Judith Butler, Race and Education Charlotte Chadderton,2018-05-22 This book provides an analysis of race and education through the lens of the work of Judith Butler Although Butler tends to be best known in the field of education for her work on gender and sexuality her work more broadly encompasses the functioning of power and hegemonic norms and the formation of subjects and thus can also be applied to analyse issues of race Applying a Butlerian framework to race allows us to question its ontological status while considering it a hegemonic norm and a performative notion which has a significant impact on real lives The author considers the implications of Butler s thinking for debates addressing diverse contemporary educational issues in which race continues to be re produced such as the formation of leaner identities the production of the good citizen raising student aspirations counter terrorism and surveillance in education and qualitative research in education This book will be of interest to students and scholars of education and race the sociology of education and equality of opportunity

Encyclopedia of Race and Ethnic Studies Ellis Cashmore,2004-03 The book comprises essays each highlighting a particular word or term germane to the study of race and ethnic studies

Marginality in the Urban Center Peary Brug,Zachary S. Ritter,Kenneth R. Roth,2018-12-22 This book examines the increasing marginalization of and response by people living in urban areas throughout the Western Hemisphere and both the local and global implications of continued colonial racial hierarchies and the often dire consequences they have for people perceived as different However in the aftermath of recent U S elections whiteness also seems to embody strictures on

religion ethnicity country of origin and almost any other personal characteristic deemed suspect at the moment For that reason gender race and even class collectively may not be sufficient units of analysis to study the marginalizing mechanisms of the urban center The authors interrogate the social and institutional structures that facilitate the disenfranchisement or downward trajectory of groups and their potential or subsequent lack of access to mainstream rewards The book also seeks to highlight examples where marginalized groups have found ways to assert their equality No recent texts have attempted to connect the mechanisms of marginality across geographical and political boundaries within the Western Hemisphere *The World-System as Unit of Analysis* Roberto Patricio Korzeniewicz, 2017-09-22 World system analyses have recast the study of between and within nation country inequality as constituent aspects of a single field of inquiry the study of inequality and social stratification as processes that always have been global in their very essence World system analyses maintain that global social stratification pivots around institutional arrangements that render distributional outcomes as simultaneously national gendered racialized and global processes This book takes stock of some of the enduring theoretical and empirical contributions of a world system perspective and identifies promising directions for future inquiry and discussion Some chapters reassess the scope and methodologies of world system analysis around several key problems e g the spatial and temporal boundaries of global commodity chains the construction and challenge of various dimensions of social inequality systemic and antisystemic social movements Others take stock of areas in which world systems are promoting methodological innovation and or generating useful global data and identify questions that demand additional methodological and empirical attention for future research In different ways this book help us to critically reconsider some of the enduring legacies within a world system perspective such as Karl Polanyi s concept of the double movement or the distinction drawn by Giovanni Arrighi or Immanuel Wallerstein between systemic and antisystemic movements As argued by many of the authors in this book a world historical approach calls for greater sensitivity to the manifold ways in which conceptual boundaries change over time and space Taking seriously the issue of unit of analysis this book explores critically productive ways for better understanding global patterns of continuity and change *Race and State* Karen Fricker, Ronit Lentin, 2009-01-14 Speaking about racism in the western political climate of the first decade of the twenty first century is more difficult than ever before There is a feeling in post colonial and post immigration societies that the blatant overt racism of the past is no longer as pressing Admitting racism elicits discomfort because common wisdom tells us that racism opposes everything that we believe in as citizens of democratic civilised modern states Yet state racism appears to be here to stay and in many ways is more acceptable than ever before Immigration detention centres the deportation of failed asylum seekers and illegal immigrants racial profiling and the rolling back of liberties won by the civil rights movement are all examples of how state racism impacts on our daily lives *Race and State* contributes to breaking the taboo of discussing the links between race and state The papers collected in this book highlight the interconnections between race and state from historical

theoretical or contemporary sociological perspectives Part I of the book looks at theoretical issues in conceptualising the race state relationship Part II examines racism in its most pernicious contemporary manifestation the racialisation of terror Part III on the racial state s of Ireland is an important addition to the debate examining Ireland as a test case for demonstrating and interpreting the relationship between race and state

Researching 'Race' and Ethnicity Yasmin Gunaratnam, 2003-08-07

Gunaratnam s framework is rich in its examination and synthesis of approaches to the study of race the reward for the reader who does pick up the book is that the author deftly articulates the complicated view of research on race first from the quantitative perspective and then skilfully moves the reader to issues of race in qualitative research

Studies in Ethnicity and Nationalism This is a welcome book for those engaged in policy and empirical work with an active research agenda there is a level of theoretical sophistication in the text which is often missing from texts concerned with methods in this area

Race Relations Abstracts The particular value of this book to readers lies in the discussion of race ethnicity and research issues within a political and social context The author states her intention to explore some of the theoretical and practical dilemmas of researching race and ethnicity This is without question achieved I recommend it as essential reading for those concerned with increasing their awareness of issues relating to race ethnicity and research

Nurse Researcher This is a thought provoking and challenging book which demonstrated the fractured and fluid nature of difference and power in the research process Importantly it offers a guide to the ways in which research can be effectively and productively used in challenging the status quo

Diversity in Health and Social Care *Researching Race and Ethnicity* provides an innovative discussion of the methodological epistemological and ethical challenges of doing qualitative research that is informed by questions of race ethnicity and social difference By identifying and challenging categorical thinking and many longstanding assumptions about the meanings of race and ethnicity the author gets to the heart of many of the everyday dilemmas and difficulties that researchers confront in the field but are rarely theorised or openly discussed

Yasmin Gunaratnam s insistence that race and ethnicity are a significant part of all qualitative research and are not the specialist concerns of those whose work is explicitly focussed upon race provokes a radical rethinking of current methodological debates How do racial and ethnic categories inform our approaches to research How does the racialised identity of the researcher and the research participants affect the research interaction and the knowledge that we produce What are the assumptions that are made about racialised subjectivity and inter subjectivity How can we make sense of accounts in which race and ethnicity are silent or are non manifest How can we work ethically across difference In examining these and other questions the wide ranging discussions in the book are animated by examples drawn from the author s ethnographic research with white and minoritized research participants Through these examples readers will be able to engage with some of the complexities of research relationships power relations and ethical concerns about engagement disconnection and complicity in research The attention that the book gives to the excluded experiences of minoritized

researchers will be of particular value to many readers Researching Race and Ethnicity is essential reading for students and academics in the social sciences *Inequality, Power and School Success* Gilberto Conchas, Michael Gottfried, 2015-04-10 This volume highlights issues of power inequality and resistance for Asian African American and Latino students in distinct U S and international contexts Through a collection of case studies it links universal issues relating to inequality in education such as Asian Latino and African American males in the inner city neighborhoods Latina teachers and single mothers in California undocumented youth from Mexico and El Salvador immigrant Moroccan youth in Spain and immigrant Afro Caribbean and Indian teenagers in New York and in London The volume explores the processes that keep students thriving academically and socially and outlines the patterns that exist among individuals students teachers parents to resist the hegemony of the dominant class and school failure With emphasis on racial formation theory this volume fundamentally argues that education despite inequality remains the best hope of achieving the American dream *Critical Race Theory and Education* M. Cole, 2009-05-19 Critical Race Theory CRT in the realm of Education has a long history in the US and is now a burgeoning field of enquiry in the UK Critical Race Theory and Education is the first book length response to CRT from a Marxist perspective It looks at CRT's origins in Critical Legal Studies critiques the work of major US and UK Critical Race Theorists and also looks at some of CRT's strengths CRT and Marxism are contextualized with respect to both neo liberal global capitalism and imperialism and to antiracist socialist developments in South America The book concludes with some suggestions for classroom practice *An Eye on Race* John Beusterien, 2006 Racism in the modern nation state is based on a Continental and an American model In the Continental model the racist differentiates the raced individual by religion Because this raced individual is indistinguishable from the racist a narrative is written to see that individual In turn in the American model the racist differentiates the raced individual based on skin color Because the sign of difference is obvious no story is written to justify racist thinking By 1550 both models form part of imperial thinking in the Iberian world system An Eye on Race Perspectives from Theater in Imperial Spain describes these models at work in imperial Spanish theater The study reveals how the display of blood in drama serves the Continental model and how the display of skin color serves the American model It also elucidates how Miguel de Cervantes celebrates a subaltern aesthetic as he discards both racial paradigms John Beusterien is Associate Professor of Spanish at Texas Tech University
