Unfinished gesture Cecilia Almeida Salles,2019-01-08

The book presents a discussion about the process of artistic creation in the diversity of its manifestations visual arts literature theater cinema etc The proposed reflections are supported by research dedicated to the study of these creative paths from the documents left by the artists such as diaries notes sketches drafts mock ups projects scripts and contacts Dialogues were established between the observation of recurrent aspects in a great diversity of processes and the thought of Charles S Peirce generating a possible theory of creation First the Unfinished Gesture discusses the aesthetics of the creative movement from a semiotic perspective In this theoretical context creation is described as a fallible process with tendencies supported by the logic of uncertainty encompassing the intervention of chance and opening space for the introduction of new ideas A continuous course in which you can not determine either a starting point or an end point These uncertain and indeterminate tendencies direct the artist in his search for the construction of works that satisfy his great poetic project which is also strongly influenced by communicative issues The search of the artist finds its possible concreteness in complex processes of constructions of works In a second moment the creative path is focused from five points of view as transforming action translation movement knowledge process construction of artistic truths and experimentation course In the Epilogue are presented the concepts of Peircean semiotics which base the reflections on the artistic creation developed throughout the book The Unfinished Gesture aims to offer a critical approach to the arts from the point of view of its production processes

The Nature of Space Milton Santos,2021-07-21

In The Nature of Space pioneering Afro Brazilian geographer Milton Santos attends to globalization writ large and how local and global orders intersect in the construction of space Santos offers a theory of human space based on relationships between time and ontology He argues that when geographers consider the inseparability of time and space they can then transcend fragmented realities and partial truths without trying to theorize their way around them Based on these premises Santos examines the role of space which he defines as indissoluble systems of objects and systems of actions in social processes while providing a geographic contribution to the production of a critical social theory
