Security Policy Reorientation In Peripheral Europe A Comparative Perspective Approach:

Security Policy Reorientation in Peripheral Europe Kjell Engelbrekt, 2019-09-18 This title was first published in 2002 This rich comparative analysis looks at security policy reorientation in four European states located at the periphery of the European continent During the post Cold War period Greece Bulgaria Sweden and Finland conducted a security policy that was heavily influenced by their close proximity to the iron curtain Probing this transition during a decisive phase of the post Cold War reconstitution of the wider European security order the author analyzes national security policy making from the standpoints of three international relations traditions realism institutionalism and political anthropology This engaging work is invaluable for students scholars and policy analysts working in the field of international relations and European politics

European Union and Strategy Kjell Engelbrekt, Jan Hallenberg, 2010-09-13 This edited volume sets out to explore the paradox that the European Union EU produces policies with strategic qualities but lacks the institutions and concepts to engage in strategic reasoning and action proper The book has a two fold agenda exploring current EU external policies that are or seem to be linked to strategic priorities and also studying the concept of strategy in the particular context of EU decision and policymaking The volume first examines the character of the Union as a strategic actor at this stage of its development It then explores the ability of the Union to act and otherwise influence both its periphery and the wider world focusing in particular on how it is perceived by other actors The final section comprises personal assessments by a group of contributors regarding the character of the union as a strategic actor in the present and future When these are pieced together a picture emerges of a European strategy in the making albeit one that so far is modest and partial This book will be of interest to students of European Security European Politics and IR *Studia diplomatica* ,2006 *American Book Publishing Record* ,2003

Old Europe, New Security Mary Troy Johnson, Janet Adamski, Cristina M. Schweiss, 2017-11-30 Many of the US criticisms of Western European reluctance to engage in the 2004 war in Iraq stem from a perception that these governments are weak on defence or unwilling to pull their own weight in the international system Secretary Rumsfeld pejoratively designated traditional Atlantic Alliance allies as Old Europe to distinguish them from the freshly minted cooperative states of New Europe In doing so Rumsfeld accused Old Europe of yet again relying on the United States to solve shared security problems This volume critically evaluates the validity of this view of Western European choices and policies Rather than a primary reliance on military force as first line defence it proposes that Western European governments are expanding the set of tools they have to apply to the post Cold War array of security and defence problems The volume examines the emergent European security approach from multiple perspectives in multiple institutions and identities and in different geographic contexts **Europe After the Cold War** Wojciech Kostecki, 1996 **Cross-Disciplinary Perspectives on Regional and**

Global Security Paweł Frankowski, Artur Gruszczyk, 2018-04-06 This book focuses on current key issues of international security from an actor centered approach The volume is divided into 3 sections the first part analyses an array of security issues in Europe the second one explores how those security issues play out in the Americas and the third focuses on Africa Each of the chapter authors outlines the relevant ideas interests and institutions The volume provides an overview of how global regional and national actors differ in their management approaches capacity levels and how these differences translate into cross regional cooperation on security issues Strategic Cultures in Europe Heiko Biehl, Bastian Giegerich, Alexandra Jonas, 2013-04-09 European countries work together in crisis management conflict prevention and many other aspects of security and defence policy Closer cooperation in this policy arena seems to be the only viable way forward to address contemporary security challenges Yet despite the repeated interaction fundamental assumptions about security and defence remain remarkably distinct across European nations This book offers a comparative analysis of the security and defence policies of all 27 EU member states and Turkey drawing on the concept of strategic culture in order to examine the chances and obstacles for closer security and defence cooperation across the continent Along the lines of a consistent analytical framework international experts provide case studies of the current security and defence policies in Europe as well as their historical and cultural roots **The Making of European Security Policy** Roberta Haar, Thomas Christiansen, Sabina Lange, Sophie Vanhoonacker, 2021 This volume addresses how and in what capacity the European Union and its member states are able to respond to fundamental shifts occurring in global politics and are able to remain relevant for the future The changing nature of the international system is subject to considerable contestation among scholars with many claiming that the fundamentals of the post war international system are being rewritten This volume brings together prominent scholars in the field of European security to address a range of pertinent issues related to Europe's role in the context of evolving global challenges The first section focuses on whether the EU is an actor with a strategic nature and the means to act on a global security strategy The second section considers the institutional dynamics and the approaches at the EU's disposal to fulfil its possible intended global roles The third section addresses Europe's most important strategic relationship the partnership it has with the United States This section considers the recalibration of the transatlantic relationship in light of the changing international system and the reorientation of U.S. foreign policy This book will be of much interest to students of European Union policy European Security policy European foreign policy and International Relations in general A Critical Approach to European Security Przemysław Grudziński, Peter van Ham, 1999 This work examines the key elements of Europe's dynamic security framework It analyzes how European institutions and their policies influence the security of the continent looking also at the broader political setting in particular how the development of a European identity might influence European security It aims to bring clarity into the often muddled discussion on European security and elucidates some of the concepts that are central to the current discourse on the topic *Europe Alone* David

Schultz,Aurelija Puraite,Vidmante Giedraityte,2022-09-28 Since the end of World War II and the breakup of the Soviet Union in 1991 the United States has taken the lead in maintaining European security through its membership in NATO However the economic and political positions of both the United States and Europe have changed in the last seventy five years leading many to wonder if America is still willing and able to provide for Europe s security needs especially at a time when the Russian Federation has become a more aggressive military and political player Europe Alone explores the prospects of European security in a future when the United States may no longer be a reliable partner Leading security scholars offer a multifaceted approach to the changing role and meaning of national security into the future They look at European security issues from the perspective of small states and seek to broaden the concept of security beyond traditional domestic policing or national defense

Europe and Global Security Bastian Giegerich,2017-10-03 In the twenty first century the European Union is confronted by myriad security problems that demand concerted action and cooperation As a negotiating power it seeks to persuade Iran to forswear a nuclear weapons programme As a crisis manager it seeks to contribute to global peace and stability through civilian and military operations Closer to home it is wrestling with questions about membership enlargement large scale migration and terrorist threats to the security of its populations and infrastructure European governments already under financial strain from ageing workforces and welfare systems face ever more difficult choices about budget cuts in security and defence after the near collapse of the global banking system Will it be possible to enhance cooperation between member states How can the EU complete its transition from a security actor with great potential to a player that credibly aligns available policy instruments and resources These and other issues about the very nature and identity of the Union are explored in this Adelphi From the need to establish its hard power credentials overcome its reluctance to demonstrate them against non compliant states and leverage its relationships with other great powers to attempts to break its dependence on Russian energy it is clear the EU has its work cut out But by affirming its commitment to multilateralism and defining a careful balance between closer cooperation and the national security concerns of EU member states this book suggests the European Union can build on its status as a global security power in the making

The European Security Strategy Sven Biscop,2016-12-05 In December 2003 the EU adopted the European Security Strategy the first ever common strategic vision of the Member States This volume examines how the Strategy can form the basis of a comprehensive approach that integrates all dimensions of EU external action from aid and trade to defence under the same agenda of effective multilateralism or global governance This agenda can be translated into the core public goods to which every individual on earth is entitled promoting access to these global public goods can be the essence of a distinctive European approach emphasizing long term stabilization and conflict prevention On that basis the Strategy can be a global agenda for positive power global because of its worldwide scope and comprehensive nature for an EU with effective power to achieve positive objectives The book will appeal to audiences interested in the EU as an international actor foreign

policy security and defence development and trade It is also suitable for policy makers in the EU institutions and the Member States

European Security in the Twenty-First Century Adrian Hyde-Price, 2007-02-12 Combining a sophisticated theoretical analysis with detailed empirical case studies this book provides an original view of the challenges and threats to a stable peace order in Europe The end of Cold War bipolarity has transformed Europe Using structural realist theory Adrian Hyde Price analyzes the new security agenda confronting Europe in the twenty first century Europe he argues is not primed for peace as mainstream thinking suggests rather it faces new security threats and the challenge of multipolarity This critical and original volume looks at European security after the Iraq War the failure of the EU constitution and the change of government in Germany Reflecting on the inherently competitive and tragic nature of international politics it concludes that realism provides the only firm foundations for an ethical foreign and security policy European Security in the Twenty First Century will appeal to students and scholars of international relations European politics and security studies **Shaping**

South East Europe's Security Community for the Twenty-First Century S. Cross, S. Kentera, R. Vukadinovic, R. Nation, 2013-05-07 In this book leading academics and policy practitioners develop approaches for managing critical contemporary and emerging security challenges for South East Europe They attempt to conceptualize and realize security as a cooperative endeavour for collective good in contrast to security narratives driven by power and national egotism
