Immigrant Labor and Racial Conflict in Industrial Societies Gary P. Freeman, 2015-03-08 In order to describe how the elites in two political systems grappled with the potentially explosive influx of foreign labor Gary Freeman analyzes and compares the ways in which the British and the French governments responded to immigration and racial conflict over a thirty year period during the post war era In addition to comparing the policy records of the two countries the author focuses on the process by which political and social phenomena become defined as public problems and how alternative responses to these problems are generated His broader aim is to provide a standpoint from which to evaluate the more general problem solving capability of the political systems under consideration Professor Freeman finds that by 1975 both Britain and France had instituted tightly controlled racially discriminatory temporary contract labor systems Despite this basic similarity however he notes three distinctions between the two cases while the French attempted to adapt immigration to their economic needs the British failed to seize this opportunity while the British moved toward an elaborate race relations structure the French relied on criminal law and the economic self interest of the worker to prevent outbreaks of racial violence and the British were much more affected than the French by fears of immigration and racial conflict Originally published in 1979 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

European Migration Klaus F. Zimmermann, 2005-03-24 Developed countries especially in Europe face a number of issue related to migration social and economic disruptions caused by the declining demand for unskilled labour and resulting unemployment a shortage of skilled labour in many professions increasing international competition for highly qualified human capital radical demographic changes and the forthcoming expansion of the European Union which will trigger further immigration into major European countries and create new market opportunities in Central and Eastern Europe This suggests a need for a deeper knowledge of the causes and consequences of increased labour mobility This is especially important when it is associated with tension and fears among native populations This book brings together analyses of migration issues in major European countries and compares evidence with more countries that have traditionally

seen the most immigration First it studies migration streams since World War II and reviews major migration policy regimes Second it summarizes the empirical evidence measuring wages unemployment and occupational choices Third it investigates how migrants affects the labour markets of their host countries and evaluates econometric studies into the wage and employment consequences of immigration Surprisingly there is wide evidence that immigration is largely beneficial for receiving countries There might be phases of adjustment but there is no convincing evidence that natives wages are depressed or unemployment increases as a consequence of migrant inflow However there is a growing impression that migration does serve less and less the needs of the labour market This suggests a stronger focus on economic channels of immigration for which the book provides a conceptual basis and the required empirical facts and institutional background
