beginning to end like an essay or just by dipping into it for information as needed Mapping the Cold War Timothy Barney,2015-04-13 In this fascinating history of Cold War cartography Timothy Barney considers maps as central to the articulation of ideological tensions between American national interests and international aspirations Barney argues that the borders scales projections and other conventions of maps prescribed and constrained the means by which foreign policy elites popular audiences and social activists navigated conflicts between North and South East and West Maps also influenced how identities were formed in a world both shrunk by advancing technologies and marked by expanding and shifting geopolitical alliances and fissures Pointing to the necessity of how politics and values were spatialized in recent U S history Barney argues that Cold War era maps themselves had rhetorical lives that began with their conception and production and played out in their circulation within foreign policy circles and popular media Reflecting on the ramifications of spatial power during the period Mapping the Cold War ultimately demonstrates that even in the twenty first century American visions of the world and the maps that account for them are inescapably rooted in the anxieties of that earlier era

Rhumb Lines and Map Wars Mark Monmonier,2010-11-15 In Rhumb Lines and Map Wars Mark Monmonier offers an insightful richly illustrated account of the controversies surrounding Flemish cartographer Gerard Mercator s legacy He takes us back to 1569 when Mercator announced a clever method of portraying the earth on a flat surface creating the first projection to take into account the earth s roundness As Monmonier shows mariners benefited most from Mercator s projection which allowed for easy navigation of the high seas with rhumb lines clear cut routes with a constant compass bearing for true direction But the projection s popularity among nineteenth century sailors led to its overuse often in inappropriate non navigational ways for wall maps world atlases and geopolitical propaganda Because it distorts the proportionate size of countries the Mercator map was criticized for inflating Europe and North America in a promotion of colonialism In 1974 German historian Arno Peters proffered his own map on which countries were ostensibly drawn in true proportion to one another In the ensuing map wars of the 1970s and 1980s these dueling projections vied for public support with varying degrees of success Widely acclaimed for his accessible intelligent books on maps and mapping Monmonier here examines the uses and limitations of one of cartography s most significant innovations With informed skepticism he offers insightful interpretations of why well intentioned clerics and development advocates rallied around the Peters projection which flagrantly distorted the shape of Third World nations why journalists covering the controversy ignored alternative world maps and other key issues and how a few postmodern writers defended the Peters worldview with a self serving overstatement of the power of maps Rhumb Lines and Map Wars is vintage Monmonier historically rich beautifully written and fully engaged with the issues of our time Mapping the End Times Dr Jason Dittmer,Dr Tristan Sturm,2012-11-28 Over the last quarter century evangelicalism has become an important social and political force in modern America Here new voices in the field are brought together with leading scholars such as William E Connolly Michael Barkun Simon Dalby and

Paul Boyer to produce a timely examination of the spatial dimensions of the movement offering useful and compelling insights on the intersection between politics and religion This comprehensive study discusses evangelicalism in its different forms from the moderates to the would be theocrats who in anticipation of the Rapture seek to impose their interpretations of the Bible upon American foreign policy The result is a unique appraisal of the movement and its geopolitical visions and the wider impact of these on America and the world at large

Maxwell Street Tim Cresswell, 2019-03-22 What is the nature of place and how does one undertake to write about it To answer these questions geographer and poet Tim

Cresswell looks to Chicago's iconic Maxwell Street Market area. Maxwell Street was for decades a place where people from all corners of the city mingled to buy and sell goods, play and listen to the blues, and encounter new foods and cultures. Now redeveloped and renamed University Village, it could hardly be more different. In *Maxwell Street*, Cresswell advocates approaching the study of place as an assemblage of things, meanings, and practices. He models this innovative approach through a montage format that exposes the different types of texts: primary, secondary, and photographic sources that have attempted to capture the essence of the area. Cresswell studies his historical sources just as he explores the different elements of Maxwell Street, exposing them layer by layer. Brilliantly interweaving words and images, *Maxwell Street* sheds light on a historic Chicago neighborhood and offers a new model for how to write about place that will interest anyone in the fields of geography, urban studies, or cultural history.
