Race, Money, and the American Welfare State Michael E. Brown, 2018-10-18 The American welfare state is often blamed for exacerbating social problems confronting African Americans while failing to improve their economic lot Michael K Brown contends that our welfare system has in fact denied them the social provision it gives white citizens while stigmatizing them as recipients of government benefits for low income citizens In his provocative history of America's safety net from its origins in the New Deal through much of its dismantling in the 1990s Brown explains how the forces of fiscal conservatism and racism combined to shape a welfare state in which blacks are disproportionately excluded from mainstream programs Brown describes how business and middle class opposition to taxes and spending limited the scope of the Social Security Act and work relief programs of the 1930s and the Great Society in the 1960s These decisions produced a welfare state that relies heavily on privately provided health and pension programs and cash benefits for the poor In a society characterized by pervasive racial discrimination this outcome Michael Brown makes clear has led to a racially stratified welfare system by denying African Americans work whites limited their access to private benefits as well as to social security and other forms of social insurance making welfare their main occupation In his conclusion Brown addresses the implications of his argument for both conservative and liberal critiques of the Great Society and for policies designed to remedy inner city poverty

Race and the Power of Sermons on American Politics R. Khari Brown, Ronald E. Brown, James S. Jackson, 2021-09-15

This book examines the intersection of race, political sermons, and social justice. Religious leaders and congregants who discuss and encourage others to do social justice embrace a form of civil religion that falls close to the covenantal wing of American civil religious thought. Clergy and members who share this theological outlook frame the nation as being exceptional in God's sight. They also emphasize that the nation's special relationship with the Creator is contingent on the nation working toward providing opportunities for socioeconomic well-being, freedom, and creative pursuits. God's covenant thus requires inclusion of people who may have different life experiences but who nonetheless are equally valued by God and worthy of dignity. Adherents to such a civil religious worldview would believe it right to care for and be in solidarity with the poor and powerless, even if they are undocumented immigrants, people living in non-democratic and non-capitalist nations, or members of racial or cultural outgroups. Relying on 44 national and regional surveys conducted between 1941 and 2019, *Race and the Power of Sermons on American Politics* explores how racial experiences impact the degree to which religion informs social justice attitudes and political behavior. This is the most comprehensive set of analyses of publicly available survey data on this topic.

Racial Equity, COVID-19, and Public Policy Elsie L. Harper-Anderson, Jay S. Albanese, Susan

T. Gooden, 2023-02-13 *Racial Equity, COVID-19, and Public Policy: The Triple Pandemic* focuses on the health, economic, and justice impacts of the COVID-19 pandemic on racial equity. The book does not simply document the problems made worse by the pandemic but it provides historical context for issues that rose to the surface in new ways, the existing inequities revealed during COVID-19, as well as policy responses to those issues. The volume is distinguished in its focus on the implications for racial equity through an examination of both existing public policy and new ideas for change. The chapters in this volume demonstrate the ways in which this period of American history and politics is unique, most notably in the convergence of major threats to public health, economic livelihood, and access to justice. This triple pandemic will be felt in the coming years and will continue to unfold depending upon the adequacy of the contemporary response. This edited volume is designed to provide the reader with a thorough understanding of issues including policing, housing, business, disaster response, education, immigration, vaccine distribution, reentry of justice-involved individuals, and the responses to public protests, all with a unifying focus on racial inequities and social justice concerns that elevated these issues to broader public attention and political response. This coalescing emphasis on public policy as both a cause and effect to address these issues makes the book a unique contribution to the public policy literature. This book responds to audiences seeking a better understanding of the events that occurred, the conditions that set the stage for their eruption into wider public view, and what might be done to prevent social and racial inequities in the future.

The Political Roots

of Racial Tracking in American Criminal Justice Nina M. Moore, 2015-01-26 The race problem in the American criminal justice system persists because we enable it The tendency of liberals to point a finger at law enforcement racial conservatives the War on Drugs is misguided Black as well as white voters Democrat as much as Republican lawmakers President Obama as much as Reagan both Congress and the Supreme Court alike all are implicated We all are The Man Whether the problem is defined in terms of blacks overrepresentation in prisons or in terms of the disproportional use of deadly police force against blacks not enough of us demand that something be done The Political Roots of Racial Tracking in American Criminal Justice is the story of how the race problem in criminal justice is continually enabled in the national crime policy process and why

Race in France Herrick Chapman, Laura Levine Frader, 2004 Scholars across disciplines on both sides of the Atlantic have recently begun to open up as never before the scholarly study of race and racism in France These original essays bring together in one volume new work in history sociology anthropology political science and legal studies Each of the eleven articles presents fresh research on the tension between a republican tradition in France that has long denied the legitimacy of acknowledging racial difference and a lived reality in which racial prejudice shaped popular views about foreigners Jews immigrants and colonial people Several authors also examine efforts to combat racism since the 1970s

Race and the Making of American Liberalism Carol A. Horton, 2005-09-08 Race and the Making of American Liberalism traces the roots of the contemporary crisis of progressive liberalism deep into the nation's racial past Horton argues that the contemporary conservative claim that the American liberal tradition has been rooted in a color blind conception of individual rights is inaccurate and misleading In contrast American liberalism has alternatively served both to support and oppose racial hierarchy as well as socioeconomic inequality more broadly Racial politics in the United States have repeatedly made it exceedingly difficult to establish powerful constituencies that understand socioeconomic equity as vital to American democracy and aspire to limit gross disparities of wealth power and status Revitalizing such equalitarian conceptions of American liberalism Horton suggests will require developing new forms of racial and class identity that support rather than sabotage this fundamental political commitment

Human Rights and Charity Law Kerry O'Halloran, 2016-03-10 The 60 or so nations that subscribe to the common law tradition had for centuries broadly accepted the same legal definitions of what constitutes a charity In recent years however a number of countries have embarked on charity law reform processes designed to strengthen the regulatory framework and to review and encode common law concepts A primary driver of reform was the need to modernise national charity law and ensure human rights compatibility In light of these reforms this book takes stock of how charity law is adapting to face the challenges presented by human rights The book identifies the key areas where human rights and charity law intersect and examines the importance of those areas the principles involved and their political significance It offers a comparative analysis of selected common law countries including England Wales Ireland US Canada Australia and New Zealand assessing the extent of national human rights and charity compatibility Kerry O'Halloran

also goes on to consider tensions arising from the intersection of human rights and charity law including the significance of cultural values and heritage the importance of proportionality and striking a balance between public and private interests in current society
