issue of *Early Child Development and Care*. *Handbook of Reading Research* P. David Pearson, Rebecca Barr, Michael L. Kamil, Peter Mosenthal, Elizabeth B. Moje, Peter Afflerbach, Patricia Enciso, Nonie K. Lesaux, 1996 The *Handbook of Reading Research* is the research handbook for the field. Each volume has come to define the field for the period of time it covers. When taken as a set the four volumes provide a definitive history of reading research. Back of cover volume 4 *The Pragmatics of Uncertainty* 2001-03 *Meaning in Interaction* Jenny A. Thomas, 2014-05-01 *Meaning in Interaction: An Introduction to Pragmatics* is a comprehensive introductory text which discusses the development of pragmatics, its aims and methodology, and also introduces themes that are not generally covered in other texts. Jenny Thomas focuses on the dynamic nature of speaker meaning, considering the central roles of both speaker and hearer and takes into account the social and psychological factors involved in the generation and interpretation of utterances. The book includes a detailed examination of the development of Pragmatics as a discipline, drawing attention to problems encountered in earlier work and brings the reader up to date with recent discussion in the field. The book is written principally for students with no previous knowledge of pragmatics and the basic concepts are covered in considerable detail. Theoretical and more complicated information is highlighted with examples that have been drawn from the media, fiction and real life interaction and makes the study more accessible to newcomers. It is an ideal introductory textbook for students of linguistics and for all who are interested in analysing problems in communication.
