Cline,1997 Cline also finds that trade liberalization has tended to raise skilled wages rather than reduce unskilled wages Moreover its impact has probably been no larger than falling transport and communication costs Most importantly for policy model simulations for the future show more limited trade

Monetary and Capital Markets Department, 2019-07-17 The IMF's 2019 External Sector Report shows that global current account balances stand at about 3 percent of global GDP Of this about 35 45 percent are now deemed excessive Meanwhile net credit and debtor positions are at historical peaks and about four times larger than in the early 1990s Short term financing risks from the current configuration of external imbalances are generally contained as debtor positions are concentrated in reserve currency issuing advanced economies An intensification of trade tensions or a disorderly Brexit outcome with further repercussions for global growth and risk aversion could however affect other economies that are highly dependent on foreign demand and external financing With output near potential in most systemic economies a well calibrated macroeconomic and structural policy mix is necessary to support rebalancing Recent trade policy actions are weighing on global trade flows investment and growth including through confidence effects and the disruption of global supply chains with no discernible impact on external imbalances thus far Trade and Payments After Soviet Disintegration John Williamson, 1992 *United States* International Monetary Fund. Western Hemisphere Dept., 2015-07-07 This 2015 Article IV Consultation highlights that the U S economy's momentum in the first quarter of 2015 was sapped by unfavorable weather a sharp contraction in oil sector investment and the West Coast port strike But the underpinnings for a continued expansion remain in place A solid labor market accommodative financial conditions and cheaper oil should support a more dynamic path for the remainder of the year Despite this the weaker outturn in the first few months of 2015 will unavoidably pull down 2015 growth Despite important policy uncertainties the near term fiscal outlook has improved and the federal government deficit is likely to move modestly lower in the current fiscal year Jamaica International Monetary Fund. Western Hemisphere Dept., 2018-04-16 This 2018 Article IV Consultation highlights that Jamaica's GDP growth is estimated to have been a disappointing 0 5 percent in 2017 Weakness in agriculture slow recovery in mining and a deceleration in manufacturing offset growth in tourism and construction The growth forecast is being revised down to 0 9 percent in FY17 18 and about 2 25 percent in the medium term Inflation remains well anchored Higher food prices resulting from flooding have begun to unwind The current account deficit remains relatively low at 2 8 percent of GDP in FY17 18 and it is expected to shrink over the medium term as oil prices remain contained and tourism earnings improve

U.S. International Trade Performance and Outlook United States. Congress. House. Committee on Ways and Means. Subcommittee on Trade, 1992 *St. Vincent and the Grenadines* International Monetary Fund. Western Hemisphere Dept., 2019-02-25 This Article IV Consultation highlights that following the opening of a modern international airport signs of an economic recovery have emerged with increased direct flights from major cities in the United States and Canada and renewed interests from foreign investors in tourism projects The overall fiscal balance has improved over the past few years and the debt to GDP ratio fell in 2017 for the first time since 2007 However despite these positive developments St Vincent

and the Grenadines faces challenges in sustaining the growth momentum over the longer term Like other Caribbean economies its high exposure to natural disasters limited land narrow production and exports base weak business competitiveness and limited physical and human capital constrain potential growth The financial system remains broadly stable but has vulnerable spots in the non bank financial sector It is important to implement structural reforms to foster private sector activity by improving the investment environment and strengthening physical and human capital
