Re-crafting Rationalization Simon Locke,2016-03-23 Re-crafting Rationalization contributes to debates relating to the public understanding of science regarding the conceptualization of the relationship between science and the public It challenges the prevailing science centred or top down framework that currently informs notions of public engagement and knowledge transfer offering an alternative that remains firmly grounded in the discourse of classical social theory By proposing an alternative version of rationalization to the standard interpretation of Weber's disenchantment thesis this book establishes the public understanding of science as a matter of fundamental sociological concern As such it

redefines this field to emphasize public meanings of science engaging with a range of topics of major interest to the public and popular meaning of science including science and religion science fiction and fantasy fringe science and media representations of science Combining rhetorical analysis with ethnomethodology and membership categorization analysis the book outlines the basis of a new approach to the sociology of knowledge in the light of which Weber's rationalization thesis is radically re-crafted in relation to studies of scientists' discourse the rhetoric of science popularization and public usages of science This re-crafted rationalization is applied in a series of detailed empirical studies of enchanted science creationism and intelligent design Scientology and reflexive spirituality superhero comics and mundane mysteries Fortean discourse conspiracy theory and media representations of the scientist in the case of Jack the Ripper Re-crafting Rationalization therefore redresses a significant shortcoming in contemporary social theory which currently overlooks or misrepresents important public meanings of science whilst excluding popular culture from attention With profound implications for the ways in which we make sense of developments involving science this book will be of interest not only to sociologists and social theorists but also to those interested in popular culture and subcultures and the history philosophy and sociology of science
