## **Quitting Smoking:**

**Quitting Smoking For Dummies** David Brizer, M.D.,2011-05-04 The decision to quit smoking is far from a casual one. Quitting smoking involves your complete commitment; it must become your number one priority. Mustering all the support you can get, you need to decide to turn up the flame on your survival instincts, your belief in a healthy future, and your will, power, and faith that you can and will quit. The sooner you stop smoking, the better your chances of avoiding some of the unwelcome consequences of smoking. Your body and brain begin to recover almost immediately. Cigarette cravings aside, your body wants to stop smoking, and the moment you cut loose the smokes, your respiratory system begins to clear itself out. Here are just a few of the benefits you can reap from kicking the habit: A longer life with a lower risk of cancer and other deadly diseases. No more sore throats, congested lungs, and persistent cough. The ability to exercise and get back into shape. Kissable breath and clothes that don't smell like you just came home from a bar. Being able to really taste good food. Pleasing your family and friends and no more being the outcast. Like all smokers, you've probably tried to quit a half dozen times, only to relapse. Perhaps you'd given up all hope of being able to quit, but now you're getting pressure from others, such as family members, to end your smoking career completely. But how do you take those first steps? And how do you follow through with your commitment to quit smoking? *Quitting Smoking For Dummies* can help. *Quitting Smoking For Dummies* takes a total approach to help you quit smoking short of yanking the cigarettes from your hands. It gives you the cold, hard truth about why you're addicted and how smoking harms your body, and it helps you develop a plan for finally quitting. Here's just a sampling of the topics you'll find covered: Understanding the various forms of tobacco and their effects. Figuring out why you're addicted. Analyzing the health risks of smoking. Developing a strategy to quit smoking. Exploring nicotine replacement therapies. Staying clean. Avoiding the relapse. Getting help from support groups and programs. Special considerations for pregnancy and teen smoking. So the question to ask yourself is: Why wait to quit? You're going to have to eventually, why not start now? With *Quitting Smoking For Dummies*, you can start your recovery today and look forward to a long and healthy life.

It takes readers through the motions of what smokers can expect before, during, and after they've quit, as well as how to prepare the mind and body for each obstacle. While other books and programs focus primarily on medical opinions and gimmicks, *Quitting Cold* uses knowledge and willpower as the forefront for success. Based on personal experience and triumph, Kalicak, who smoked for twelve years, has created an easy-to-digest 10-step program. **How to quit smoking** Melissa Schutter,2021 Smokers do want to quit smoking and they are waiting for that auspicious day eagerly But still quitting the smoking becomes impossible for them They do try but again got caught in the same grip of an addiction They want to get succeed but again find themselves standing on the same point from where they have started their journey for a good cause This does not happen with one or two smoker It is a case with every other smoker They are trying hard to quit it but are not capable because of the love for nicotine Nicotine is a deadly drug but its addiction is very powerful The fortunate thing is that thousands of people are successfully trying to escape its grip and many have already succeeded They are same people who once have thought that they would not be able to quit Finally they won over evil and turned their dream into the reality Their determination has worked for them You can follow their footsteps too You need to fulfill the commitment you have done with yourself and with your near and dear ones The first step you need to do some alterations in your thinking Be optimist and change way of living a little The activities you have associated with habit of smoking needs to have some modifications Just change the way of dealing with them and you will notice a great change in you You need to associate a good reasoning behind cause of quitting and have to think about good consequences that follow If you do not feel good about quitting then you will never be able to quit smoking You should be mentally as well as emotionally strong to escape this deadly danger If you properly condition yourself mentally then you can certainly come onto the commitment you have done with yourself People are generally scared of the withdrawal effects without giving thought to their long term benefits They never think that pleasures comforts and enjoyment that they are getting from smoking is short term These feelings exist at subconscious level Studies say that we experience 60 000 thoughts a day Unfortunately most people give rise to the negative ones in that percentage You must pen down what you think about smoking and its quitting In general most people including smokers are against smoking Things will start working effectively if you start applying what you say rather than what you feel
