Race And Reconciliation In South Africa

Peter Vale, Pieter Fourie

Race And Reconciliation In South Africa:

Race and Reconciliation in South Africa William E. Van Vugt, G. Daan Cloete, 2000-01-01 In the mid 1990s the Truth and Reconciliation Commission disclosed its findings on the awful reality of the apartheid era in South Africa. The Commission inspired scholars from Europe, North America and South Africa to convene a group of their own to investigate in multicultural scholarly dialogue the history, theology, philosophy and politics of race and reconciliation in South Africa. This volume is the product of that important dialogue. And while the focus is the particular environment of South Africa, the contributors work within a comparative perspective using examples from other nations and cultures to explore that which makes South Africa unique. Ultimately, the book aims to offer not only a better understanding of the depth of injustice in South Africa's past but also a deeper appreciation for the achievement of the present and the promise of the future in South Africa and in every other multiethnic region in the world.

Race and Reconciliation Daniel Alan Herwitz, 2003 Faith, Race and Inequality amongst Young Adults in South Africa Nadine Bowers Du Toit, 2022-07-04 For many young South African adults often called born frees who were born just before or just after the demise of political apartheid, the ongoing realities of poverty and inequality bring to light the question of whether they truly are free in contemporary South Africa. Their lived experiences of poverty and inequality seem to be in conflict with theologically laden concepts that remain prominent in social and political life such as reconciliation, forgiveness, justice and restitution. This leads to a bi-directional process of contesting and being contested by such notions and discourses. Furthermore, in light of the double legacy of both the church and youth as resisting injustice, this publication seeks to explore the many perspectives from which the Christian faith, race and inequality amongst youth can be brought to light.

Rhetoric, Race, Religion, and the Charleston Shootings Melody Lehn, Sean Patrick O'Rourke, 2019-11-12 *Rhetoric, Race, Religion, and the Charleston Shootings* Was Blind but Now I See is a collection focusing on the Charleston shootings written by leading scholars in the field who consider the rhetoric surrounding the shootings. This book offers an appraisal of the discourses, speeches, editorials, social media posts, visual images, prayers, songs, silence, demonstrations and protests that constituted, contested and reconstituted the shootings in American civic life and cultural memory. It answers recent calls for local and regional studies and opens new fields of inquiry in the rhetoric, sociology and history of mass killings, gun violence and race relations and it does so while forging new connections between and among ongoing scholarly conversations about rhetoric, race and religion. Contributors argue that Charleston was different from other mass shootings in America and that this difference was made manifest through what was spoken and unspoken in its rhetorical aftermath. Scholars of race, religion, rhetoric, communication and sociology will find this book particularly useful.

Political Science in South Africa Peter Vale, Pieter Fourie, 2016-01-13 In 2013 and in 2014 respectively the South African Association of Political Studies (SAAPS) and Politikon, the South African Journal of Political Studies, celebrate their 40th anniversary. Also in April 2014, South Africa celebrates twenty years since the advent of the post-Apartheid democracy and

the birth of the rainbow nation This book provides a timely account of the birth and evolution of South African politics over the past four decades but also of the study of Political Science and International Relations in this country Fourteen political scientists contribute chapters to this volume situating the study of politics within its global context and recounting the development of politics as a field of study at South African universities The fourteen contributions evaluate the state of the discipline s and suggest conclusions that are surprising and in many instances unsettling not only with regards to what and how politics is taught but also how its study has variously gained and lost pertinence for South Africans understanding of their own polity as well as its place in the world The implications are uncomfortable and pose interesting challenges for South African scholarship pedagogy and national self reflection This book was published as a special issue of *Politikon*

Racial Integration in the Church of Apartheid Marthe Hesselmanns, 2018-11-01 In *Racial Integration in the Church of Apartheid* Marthe Hesselmanns uncovers the post apartheid transformation of South Africa s Dutch Reformed Church This church once constituted the religious pillar of the Afrikaner apartheid regime 1948-1994 Today it seeks to unite the communities it long segregated into one multiracial institution Few believe this will succeed A close look inside congregations reveals unexpected stories of reconciliation though Where South Africans realize they need each other to survive faith offers common ground albeit a feeble one They show the potential but also the limits of faith communities untangling entrenched national and racial affiliations Linking South Africa s post apartheid transition to religious nationalist movements worldwide Hesselmanns offers a unique perspective on religion as source of division and healing

Political Economy of Post-apartheid South Africa Vusi Gumede, 2015-12-29 The book made up of three parts covers a wide spectrum of political economy issues on post apartheid South Africa Although the text is mainly descriptive to explain various areas of the political economy of post apartheid South Africa the first and the last parts provide

illuminating insights on the kind of society that is emerging during the twenty one years of democracy in the country The book discusses important aspects of the political history of apartheid South Africa and the evolution of post apartheid society including an important recap of the history of southern Africa before colonialism The text is a comprehensive description of numerous political economy phenomena since South Africa gained its political independence and covers some important themes that have not been discussed in detail in other publications on post apartheid South Africa The book also updates earlier work of the author on policy and law making land and agriculture education and training as well as on poverty and inequality in post apartheid South Africa thereby providing a wide ranging overview of the socio economic development approaches followed by the successive post apartheid administrations Interestingly three chapters focus on various aspects of the post apartheid South African economy economic policies economic empowerment and industrial development Through the lens of the notion of democratic developmental state and taking apartheid colonialism as a point of departure the book suggests that so far post apartheid South Africa has mixed socio economic progress The authors extensive experience in the South African government ensures that the book has policy relevance while it is also theoretically sound The text is useful for anyone who wants to understand the totality of the policies and legislation as well as the political economy interventions pursued since 1994 by the South African Government

Security, Governance, and State Fragility in South Africa Edward L. Mienie, 2020-03-06 Do existing measures of state fragility measure fragility accurately Based on commonly used fragility measures South Africa SA is classified as a relatively stable state yet rising violent crime high unemployment endemic poverty eroding public trust identity group based preferential treatment policies and the rapid rise of the private security sector are all indications that SA may be suffering from latent state fragility Based on a comprehensive view of security this study examines the extent to which measures of political legitimacy and good governance effectiveness in the security system especially with respect to the police system and mounting economic challenges may be undermining the stability of SA in ways undetected by commonly used measures of state fragility Using a mixed methods approach based on quantitative secondary data analysis and semi structured interviews with government officials security practitioners and leading experts in the field this study finds that the combination of colonization apartheid liberation struggle transition from autocracy to democracy high levels of direct and structural violence stagnating social political and economic developments make South Africa a latently fragile state Conceptually the results of this research call into question the validity of commonly used measures of state fragility and suggest the need for a more comprehensive approach to assessing state fragility Practically this study offers a number of concrete policy recommendations for how South Africa may address mounting levels of latent state fragility

Irish Nationalists and the Making of the Irish Race Bruce Nelson, 2013-12-26 This is a book about Irish nationalism and how Irish nationalists developed their own conception of the Irish race Bruce Nelson begins with an exploration of the discourse of race from the nineteenth century belief that race is everything to the more recent argument that there are no races He focuses on how English observers constructed the native and Catholic Irish as uncivilized and savage and on the racialization of the Irish in the nineteenth century especially in Britain and the United States where Irish immigrants were often portrayed in terms that had been applied mainly to enslaved Africans and their descendants Most of the book focuses on how the Irish created their own identity in the context of slavery and abolition empire and revolution Since the Irish were a dispersed people this process unfolded not only in Ireland but in the United States Britain Australia South Africa and other countries Many nationalists were determined to repudiate anything that could interfere with the goal of building a united movement aimed at achieving full independence for Ireland But others including men and women who are at the heart of this study believed that

the Irish struggle must create a more inclusive sense of Irish nationhood and stand for freedom everywhere Nelson pays close attention to this argument within Irish nationalism and to the ways it resonated with nationalists worldwide from India to the Caribbean

Overcoming Apartheid James L. Gibson, 2004-04-15 Perhaps no country in history has so directly and thoroughly confronted its past in an effort to shape its future as has South Africa Working from the belief that understanding the past will help build a more peaceful and democratic future South Africa has made a concerted institutionalized effort to come to grips with its history of apartheid through its Truth and Reconciliation Commission In *Overcoming Apartheid* James L. Gibson provides the first systematic assessment of whether South Africa's truth and reconciliation process has been successful Has the process allowed South Africa to let go of its painful past and move on Or has it exacerbated racial tensions by revisiting painful human rights violations and granting amnesty to their perpetrators *Overcoming Apartheid* reports on the largest and most comprehensive study of post apartheid attitudes in South Africa to date involving a representative sample of all major racial ethnic and linguistic groups Grounding his analysis of truth in theories of collective memory Gibson discovers that the process has been most successful in creating a common understanding of the nature of apartheid His analysis then demonstrates how this common understanding is helping to foster reconciliation as defined by the acceptance of basic principles of human rights and political tolerance rejection of racial prejudice and acceptance of the institutions of a new political order Gibson identifies key elements in the process such as acknowledging shared responsibility for atrocities of the past that are essential if reconciliation is to move forward He concludes that without the truth and reconciliation process the prospects for a reconciled democratic South Africa would diminish considerably Gibson also speculates about whether the South African experience provides any lessons for other countries around the globe trying to overcome their repressive pasts A groundbreaking work of social science research *Overcoming Apartheid* is also a primer for utilizing innovative conceptual and methodological tools in analyzing truth processes throughout the world It is sure to be a valuable resource for political scientists social scientists group relations theorists and students of transitional justice and human rights

The Fall of Apartheid in South Africa Melissa Koosmann, 2020-02-04 For over forty years the people of South Africa lived under apartheid an oppressive system of laws

based on racism and inequality Many heroic people fought against this system but their actions carried grave risks Nelson Mandela spent 27 years in prison Helen Joseph faced house arrest and assassination attempts Steve Biko was beaten to death by police Find out how in spite of all the risks antiapartheid resistance grew stronger and over time it led to an amazing transformation Nelson Mandela changed from a prisoner to a president and South Africa changed itself into the stable democracy it is today
