Ethics and Economics of Assisted Reproduction Maura A. Ryan,2003-06-11 For those who undergo it infertility treatment is costly time consuming invasive and emotionally and physically arduous yet technology remains the focus of most public discussion of the topic Drawing on concepts from medical ethics feminist theory and Roman Catholic social teaching Maura A Ryan analyzes the economic ethical theological and political dimensions of assisted reproduction Taking seriously the experience of infertility as a crisis of the self the spirit and the body Ryan argues for the place of reproductive technologies within a temperate affordable sustainable and just health care system She contends that only by ceasing to treat assisted reproduction as a consumer product can meaningful questions about medical appropriateness and social responsibility be raised She places infertility treatments within broader commitments to the common good thereby understanding reproductive rights as an inherently social rather than individual issue Arguing for some limits on access to reproductive technology Ryan considers ways to assess the importance of assisted reproduction against other social and medical prerogatives and where to draw the line in promoting fertility Finally Ryan articulates the need for a compassionate spirituality within faith communities that will nurture those who are infertile

Parental Obligations and Bioethics Bernard G. Prusak,2013-10-15 This book examines the question of what parental obligations procreators incur by bringing children into being Prusak argues that parents as procreators have obligations regarding future children that constrain the liberty of would be parents to do as they wish Moreover these obligations go beyond simply respecting a child s rights He

addresses in turn the ethics of adoption child support gamete donation surrogacy prenatal genetic enhancement and public responsibility for children **A Christian Response to the New Genetics** David H. Smith, Cynthia B. Cohen, 2003 Life is a gift that includes powers to be used and celebrated but that doesn't necessarily justify the use of every new power that comes along This volume appeals to both secular and religious readers in the centre of the great debate over our new genetic powers These essays affirm many traditional Christian perspectives and virtues while also introducing new insights transfer genetic manipulation patenting health insurance and the moral status of embryos They conclude that it is naive to either to reject outright or wholeheartedly embrace the new genetic powers In fact sometimes the best we can expect is to learn how to cope with moral uncertainty **Legal and Ethical Issues in Human Reproduction** Bonnie Steinbock, 2002 This collection of essays by thirteen leading international scholars in bioethics law philosophy and public health addresses many of the most difficult and intriguing issues surrounding today's advances in reproductive medicine **The Online World of Surrogacy** Zsuzsa Berend, 2016-09-01 Zsuzsa Berend presents a methodologically innovative ethnography of SurroMomsOnline.com the largest surrogacy support website in the United States Surrogates' views emerge from the stories debates and discussions that unfold online The Online World of Surrogacy documents these collective meaning-making practices and explores their practical emotional and moral implications In doing so the book works through themes of interest across the social sciences including definitions of parenthood the symbolic role of money reproductive loss altruism and the moral valuation of relationships **Sex, Gender, and Christian Ethics** Lisa Sowle Cahill, 1996-08-28 This book endorses feminist critiques of gender yet upholds the insight of traditional Christianity that sex commitment and parenthood are fulfilling human relations Their unity is a positive ideal though not an absolute norm Women and men should enjoy equal personal respect and social power In reply to feminist critics of oppressive gender and sex norms and to communitarian proponents of Christian morality Cahill argues that effective intercultural criticism of injustice requires a modest defence of moral objectivity She thus adopts a critical realism as its moral foundation drawing on Aristotle and Aquinas Moral judgment should be based on reasonable practical prudent and cross-culturally nuanced reflection on human experience This is combined with a New Testament model of community centred on solidarity compassion and inclusion of the economically or socially marginalised **Theological Bioethics** Lisa Sowle Cahill, 2005-11-16 The field of bioethics was deeply influenced by religious thinkers as it emerged in the 1960s and early 1970s Since that time however a seemingly neutral political liberalism has pervaded the public sphere resulting in a deep suspicion of those bringing religious values to bear on questions of bioethics and public policy As a theological ethicist and progressive Catholic Lisa Sowle Cahill does not want to cede the religious perspective to fundamentalists and the pro-life movement nor does she want to submit to the gospel of a political liberalism that champions individual autonomy as holy writ In *Theological Bioethics* Cahill calls for progressive religious thinkers and believers to join in the effort to reclaim the best of their traditions through jointly engaging political forces at

both community and national levels In Cahill's eyes just access to health care must be the number one priority for this type of participatory bioethics She describes a new understanding of theological bioethics that must go beyond decrying injustice beyond opposing social practices that commercialize human beings beyond painting a vision of a more egalitarian future Such a participatory bioethics she argues must also take account of and take part in a global social network of mobilization for change it must seek out those in solidarity those involved in a common calling to create a more just social political and economic system During the past two decades Cahill has made profound contributions to theological ethics and bioethics This is a magisterial and programmatic statement that will alter how the religiously inclined understand their role in the great bioethics debates of today and tomorrow that yearn for clear thinking and prophetic wisdom

The Organ Shortage Crisis in America Andrew Michael Flescher, 2018-03-01 Nearly 120 000 people are in need of healthy organs in the United States Every ten minutes a new name is added to the list while on average twenty people die each day waiting for an organ to become available Worse our traditional reliance on cadaveric organ donation is becoming increasingly insufficient and in recent years there has been a decline in the number of living donors as well as in the percentage of living donors relative to overall kidney donors Some transplant surgeons and policy advocates have responded to this shortage by arguing for the legalization of the sale of organs among living donors Andrew Flescher objects to this approach by going beyond concerns traditionally cited about social justice commodification and patient safety and moving squarely onto the terrain of discussing what motivates major and costly acts of human selflessness What is the most efficacious means of attracting prospective living kidney donors Flescher drawing on literature in the fields of moral psychology and economics as well as on scores of interviews with living donors suggests that inculcating a sense of altruism and civic duty is a more effective means of increasing donor participation than the resort to financial incentives He encourages individuals to spend time with patients on dialysis in order to become acquainted with their plight and as an alternative to lump sum payments consider innovative solutions that positively impact living donor participation that do not undermine the spirit of the National Organ Transplant Act of 1984 This book not only re-examines the important debate over whether to allow the sale of organs it is also the first volume in the field to take a close look at alternative solutions to the organ shortage crisis
