Seeing Through The Dark Blind And Sighted A Vision Shared:

Everybody Belongs Arthur Shapiro, 2003-09-01 The evil prosthesis of Captain Hook the comical speech of Porky Pig and the bumbling antics of Mr Magoo are all examples of images in our culture which can become the basis of negative attitudes and subliminal prejudice towards persons with disabilities These attitudes influence and underlie discriminatory acts resulting in negative treatment and segregation A teacher's ability to recognize and counter such images may well determine the success of inclusion and mainstreaming programs in our schools and society Well researched and well written this book offers practical guidance as grounded in solid research to schools that are wrestling with how to mainstream children with disabilities

Day Brought Back My Night Stephen Charles Ainlay, 2024-05-10 Originally published in 1989 Day Brought Back My Night explores the lives of people who have lost sight in late life as a result of age related visual disorders As life expectancy in western society has increased the number of people who fall into this group has grown yet little had been written on this plight This major study filled the gap in the literature and will still be of great value to practitioners scholars and students in the fields of social gerontology medicine social work and nursing Stephen Ainlay surveys the various etiologies of age related visual disorders and establishes the medical framework of the problem His primary concern however is to understand people's experience of vision loss and he makes use of extensive interview data to establish the ways in which people come to terms with their own aging The stories told here reflect people's responses to a changing body as well as shifting relationships with friends family members medical practitioners and service providers They reveal hopes and fears lost priorities and new initiatives relationships that recede and relationships that are newly established Above all they comment on the drama that is involved in people's struggle to find continuity in their lives In this way the book is as much an exploration into the problem of identity as it is a study of sensory loss in later life

Libre Acceso Susan Antebi, Beth E. Jørgensen, 2015-12-02 Libre Acceso stages an innovative encounter between disciplines that have remained quite separate Latin American literary film and cultural studies and disability studies It offers a much needed framework to engage the representation construction embodiment and contestation of human differences and provides tools for the urgent resignification of a robust and diverse Latin American literary and filmic tradition The contributors discuss such topics as impairment trauma illness and the body performance queer theory subaltern studies and human rights while analyzing literature and film from Argentina Brazil Chile Colombia Cuba Mexico and Peru They explore these issues through the work of canonical figures Jorge Luis Borges Gabriel García Márquez João Guimarães Rosa and others as well as less well known figures including Mario Bellatin and Miriam Alves

Body Genre David Scott Diffrient, 2023-11-27 In this groundbreaking work author David Scott Diffrient explores largely understudied facets of cinematic horror from the various odors permeating

classic and contemporary films to the wetness sliminess and stickiness of these productions which he argues practically scream out for a tactile mode of textural analysis as much as they call for more traditional forms of textual analysis Dating back to Carol Clover's and Linda Williams's pioneering work on horror cinema film scholars have long conceptualized this once disreputable category of cultural production as a body genre However despite the growing recognition that horror serves important biological and social functions in our lives scholars have only scratched the surface of this genre with regard to its affective corporeal and sensorial appeals Diffrient anatomizes horror films in much the same way that a mad scientist might handle the body separating and recombining constitutive parts into a new analytical whole Further he challenges the tendency of scholars to privilege human over nonhuman beings and calls into question ableist assumptions about the centrality to horror films of sight and sound to the near exclusion of other forms of sense experience In addition to examining the role that animals living or dead real or fake play in human centered fictions this volume asks what it means for audiences to consume motion pictures in which actors stunt performers and other creative personnel have put their own bodies and lives at risk for our amusement Historically grounded and theoretically expansive *Body Genre Anatomy of the Horror Film* moves the study of cinematic horror into previously uncharted waters and breathes life into a subject that not coincidentally is intimately connected to breathing as our most cherished dividing line between life and death
