Shadow Globalization Ethnic Conflicts And New Wars A Political Economy Of Intra State War:

Shadow Globalization, Ethnic Conflicts and New Wars Dietrich Jung, 2002-12-26 Focusing on the political economy of so called new wars this book presents a series of studies that analyse the complexities of current warfare by moving from the global sphere to local spots of organised violence It thus raises questions about the very idea of intra state wars and shows that these wars are inseparably linked to the global economy

Nationalism and Intra-State Conflicts in the Postcolonial World Fonkem Achankeng, 2015-09-28 This book highlights the complexities of nationalism and the struggles of different groups left unaddressed within the nation states of a postcolonial world The central question is what happened to the worldly and radical visions of freedom liberty and equality that animated intellectual activists and policy makers from Woodrow Wilson in the 1920s This book analyzes the outcome of lumping disparate groups of people together under one nation state and holding them together against the knowledge of the incompatibility theory of plural states In a world of arbitrarily and colonially mapped sovereign states groups and nations with distinctive histories and cultures trapped within the borders of sovereign states want the freedom to decide their own destinies This book challenges deconstructs and decolonizes Western epistemologies related to postcolonial state formation and maintenance In examining the freedom concept that no human group ought to be determining the independence of other human groups this book constructs an alternative conceptualization of nations and peoples rights in the twenty first century in which radical hopes and global dreams are recognized as central to internal nationalism struggles

War Economies in a Regional Context Michael Charles Pugh, Neil Cooper, Jonathan Goodhand, 2004 This book emphasizes the role of economic factors in the conditions that lead to state collapse give rise to and sustain conflict and complicate peacebuilding The book argues that existing state level focus tends to ignore the role of regional linkages in permitting and sustaining conflict and as obstacles to transformation Furthermore that the focus on the dynamics of conflict in states of the developing world tends to artificially distance the outside predominantly Western world from their genesis and evolution taken from introduction

Political Authority in Burma's Ethnic Minority States Mary Patricia Callahan, 2007 This study examines the enormous variation and complexity that characterize relationships between the national state and locally based often non state actors who negotiate and compete for political authority in Burma's ethnic minority dominated states along the borders Three patterns of relationships are explored devolution by the national state to warlord like local authorities occupation by the Burmese military and coexistence with varying degrees of cooperation and understanding among actors from the national state and local stakeholders Throughout these border states leaders of the Burmese government's armed forces and of past and currently active armed opposition forces operate within a context that is neither war nor peace but instead a kind of post civil war not quite peace environment To understand the complex political arrangements that have arisen in this environment this monograph employs the concept of emerging political complex a set of adaptive networks that link state and other political

authorities to domestic and foreign business concerns some legal others illegal traditional indigenous leaders religious authorities overseas refugee and diaspora communities political party leaders and nongovernmental organizations All of these players make rules extract resources provide protection and try to order a moral universe but none of them are able or even inclined to trump the others for monolithic national supremacy Conflict resolution strategies have to recognize that these emerging political complexes are not simply unfortunate bumps in the road to peace but instead constitute intricate and evolving social systems that may continue to be adapted and sustained

A Crisis of Global Institutions? Edward Newman, 2007-08-07 The legitimacy of global institutions which address security challenges is in question The manner in which they make decisions and the interests they reflect often falls short of twenty first century expectations and norms of good governance Also their performance has raised doubts about their ability to address contemporary challenges such as civil wars weapons of mass destruction terrorism and the use of military force in international politics Addressing topical issues such as the war against Iraq in 2003 and terrorism and presenting provocative arguments **A Crisis of Global Institutions** explores the sources of the challenge to multilateralism including US pre eminence the changing nature of international security and normative concerns about the way decisions are taken in international organizations Edward Newman argues that whilst some such challenges are a sign of crisis many others are representative of normality and continuity in international relations Nevertheless it is essential to consider how multilateralism might be more viably constituted to cope with contemporary and future demands

Globalisation and Local Conflicts in Africa and Asia Yukiko Nishikawa, 2022-03-21 This edited book is written by six authors from Asia and Africa The individual authors focus on their own country s case or cases that they have been working on The book features local conflicts in six countries in Asia and Africa and identifies how the local conflicts are affected by the forces of globalization Cases include Nigeria s oil related conflicts the Democratic Republic of Congo s timber conflicts continuing instability in Mozambique Thailand s conflict with regard to AIDS medicine Myanmar s local conflicts after its reforms and the Afghanistan s conflicts over minerals From these diverse case studies the book examines how globalization and international politics affect local politics and conflicts and vice versa Even seemingly internal conflicts are shown to be significantly influenced by globalization forces and to create new dynamism in local politics While there are other books that explore globalization and conflicts many of them are conceptually organized with a small number of case studies The present volume examines local conflicts in relation to globalization and demonstrates how structural inequality vis a vis weak stateness and statehood are significantly affected by global political economy

The Sociology of War and Violence Siniša Malešević, 2010-06-10 War is a highly complex and dynamic form of social conflict This book demonstrates the importance of using sociological tools to understand the changing character of war and organised violence The author offers an original analysis of the historical and contemporary impact that coercion and warfare have on the transformation of social life and vice versa Although war and violence were decisive components in the

formation of modernity most analyses tend to shy away from the sociological study of the gory origins of contemporary social life In contrast this book brings the study of organised violence to the fore by providing a wide ranging sociological analysis that links classical and contemporary theories with specific historical and geographical contexts Topics covered include violence before modernity warfare in the modern age nationalism and war war propaganda battlefield solidarity war and social stratification gender and organised violence and the new wars debate

Foreign Intervention, Warfare and Civil Wars Adam Lockyer, 2017-09-01 This book examines the impact of foreign intervention in the course and nature of warfare in civil wars Throughout history foreign intervention in civil wars has been the rule rather than the exception The involvement of outside powers can have a dramatic impact on the course and nature of internal conflicts Despite this there has been little research which has sought to explain how foreign intervention influences the course of civil wars This book seeks to rectify this gap It examines the impact of foreign intervention on the warfare that characterises civil wars through by studying the cases of the Angolan and Afghan civil wars It investigates how foreign resources affect the military power of the recipient belligerent and examines how changes in the balance of capabilities influence the form of warfare that characterises a civil war Warfare in civil wars is often highly fluid with belligerents adapting their respective strategies in response to shifts in the balance of military capabilities This book shows how the intervention of foreign powers can manipulate the balance of capabilities between the civil war belligerents and change the dominant form of warfare The findings presented in this book offer key insights for policy makers to navigate the increasing internationalization of civil wars around the globe This book will be of much interest to students of civil wars intra state conflict war and conflict studies and security studies

Criminology and War Sandra Walklate, Ross McGarry, 2015-03-24 It is widely observed that the study of war has been paid limited attention within criminology This is intellectually curious given that acts of war have occurred persistently throughout history and perpetuate criminal acts victimisation and human rights violations on a scale unprecedented with domestic levels of crime However there are authoritative voices within criminology who have been studying war from the borders of the discipline This book contains a selection of criminological authors who have been authoritatively engaged in studying criminology and war Following an introduction that places war within criminology the collection is arranged across three themed sections including Theorising War Law and Crime Linking War and Criminal Justice and War Sexual Violence and Visual Trauma Each chapter takes substantive topics within criminology and victimology i e corporate crime history imprisonment criminal justice sexual violence trauma security and crime control to name but a few and invites the reader to engage in critical discussions relating to wars both past and present The chapters within this collection are theoretically rich empirically diverse and come together to create the first authoritative published collection of original essays specifically dedicated to criminology and war Students and researchers alike interested in war critical criminology and victimology will find this an accessible study companion that centres the disparate criminological attention to war into one comprehensive

Investment and Human Rights in Armed Conflict Daria Davitti, 2019-05-30 This book analyses the way in which international human rights law IHRL and international investment law IIL are deployed or fail to be deployed in conflict countries within the context of natural resources extraction It specifically analyses the way in which IIL protections impact on the parallel protection of economic social and cultural rights ESC rights in the host state especially the right to water Arguing that current responses have been unsatisfactory it considers the emergence of the Protect Respect and Remedy framework and the Guiding Principles for Business and Human Rights jointly the Framework as a possible analytical instrument In so doing it proposes a different approach to the way in

which the Framework is generally interpreted and then investigates the possible applicability of this recalibrated Framework to the study of the IHRL IIL interplay in a host country in a protracted armed conflict Afghanistan Through the emblematic example of Afghanistan the book presents a practical dimension to its legal analysis It uniquely portrays the elusive intersection between these two bodies of international law within a host country where the armed conflict continues to rage and a full economic restructuring is taking place away from the public eye not least through the deployment of IIL and the inaction or merely partial consideration of IHRL The book will be of interest to academics policy makers and practitioners of international organisations involved in IHRL IIL and or deployed in contexts of armed conflict **Armed Groups** Peter G.

Thompson,2014-08-14 In this age of asymmetric warfare battles are fought more and more against armed groups of opponents such as terrorists insurgents or transnational criminal organizations This text is the first to categorize armed groups and analyze their characteristics in a systematic way to provide a thorough overview of all types of armed groups and the role they play in today s security environment Drawing on international case studies and histories the work analyzes the objectives strategies and internal composition of armed groups and the environments that foster them It demonstrates that armed groups often behave in an hybrid fashion be it the criminal actions terrorists groups take to fund their goals or the role terrorist actions play in criminal organizations As such dividing lines blur governments need to figure out how where and when these armed groups are operating in zones of conflict or peace as well as their motivations structures and ultimate objectives This thorough and groundbreaking study will provide students with a strategic view of who armed groups are how to analyze them and what geopolitical and geostrategic factors influence their origins and operations **Informal**

Economies and Power Anna Danielsson,2018-10-26 The global ubiquity of informal economic activities has turned informality into a key policy question not least in international peace and state building This book explores a core aspect of economic informality its resilience despite comprehensive international anti informality operations Using Kosovo as an illustrative case Danielsson suggests that to understand the resilience of informality two distinct areas of practice need to be studied in conjunction rather than separately The first concerns the professional practices enacted by international organisations in their attempts to formalise the informal economy in Kosovo The second area of practice concerns the everyday informal economic practices of social agents in Kosovo To study these areas of practice at their junction Danielsson uses Pierre Bourdieu s concept of symbolic power and argues that in post conflict Kosovo the distinct practices have become interwoven and co constitutive of a novel ordering and meaning of informality The resilience of the informal thus plays out through while undermining and reinforcing the need of the international anti informality operations Including scholarship from global governance global political economy and social theory this book s original perspective on informal economies and power will appeal to scholars and professionals located in peace studies development studies and the field of international relations **Fragile States** Lothar Brock,Hans-Henrik Holm,Georg Sorenson,Michael Stohl,2013-05-08 Today a billion

people including about 340 million of the world's extreme poor are estimated to live in fragile states. This group of low income countries are often trapped in cycles of conflict and poverty which make them acutely vulnerable to a range of shocks and crises. This engaging book defines and clarifies what we mean by fragile states, examining their characteristics in relation to weak and failed states in the global system and explaining their development from pre-colonial times to the present day. It explores the connections between fragile statehood and violent conflict and analyses the limitations of outside intervention from international society. The complexities surrounding successes such as Costa Rica and Botswana, countries which ought to be fragile but which are not, are analysed alongside the more precarious cases of the Democratic Republic of the Congo, Afghanistan and Haiti. Absorbing and authoritative, *Fragile States* will be an invaluable resource for students and scholars of international relations, security studies and development.

Schooling and the Politics of Disaster Kenneth J.

Saltman, 2010-06-10. *Schooling and the Politics of Disaster* is the first volume to address how disaster is being used for a radical social and economic reengineering of education. From the natural disasters of the Asian tsunami and the hurricanes in the Gulf Coast to the human-made disasters in Iraq, Afghanistan, Haiti, Sudan, Indonesia, the United States and around the globe, disaster is increasingly shaping policy and politics. This groundbreaking collection explores how education policy is being reshaped by disaster politics. Noted scholars in education and sociology tackle issues as far ranging as 'No Child Left Behind', the War on Terror, Hurricane Katrina, the making of educational funding crises in the US and the Iraq War to bring to light a disturbing new phenomenon in educational policy.

Post-Conflict Studies Chip Gagnon, Keith Brown, 2014-07-11

This book examines how the violence of conflict is transformed in the post-conflict period. Post-conflict studies seek to illuminate, theorise and narrate the processes by which societies transition from periods of overt and violent conflict to periods of relative stability and peace. Most of the research carried out on post-conflict societies has taken place within disciplinary bounds. In contrast, this volume breaches those boundaries; though each author is grounded in a particular discipline, the chapters have been written in a spirit of interdisciplinarity. The focus of the volume is how the violence of conflict is transformed in the post-conflict period into processes that the editors have categorised as criminalisation, medicalisation and missionisation. Comprised of essays written by a diverse group of scholars and activists from anthropology, political science, international relations, law, education, religion and military history, each section of the book looks at the concept of post-conflict in a way that problematises its common usage and highlights the importance of strongly interdisciplinary research into post-conflict societies. This book will be of interest to students of war and conflict studies, peace studies, security studies and IR in general.
