Dark is a new book about naval combat at night the title also however signifies the overarching theme of the book of moving from dark to light in short the process of mastering technological change during war The authors start with the proposition that it is hard to hit an invisible target particularly one in motion In the nineteenth century when ships relied upon visual signaling and vessels beyond hailing range were deaf and mute in the dark night battles at sea were rare and largely accidental Three inventions changed this the torpedo the searchlight and the radio These inventions at the end of the nineteenth and start of the twentieth centuries transformed naval warfare by making combat in the dark feasible and in some cases desirable The process by which navies used the dark and adapted it into a medium for effective combat was long and difficult more so for some than others This book is about that process and about how Russian British German Italian Japanese and US navies confronted the specific new challenges and adapted to unfamiliar situations and emerging technologies Fighting in the Dark consists of chapters written by a group of highly respected naval historians and the book's approach illuminates how different navies and cultures approached common problems The fierce night time battles that are described serve as a metaphor for the larger issues and the reader is led along a fascinating journey of naval warfare from the Russo Japanese War through WWI to the Second World War and from the Pacific to the English Channel **Fletcher Class**

Innovating Victory Vincent O'Hara, Leonard R Heinz, 2022-04-15 *Innovating Victory* Naval Technology in Three Wars studies how the world's navies incorporated new technologies into their ships their practices and their doctrine It does this by examining six core technologies fundamental to twentieth century naval warfare including new platforms submarines and aircraft new weapons torpedoes and mines and new tools radar and radio Each chapter considers the state of a subject technology when it was first used in war and what navies expected of it It then looks at the way navies discovered and developed the technology's best use in many cases overcoming disappointed expectations It considers how a new technology threatened its opponents not to mention its users and how those threats were managed *Innovating Victory* shows that the use of technology is more than introducing and mastering a new weapon or system Differences in national resources force mixtures priorities perceptions and missions forced nations to approach the problems presented by new technologies in different ways Navies that specialized in specific technologies often held advantages over enemies in some areas but found themselves disadvantaged in others Vincent P O'Hara and Leonard R Heinz present new perspectives and explore the

process of technological introduction and innovation in a way that is relevant to today's navies which face challenges and questions even greater than those of 1904, 1914 and 1939 *Science!* DK, 2018-08-07 See science as you've never seen it before This extraordinary encyclopedia fuels your imagination with its truly ground breaking visual approach to the world around us Jaw dropping 3D computer generated images burst from the pages detailing the tiny atoms that make up our Universe and the incredible forces that keep it all together From mixtures and metamorphosis to friction and flying the wonders of biology chemistry and physics are brought to together in one must have volume Travel to the tropics to see feeding flamingoes dive deep underwater to swim with a blue whale and rush to the racetrack to lift the top on a Formula 1 car Knowledge Encyclopedia Science covers all the key core subjects in glorious technicolor detail alongside easy explanations and fun facts to spark young minds to the science that surrounds us Part of DK's hugely successful Knowledge Encyclopedia series this is the perfect accompaniment to the school syllabus and an essential addition to every family library
