Seed Money The Guggenheim Story:

Seed Money Milton Lomask, 1964-01-01 The Guggenheim Francesco Dal Co, 2017-01-01 The captivating tale of the plans and personalities behind one of New York City's most radical and recognizable buildings. Considered the crowning achievement of Frank Lloyd Wright, 1867-1959, the Solomon R. Guggenheim Museum in Manhattan is often called iconic. But it is in fact iconoclastic, standing in stark contrast to the surrounding metropolis and setting a new standard for the postwar art museum. Commissioned to design the building in 1943 by the museum's founding curator, Baroness Hilla von Rebay, Wright established residence in the Plaza Hotel in order to oversee the project. Over the next 17 years, Wright continuously clashed with his clients over the cost and the design, a conflict that extended to the city of New York and its cultural establishment. Against all odds, Wright held fast to his radical design concept of an inverted ziggurat and spiraling ramp built with a continuous beam, a shape recalling the form of an hourglass. Construction was only completed in 1959, six months after Wright's death. The building's initial critical response ultimately gave way to near universal admiration as it came to be seen as an architectural masterpiece. This essential text offering a behind-the-scenes story of the Guggenheim, along with a careful reading of its architecture, is beautifully illustrated with more than 150 images, including plans, drawings, and rare photographs of the building under construction.

The Flight of the Century Thomas Kessner, 2010-07-20 In late May 1927, an inexperienced and unassuming 25-year-old Air Mail pilot from rural Minnesota stunned the world by making the first non-stop transatlantic flight. A spectacular feat of individual daring and collective technological accomplishment, Charles Lindbergh's flight from New York to Paris ushered in the modern age of commercial aviation. In *The Flight of the Century*, Thomas Kessner takes a fresh look at one of America's greatest moments, explaining how what was essentially a publicity stunt became a turning point in history. Kessner vividly recreates the flight itself and the euphoric reaction to it on both sides of the Atlantic, and argues that Lindbergh's amazing feat occurred just when the world, still struggling with the disillusionment of WWI, desperately needed a hero to restore a sense of optimism and innocence. Kessner also shows how new forms of mass media made Lindbergh into the most famous international celebrity of his time, casting him in the role of a humble yet dashing American hero of rural origins and traditional values. Much has been made of Lindbergh's personal integrity and his refusal to cash in on his fame, but Kessner reveals that Lindbergh was closely allied with and managed by a group of powerful businessmen: Harry Guggenheim, Dwight Morrow, and Henry Breckenridge, chief among them, who sought to exploit aviation for mass transport and massive profits. Their efforts paid off as commercial air traffic soared from 6,000 passengers in 1926 to 173,000 passengers in 1929. Kessner's book is the first to fully explore Lindbergh's central role in promoting the airline industry, the rise of which has influenced everything from where we live to how we wage war and do business.

Flying the Beam Henry R. Lehrer, 2014 With air travel a regular part of daily life in North America we tend to take the infrastructure that makes it possible for granted However the systems regulations and technologies of civil aviation are in fact the product of decades of experimentation and political negotiation much of it connected to the development of the airmail as the first commercially sustainable use of airplanes From the lighted airways of the 1920s through the radio navigation system in place by the time of World War II this book explores the conceptualization and ultimate construction of the initial US airways systems The daring exploits of the earliest airmail pilots are well documented but the underlying story of just how brick and mortar construction radio research and improvement chart and map preparation and other less glamorous aspects of aviation contributed to the system we have today has been understudied Flying the Beam traces the development of aeronautical navigation of the US airmail airways from 1917 to 1941 Chronologically organized the book draws on period documents pilot memoirs and firsthand investigation of surviving material remains in the landscape to trace the development of the system The author shows how visual cross country navigation only possible in good weather was developed into all weather blind flying The daytime techniques of following

railroads and rivers were supplemented by a series of lighted beacons later replaced by radio towers crisscrossing the country to allow nighttime transit of long distance routes such as the one between New York and San Francisco Although today s airway system extends far beyond the continental US and is based on digital technologies the way pilots navigate from place to place basically uses the same infrastructure and procedures that were pioneered almost a century earlier While navigational electronics have changed greatly over the years actually flying the beam has changed very little *The Encyclopedia of the Industrial Revolution in World History* Kenneth E. Hendrickson III,2014-11-25 As editor Kenneth E Hendrickson III notes in his introduction Since the end of the nineteenth century industrialization has become a global phenomenon After the relative completion of the advanced industrial economies of the West after 1945 patterns of rapid economic change invaded societies beyond western Europe North America the Commonwealth and Japan In *The Encyclopedia of the Industrial Revolution in World History* contributors survey the Industrial Revolution as a world historical phenomenon rather than through the traditional lens of a development largely restricted to Western society *The Encyclopedia of the Industrial Revolution in World History* is a three volume work of over 1 000 entries on the rise and spread of the Industrial Revolution across the world Entries comprise accessible but scholarly explorations of topics from the aerospace industry to zaibatsu Contributor articles not only address topics of technology and technical innovation but emphasize the individual human and social experience of industrialization Entries include generous selections of biographical figures and human communities with articles on entrepreneurs working men and women families and organizations They also cover legal developments disasters and the environmental impact of the Industrial Revolution Each entry also includes cross references and a brief list of suggested readings to alert readers to more detailed information *The Encyclopedia of the Industrial Revolution in World History* includes over 300 illustrations as well as artfully selected extended quotations from key primary sources from Thomas Malthus *Essay on the Principal of Population* to Arthur Young s look at Birmingham England in 1791 This work is the perfect reference work for anyone conducting research in the areas of technology business economics and history on a world historical scale **A Review and Annotated Bibliography of Family Business Studies**
