**Select Methods in Chemical Analysis (chiefly Inorganic)** William Crookes, 1905      **Selection of the HPLC Method in Chemical Analysis** Serban C. Moldoveanu, Victor David, 2016-11-01 *Selection of the HPLC Method in Chemical Analysis* serves as a practical guide to users of high performance liquid chromatography and provides criteria for method selection, development, and validation. High performance liquid chromatography (HPLC) is the most common analytical technique currently practiced in chemistry. However, the process of finding the appropriate information for a particular analytical project requires significant effort and pre-existent knowledge in the field. Further sorting through the wealth of published data and literature takes both time and effort away from the critical aspects of HPLC method selection. For the first time, a systematic approach for sorting through the available information and reviewing critically the up-to-date progress in HPLC for selecting a specific analysis is available in a single book. *Selection of the HPLC Method in Chemical Analysis* is an inclusive go-to reference for HPLC method selection, development, and validation. It addresses the various aspects of practice and instrumentation needed to obtain reliable HPLC analysis results. It leads researchers to the best choice of an HPLC method from the overabundance of information.
