Schachter,Lisa Francesca Andermann,2008 In the last 5 years approximately 2 7 million people have been treated for epilepsy and between 0 5% 2% of people will develop epilepsy during their lifetime Up to 5% of the worldwide population may have a single seizure in their lifetime It is further estimated that 60 million people in the World have had at least one epileptic seizure in their lifetime Most shockingly is that between 70 80K people each year in the US alone are diagnosed with epilepsy Because of these figures and Dr Schachter s roll as Director of the Comprehensive Epilepsy Center Dr Schachter sought to create a series of books written from the viewpoint of people with Epilepsy This volume Epilepsy in Our World presents accounts of seizures by patients from 20 different countries Not only are the patient stories presented with the series signature frankness and honesty but the volume also discusses the different impressions and treatment of epilepsy around the world [The Unpredictable](#) Richard Davis,2013-01-24 The purpose of The Unpredictable is to share personal and biographical stories and illustrations from my own experiences as well as others whose lives have been impacted by

epilepsy or disorders Through the written word and the stroke of a brush the old saying A picture paints a thousand words accurately portrays the special people that have been highlighted in the pages of this book At the completion of this book my thoughts went back to what inspired me to write and paint about seizures and living with epilepsy It was my desire to make a living as an artist and settle down in a country home with my family living the life of an artist with a canvas and brush However I have learned through the years that our plans are often contrary to what God has in store for us Living with epilepsy has brought challenges and storms in life that have changed the course and direction of my life In this book the experiences of life with art and epilepsy are put into paintings that I have visualized from this disease My desire is to educate those unfamiliar with epilepsy encourage the ones living with this disease comfort the loved ones who support and assist those living with seizures and open the eyes of doctors who are educated about seizures but have never experienced the challenges faced in living with a seizure disorder

Seized Holly Eckert,2024-01-30 About the Book Millions of Americans have epilepsy At age 34 Holly Eckert joined them From the day she discovered that through many years her life became a journey of personal growth and self discovery Why was this happening What should she do Who was she now that she seized These were only a few of the questions she asked herself in the face of her new reality Holly s walk with chronic illness became one of awakening and healing In it she learned many lessons in life while confronting the flaws failures ignorance and corruption permeating the American medical industry and sensing first hand the resiliency of the human mind and body Daily tending to the chores of chronic illness she scoffed at the paradox between the medical industry s responses and her own life s experiences Over time Holly realized that illness can play important positive roles in a human life Traveling her path where health and illness intertwine it became clear to her that illness can give as much as it takes away This convinced her that when allowed the time and space to be ill a person can find true health again a real life phenomenon rarely discussed by doctors and patients In Seized Searching for Health In the United States Holly tells the story of her journey with illness That well told personal tale provides a lens through which a reader can explore the common experience of searching for health in the United States Who would have imagined that it would be a dance artist who does so well exploring the many dimensions of illness and the failures of the United States healthcare system but that s precisely what happens here in Seized About the Author Holly Eckert grew up in a small town in the mountains of Idaho where she learned to dance from a former ballerina with the New York Ballet who also lived there After high school she took her scholarships and went to The Evergreen State College There she combined dance and social sciences to create her own integrated studies program Her education prepared her to go to Seattle and pursue her artistic mission of exploring substantive topics inside the art of dance Winning awards and praise for her artwork Holly pursued her passion with passion and made choreography about things like the experience of fear and the injustices of the US prison system She was healthy and strong into her mid thirties when one day she suddenly began seizing uncontrollably Epilepsy quickly overwhelmed her life It sent Holly on a diverse personal journey On her travels she discovered many new things about herself and as she did she learned more and more about the potentials for healing that exist inside the human body She also learned a great deal about the tragic failures of the United States medical system that often inhibits these possibilities from being realized Knowing that she liked to write as well as dance Holly decided to tell this story through words not movements Her readers continually give her praise for her efforts

Schachter,2020 To an Outside Observer Psychogenic Non Epileptic Seizures PNES can look like epileptic seizures However unlike epileptic seizures they are not caused by abnormal electrical discharges in the brain Instead most PNES are an automatic psychological and physiological response to an internal or external trigger perceived as threatening by the individual whether consciously or not Not least because the changes in the brain that underpin PNES cannot be visualized easily with clinical tests there are many

uncertainties and controversies surrounding the condition and patients often provoke a mixture of emotions in healthcare professionals. While some patients have positive care experiences, many are left feeling confused, angry, and abandoned by the clinicians they have encountered. *Non Epileptic Seizures in Our Experience* presents the perspectives of over 90 members of different healthcare professions from around the world. By allowing readers to gain fascinating insights into a broad range of their thoughts and feelings about PNES, this book challenges negative attitudes surrounding the condition and helps to improve understanding between members of different professional groups as well as between professionals and patients. In doing so, it should ultimately advance the quality of care provided for those with PNES.
