Quiet Fire:

Gay Midlife and Maturity John Alan Lee, 1991 Aging is stressful for anyone in youth oriented Western societies Elderly people encounter difficulties and discrimination sometimes because of reduced income transportation and housing problems and failing health but often due to the persistent negative stereotypes that color others attitudes and behavior toward old people Gay men and lesbians experience these stresses as well as the numerous additional problems associated with their sexual orientation Gay Midlife and Maturity is a dynamic and positive volume that challenges the long held stereotype of the sad and lonely old homosexual A growing body of international literature much of which is featured in this book rejects this myth and illustrates that older gay men and lesbians cope well with the aging process and are comparable to younger homosexuals in social and psychological adjustment A much needed and major contribution Gay Midlife and Maturity contains an enormous amount of information for readers interested in gerontology and homosexuality Experts for the first time examine the relationship between the adjustment of gay people to later life and the age and sequence of the resolution of these typically early developmental processes raising many questions about traditional theories of gay development The existing contradictions and debates about gay men and accelerated aging are addressed Other valuable chapters focus on a theory of successful aging a comparison of the traditional gay community pre Stonewall versus the organized gay community the vital role of communication in gay relationships the sexual attitudes and behaviors of older gay men and much more Additional interesting and worthwhile chapters of this thought provoking new book include an in depth interview with Don Bachardy about his 33 year relationship Christopher Isherwood a renowned English writer who was 30 years his senior and a review of the growing literature on gay aging

Gutsy Leah Katz, 2022-05-03 Western society too often trains women out of feeling innately confident in who we are and in the wisdom we hold inside Instead we are handed down a set of expectations about our bodies our disposition our religious identification our sexual orientation our mothering and our career choices Dr Leah Katz draws on her training as a psychologist and her experience leaving an ultra Orthodox Jewish faith and culture to offer tools and insights for getting unstuck from society's unrealistic and often harmful expectations for women that we have adopted as our own By learning to identify what is holding us back and adopting a mindset of joy gratitude and resilience we can fulfill our dreams and really fulfill ourselves It's time to get gutsy and create the rich vibrant life we have always wanted

Fire Control Handbook United States. Forest Service. California Region, 1937 *The Thirtymile Fire* John N. Maclean, 2013-11-12 A riveting account of the deadly Thirtymile fire and the controversy and recriminations that raged in its aftermath from our premier chronicler of wildfires and those who fight them The Thirtymile fire in the remote North Cascade range near the Canadian border in Washington began as a simple mop up operation In a few hours a series of catastrophic errors led to the entrapment and deaths of four members of the fire crew two teen age girls and two young men Each had brought order and meaning to their lives by joining the fire world Then the very flames they pursued turned on them

extinguishing their lives When the victims were blamed for their own deaths the charge brought a storm of controversy that undermined the firefighting community Continuing a tradition established in his previous books and by his father Norman s Young Men and Fire John N Maclean serves as an unflinching guide to the rogue fire s unexpected violence which is almost matched by the passions released by the official verdict of the blaze Weaving together the astonishing stories told by the witnesses the victims family members and the official reports Maclean produces a dramatic narrative of a catastrophe that has changed the way fire is fought More than anything it is a story of humanity at risk when wildfire ancient and unpredictable breaks loose Domestic Engineering and the Journal of Mechanical Contracting ,1928 The Heart of
