## **Racialized Coverage Of Congress:**

**Racialized Coverage of Congress** Jeremy Zilber, David Niven, 2000-06-30 This examination of the causes severity and implications of racially stereotyped media coverage of Congress incorporates original analysis of congressional media coverage and interviews with congressional press staff The news media often portray African American members as being primarily interested in race overly concerned with local matters and wielding little legislative influence By contrast the images African American members attempt to project of themselves are more complex and comprehensive than the images the media communicate The authors offer a psychological explanation for this phenomenon the Distribution Effect in which those who are numerically rare in an occupation tend to be lumped together rather than treated as individuals Their findings suggest that it is the media rather than members of Congress who are responsible for the racialized images that appear regularly in the press This results in an advantage for white incumbents trying to attract votes but presents an obstacle to be overcome for African American politicians This study will appeal to political science media studies and racial studies scholars It incorporates content analysis of the newest forum of communication congressional Internet web sites to disclose how white and African American representatives in fact have similar media priorities

Douglas Arnold,2013-10-31 Congress the Press and Political Accountability is the first large scale examination of how local media outlets cover members of the United States Congress Douglas Arnold asks do local

newspapers provide the information citizens need in order to hold representatives accountable for their actions in office In contrast with previous studies which largely focused on the campaign period he tests various hypotheses about the causes and consequences of media coverage by exploring coverage during an entire congressional session Using three samples of local newspapers from across the country Arnold analyzes all coverage over a two year period every news story editorial opinion column letter and list First he investigates how twenty five newspapers covered twenty five local representatives and next how competing newspapers in six cities covered their corresponding legislators Examination of an even larger sample sixty seven newspapers and 187 representatives shows why some newspapers cover legislators more thoroughly than do other papers Arnold then links the coverage data with a large public opinion survey to show that the volume of coverage affects citizens awareness of representatives and challengers The results show enormous variation in coverage Some newspapers cover legislators frequently thoroughly and accessibly Others some of them famous for their national coverage largely ignore local representatives The analysis also confirms that only those incumbents or challengers in the most competitive races and those who command huge sums of money receive extensive coverage

*After Civil Rights* John D. Skrentny, 2015-11-24 A provocative new approach to race in the workplace What role should racial difference play in the American workplace As a nation we rely on civil rights law to address this question and the monumental Civil Rights Act of 1964 seemingly answered it race must not be a factor in workplace decisions In *After Civil Rights* John Skrentny contends that after decades of mass immigration many employers Democratic and Republican political leaders and advocates have adopted a new strategy to manage race and work Race is now relevant not only in negative cases of discrimination but in more positive ways as well In today's workplace employers routinely practice racial realism where they view race as real as a job qualification Many believe employee racial differences and sometimes immigrant status correspond to unique abilities or evoke desirable reactions from clients or citizens They also see racial diversity as a way to increase workplace dynamism The problem is that when employers see race as useful for organizational effectiveness they are often in violation of civil rights law *After Civil Rights* examines this emerging strategy in a wide range of employment situations including the low skilled sector professional and white collar jobs and entertainment and media In this important book Skrentny urges us to acknowledge the racial realism already occurring and lays out a series of reforms that if enacted would bring the law and lived experience more in line yet still remain respectful of the need to protect the civil rights of all workers
