 Introduction Did you know that the concept of dieting is a relatively modern one In ancient times the mere idea of going
 without food in order to lose weight was not very common or usual That is because most of the time a large majority of
 people did not have enough of food to eat So the idea of their becoming fat was reduced Also our ancestors made sure that

they spent a major part of their lives doing hard physical labor in the open air That is why the food that they ate was easily assimilated in their bodies This meant that there was no chance of their gaining extra weight or the accumulation of extra cellulite on any part of their bodies Man was naturally conditioned through his genes to have a protective layer of fat on his body That is why down the centuries the idea of no fat on a body did not disturb his equanimity You may want to look at all the paintings and statues down the centuries The women and even children are Ruben esque in nature which means they are chubby and plump

The Automatic Diet Charles Platkin,2010-04-29 In the book THE AUTOMATIC DIET readers discover how to harness the power of time tested behavior modification techniques and empower themselves to lose weight and keep it off automatically All successful dieters share a common secret to consistently maintain their weight The secret is that they do not have to think about what they are doing Their food choices are instinctual and they already know what to eat when faced with the disastrous dieting situations we all encounter in everyday life Whether it s a cocktail party on an airplane or at an Italian restaurant they know to react and choose wisely THE AUTOMATIC DIET takes you step by step through a process of self analysis as well as powerful techniques based on practical steps that you can put to work immediately This easy accessible process will lead you to an understanding of your own patterns of success and failure in managing your weight Platkin then guides you to understand your own motivations and how you can use this knowledge to overcome self defeating habits with positive behaviors you can sustain for a lifetime THE AUTOMATIC DIET is founded on the principle of automaticity Automaticity is a psychological term used to describe the unconscious way in which we make choices for our daily behaviors Activities like setting an alarm clock at night putting on shoes before you leave the house buckling your seat belt when you get in a car and remembering how to drive to the office these activities do not require much thought we just do them If we consciously thought about each decision that we make we would be exhausted at the end of a day Through automaticity we unconsciously automate some of our routine processes While automaticity has been working against you and your weight loss goals for years THE AUTOMATIC DIET will show you how to redirect your knee jerk impulses so they can work in your favor
