Race The Reality Of Human Differences:

Race Vincent Sarich, Frank Miele, 2005-08-19 Arguing that race is a biologically significant difference the authors challenge the weight of academic opinion on the subject and suggest honesty rather than fear mongering in light of growing evidence that the various races are significantly different 20 000 first printing *Race* Vincent Sarich, 2018 The conventional wisdom in contemporary social science claims that human races are not biologically valid categories Many argue the very words race and racial differences should be abolished because they support racism In *Race* Vincent Sarich and Frank Miele challenge both these tenets First they cite the historical record the art and literature of other civilizations and cultures morphological studies cognitive psychology and the latest research in medical genetics forensics and the human genome to demonstrate that racial differences are not trivial but very real They conclude with the paradox that while scientific honesty requires forthright recognition of racial differences public policy should not recognize racial group membership The evidence and issues raised in this book will be of critical interest to students of race in behavioral and political science medicine and law Provided by publisher **Race, Racism, and Science** John P. Jackson, Nadine M. Weidman, 2006 Since the eighteenth century when natural historians created the idea of distinct racial categories scientific findings on race have been a double edged sword For some antiracists science holds the promise of one day providing indisputable evidence to help eradicate racism On the other hand science has been enlisted to promote racist beliefs ranging from a justification of slavery in the eighteenth century to the infamous twentieth century book *The Bell Curve* whose authors argued that racial differences in intelligence resulted in lower test scores for African Americans This well organized readable textbook takes the reader through a chronological account of how and why racial categories were created and how the study of race evolved in multiple academic disciplines including genetics psychology sociology and anthropology In a bibliographic essay at the conclusion of each of the book's seven sections the authors recommend primary texts that will further the reader's understanding of each topic Heavily illustrated and enlivened with sidebar biographies this text is ideal for classroom use

After Multiculturalism John F. Welsh, 2007-12-12 *After Multiculturalism* The Discourse on Race and the Dialectics of Liberty provides a unique critique of multiculturalist thought in social theory and public policy from an individualist perspective Contemporary academic and policy discourse on race and racism in the United States is dominated by collectivist social theories that are founded on the idea that the only meaningful challenges to racism are those that foster collective social identities and seek to influence and direct the use of state power in the interest of particular racial and ethnic groups Multiculturalism is the prevailing incarnation of anti racist thought that informs and mediates political process and organizational life in the United States The multicultural discourse on race has become tribalist anti western anti market and statist *After Multiculturalism* challenges the notion that collectivist and statist ideologies own racism as an educational and public policy issue Welsh demonstrates that individualist philosophies entail critiques of racism that follow directly from their

anti collectivist and anti statist foundations He argues that multiculturalism is unlikely to promote the types of social action and changes essential to overcoming racism and that the individualist and libertarian ideas discussed in the book make important contributions toward the realization of a world free of racial domination To this end the ideas of Ayn Rand Murray Rothbard Benjamin Benjamin Tucker Lysander Spooner Max Stirner and contemporary libertarian scholars are discussed to the lay the foundation for a critique of multiculturalism The book explores the concepts of post ethnicity and transracialism as individualist and libertarian expressions of a society after multiculturalism Welsh s discussions of transracialism and post ethnicity constitute unique and important contributions to social thought This book will hold great interest for scholars and students concerned with race ethnicity political theory or individualist thought as well as scholars and students of the history of ideas

Should Race Matter? David Boonin,2011-11-14 In this book philosopher David Boonin attempts to answer the moral questions raised by five important and widely contested racial practices slave reparations affirmative action hate speech restrictions hate crime laws and racial profiling Arguing from premises that virtually everyone on both sides of the debates over these issues already accepts Boonin arrives at an unusual and unorthodox set of conclusions one that is neither liberal nor conservative color conscious nor color blind Defended with the rigor that has characterized his previous work but written in a more widely accessible style this provocative and important new book is sure to spark controversy and should be of interest to philosophers legal theorists and anyone interested in trying to resolve the debate over these important and divisive issues

Addison,2009-02-16 We hold these truths to be self evident An Interdisciplinary Analysis of the Roots of Racism and Slavery in America delves into the philosophical historical socio cultural and political evolution of racism and slavery in America The premise of this work is that racism and slavery in America are the result of an unintentional historical intertwining of various Western philosophical religious cultural social economic and political strands of thought that date back to the Classical Era These strands have become tangled in a Gordian knot which can only be unraveled through the bold application of a variety of multidisciplinary tools By doing so this book is intended help the reader understand how the United States a nation that claims all men are created equal could be responsible for slavery and the intractable threads of racism and inequality that have become woven into its cultural the fabric

Nature, Human Nature, & Human Difference Justin E. H. Smith, 2015-06-30 People have always been xenophobic but an explicit philosophical and scientific view of human racial difference only began to emerge during the modern period Why and how did this happen Surveying a range of philosophical and natural scientific texts dating from the Spanish Renaissance to the German Enlightenment *Nature Human Nature and Human Difference* charts the evolution of the modern concept of race and shows that natural philosophy particularly efforts to taxonomize and to order nature played a crucial role Smith demonstrates how the denial of moral equality between Europeans and non Europeans resulted from converging philosophical and scientific developments including a declining belief in human nature's universality and the rise of biological classification The racial typing of human beings grew from the need to understand humanity within an all encompassing system of nature alongside plants minerals primates and other animals While racial difference as seen through science did not arise in order to justify the enslavement of people it became a rationalization and buttress for the practices of trans Atlantic slavery From the work of Fran ois Bernier to G W Leibniz Immanuel Kant and others Smith delves into philosophy's part in the legacy and damages of modern racism With a broad narrative stretching over two centuries *Nature Human Nature and Human Difference* takes a critical historical look at how the racial categories that we divide ourselves into came into being

Toward a Biosocial Science Alexander Riley, 2021-05-03 Sociology is in crisis While other disciplines have taken on board the revolutionary discoveries driven by evolutionary biology and psychology genomics and behavioral genetics and the neurosciences sociology has ignored these advances and embraced a biophobia that threatens to drive the discipline into marginality This book takes its place in a rich tradition of efforts to integrate sociological thinking into the world of the biological sciences that can be traced to the origins of the discipline and that took on modern form beginning a generation ago in the works of thinkers such as E O Wilson Richard Alexander Joseph Lopreato and Richard Machalek It offers an accessible introduction to rethinking sociological science in consonance with these contemporary biological revolutions From the standpoint of a biosociology rooted in the single most important scientific theory touching on human life the Darwinian theory of natural selection the book sketches an evolutionary social
