Change Your Life in 30 Days Rhonda Britten, 2005-02-01 Rhonda Britten, Life Coach on NBC's hit show *Starting Over* guides readers on a 30-day step-by-step journey to help define goals and make extraordinary life changes in their lives using practical insights, exercises, and inspiring wisdom. For those who want to make a major life change but have been too locked in fear to start, the answers lie within this book.

The Metaphysics of Self-realisation and Freedom Colin Tyler, 2017-03-22 This first part of Colin Tyler's new critical assessment of the social and political thought of T. H. Green (1836-1882) explores the grounding that Green gives to liberal socialism. Tyler shows how for Green, ultimately, personal self-realisation and freedom stem from the innate human drive to construct a bedrock of fundamental values and commitments that can define and give direction to the individual's most valuable potentials and talents. This book is not only a significant contribution to British idealist scholarship; it highlights also the enduring philosophical and ethical resources of a social democratic tradition that remains one of the world's most important social and political movements and not least across Britain, Europe, North America, India, and Australia. Dr Colin Tyler is Reader in Politics at the University of Hull and joint convenor of the Centre for British Idealism.

Mind John R. Searle, 2004-11-01 The philosophy of mind is unique among contemporary philosophical subjects, writes John Searle, in that all of the most famous and influential theories are false. One of the world's most eminent thinkers, Searle dismantles these theories as he presents a vividly written, comprehensive introduction to the mind. He begins with a look at the twelve problems of philosophy of mind, which he calls *Descartes and Other Disasters*, problems which he returns to throughout the volume as he illuminates such topics as materialism, consciousness, the mind-body problem, intentionality, mental causation, free will, and the self. The book offers a refreshingly direct and engaging introduction to one of the most intriguing areas of philosophy.

The Cinema of Eric Rohmer Jacob Leigh, 2012-05-03 Since the death of the French film director Eric Rohmer in 2010, interest in his work has reignited. Known as the last of the established directors in the French New Wave, Rohmer took complete control over all his films, acting as his own producer throughout his career and writing the scripts. He also made his mark by taking the lead in casting and location scouting, as French seaside resorts with beautiful young people are some of the elements present in most of his films. Combining history and criticism, Jacob Leigh pens the first chronological survey of this understudied filmmaker in

order to give readers clear insights into how Rohmer's films came about and what he intended them to be. The book provides in depth analysis of the themes and ideas of Rohmer's twenty three feature films and illustrates the complexity of their cinematic style. Leigh's study is the perfect introduction to the work of this great filmmaker for both students and the general reader.

Environment and Society Erika Cudworth, 2005-08-04 At the start of the twenty first century it can be argued that human societies have a greater impact on the environment than ever before. We have always been dependent upon and interacted with the natural environment. However the dramatic social changes of the past three centuries have altered the form of our relationship with non human nature to the extent that some would see people planet relations as in a situation of crisis. *Environment and Society* provides a comprehensive and critical account of the ways in which we can think about the relationship between human societies and the environments with which they interact. It argues that human societies are ecologically embedded and that environments are often socially embedded and constituted. It makes the different theoretical positions and empirical studies accessible to students and includes chapter outlines and summaries annotated further reading boxed case studies and discussion points.

Environmentalism and Cultural Theory Kay Milton, 2002-09-11 The last decade has seen a dramatic increase in the attention paid by social scientists to environmental issues and a gradual acknowledgement in the wider community of the role of social science in the public debate on sustainability. At the same time the concept of culture once the property of anthropologists has gained wide currency among social scientists. These trends have taken place against a growing perception among specialist and public of the global nature of contemporary issues. This book shows how an understanding of culture can throw light on the way environmental issues are perceived and interpreted both by local communities and within the contemporary global arena. Taking an anthropological approach the book examines the relationship between human culture and human ecology and considers how a cultural approach to the study of environmental issues differs from other established approaches in social science. This book adds significantly to our understanding of environmentalism as a contemporary phenomenon by demonstrating the distinctive contribution of social and cultural anthropology to the environmental debate. It will be of particular interest to students and researchers in the fields of social science and the environment.
