## **Security Identity And Interests A Sociology Of International Relations:**

**Security, Identity and Interests** Bill McSweeney, 1999-11-04 Bill McSweeney addresses the central problem of international relations security and constructs a novel framework for its analysis. He argues for the unity of the interpersonal, societal and international levels of human behaviour and outlines a concept of security which more adequately reflects the complexity and ambiguity of the topic. This book introduces an alternative way of theorizing the international order within which the idea of security takes on a broader range of meaning, inviting a more critical and interpretative approach to understanding the concept and formulating security policy. The recent shift to sociology in international relations theory has not as yet realized its critical potential for the study of security. Drawing on contemporary trends in social theory, Dr McSweeney argues that human agency and moral choice are inherent features of the construction of the social and thus international order and hence of our conception of security and security policy.

**Europeanization of National Security Identity** Pernille Rieker, 2006-05-09 This new book tackles two key questions: 1. How is the EU functioning as a security actor? 2. How and to what extent is the EU affecting national security identities? Focusing on the four largest Nordic states: Denmark, Finland, Norway and Sweden, this incisive study analyzes how and to what extent the EU affects national security identities. It shows how the EU has developed into a special kind of security actor that, due to its level of political integration, has an important influence on national security approaches and identities. This new analysis applies a fresh combination of integration theory, security studies and studies of Europeanization. The main argument in this book is that, rather than adapting to the changing conditions created by the end of the Cold War, the Nordic states changed their security approaches in response to the European integration process. It shows how different phases in the post-Cold War European integration process have influenced the national security approaches of Sweden, Finland, Denmark and Norway. While all four security approaches seem to have been Europeanized, the speed and the character of these changes seem to vary due to a combination of differing ties to the EU and differing security policy traditions. This new book will be of great interest to all students of European Defence, national security and of security studies in general.

International Relations Theory and South Asia (OIP) E. Sridharan, 2014-11-13 Bringing together scholarship from several South Asian countries, this volume understands conflict resolution and cooperation building in the region. The essays cover three inter-related issues: security, political economy, domestic politics and the construction of identities and normative frameworks. They employ broader social science theorizing, particularly in relation to political economy, to go beyond conceptualizations based on international relations theory. The volume takes a fresh look at the inter-relationships between issues and their analyses and eschews stand-alone topics such as Kashmir, nuclear policies or regional cooperation. Combining theory with fieldwork, it provides diverse perspectives and arguments for a more nuanced picture of international relations in South Asia.
