Lambert, 2011 Mariners made a major but neglected contribution to England s warfare in the middle ages Here their role is examined anew showing their importance During the fourteenth century England was scarred by famine plague and warfare Through such disasters however emerged great feats of human endurance Not only did the English population recover from starvation and disease but thousands of the kingdom s subjects went on to defeat the Scots and the French in several notable battles Victories such as Halidon Hill Neville s Cross Cr cy and Poitiers not only helped to recover the pride of the English chivalrous class but also secured the reputation of Edward III and the Black Prince Yet what has been underemphasized in this historical narrative is the role played by men of more humble origins none more so than the

medieval mariner This is unfortunate because during the fourteenth century the manpower and ships provided by the English merchant fleet underpinned every military expedition The aim of this book is to address this gap Its fresh approach to the sources allows the enormous contribution of the English merchant fleet to the wars conducted by Edward II and Edward III to be revealed the author also explores the complex administrative process of raising a fleet and provides career profiles for many mariners examining the familial relationships that existed in port communities and the shipping resources of English ports Craig L Lambert is Research Assistant at the University of Hull

The Mobilities of Ships Anyaa Anim-Addo, William Hasty, Kimberley Peters, 2017-10-02 We live in a world that is ever on the move as is increasingly recognised within research on mobilities Yet studies of mobility have failed to go to sea with the same enthusiasm as mobilities ashore When we consider mobility we most often examine those movements that evidently form part of our everyday lives We forget to look outwards to the sea Yet ships have played and continue to play a significant role in shaping socio cultural political and economic life This book turns our attention to the manifold mobilities that occur at sea through an exploration of the mobilities of ships themselves as well as the movements of objects subjects and ideas that are mobilised by ships The Mobilities of Ships brings together seven chapters that tack through unexplored waters and move between diverse case studies including pirate ships naval vessels and luxury yachts In so doing The Mobilities of Ships offers a rich insight into the world of shipping mobilities past and present This book was published as a special issue of Mobilities

High Speed Catamarans and Multihulls Liang Yun, Alan Bliault, Huan Zong Rong, 2018-10-29 High speed catamaran and multihull high speed marine vessel have become very popular in the last two decades The catamaran has become the vessel of choice for the majority of high speed ferry operators worldwide There have been significant advances in structural materials and structural design has been combined with higher power density and fuel efficient engines to deliver ferries of increasing size The multihull has proven itself to be a suitable configuration for active power projection across oceans as well as for coastal patrol and protection operating at high speed for insertion or retrieval with a low energy capability At present there is no easily accessible material covering the combination of hydrodynamics aerodynamics and design issues including structures powering and propulsion for these vehicles Coverage in High Speed Catamarans and Multihulls includes an introduction to the history evolution and development of catamarans followed by a theoretical calculation of wave resistance in shallow and deep water as well as the drag components of the multihull A discussion of vessel concept design describing design characteristics empirical regression for determination of principal dimensions in preliminary design general arrangement and methods is also included The book concludes with a discussion of experimental future vehicles currently in development including the small waterplane twin hull vessels wave piercing catamarans planing catamarans tunnel planing catamarans and other multihull vessels

Water Worlds: Human Geographies of the Ocean Kimberley Peters, 2016-02-11 Our world is a water world Seventy percent of our planet consists of ocean However geography has traditionally overlooked this vital component

of the earth's composition. The word geography directly translates as earth writing and in line with this definition the discipline has preoccupied itself with the study of terrestrial spaces of society and nature. This book challenges human geography's preoccupation with the terrestrial, investigating the terra incognita of the seas and oceans. Linking to new theoretical debates shaping the geographic discipline such as affect, assemblage, emotion, hybridity and the more than human, this volume unlocks new knowledge concerning the human geographies of ocean space. The book casts adrift stable, bounded and fixed conceptions of space and advances geographical understanding based on the world as becoming, changing, mobile and processional. This ontology supports the notion that the oceans are not simply fluid in a literal way but also in a conceptual sense, suggesting that the seas have their own fluid natures, their own capacities and agencies which are co-fabricated with social and cultural life. This book features twelve chapters authored by key academics contributing to this growing field of research. The book is divided into three sections including an Introduction by the editors and a foreword by Prof Philip E Steinberg, the leading scholar in the field of maritime geographies. The first section of the book considers the ways in which different watery spaces, from the Atlantic Ocean to the Mediterranean Sea, have been conceptualized, theorized and known through metaphors, voyages of discovery and scientific endeavour. The second section examines how oceans are experienced through various activities, including driving on water, kayaking in water and diving under water. The final section explores the relations between human life and the nature of the sea as a material, mobile and more than human space.

Hms Centurion 1733-1769: an Historic Biographical-Travelogue of One of Britain's Most Famous Warships and the Capture of the Nuestra Senora De Covadonga Treasure Galleon. Shirley Fish, 2015-07-27. When the Centurion and a squadron of six vessels and 1,959 men and boys set out from England in 1740 on a round the world expedition, they were unaware of the terrifying events that awaited them in the days ahead. The squadron, under the command of Commodore George Anson, had departed from England with every hope of a successful mission to harass and take prizes in the Spanish possessions of the Americas and in Asia. The journey proved more challenging than anticipated and at times it seemed nightmarish and beyond anything experienced by the crew. The ship survived two huge waves and a lightning strike. Then there was the great loss of life amongst the crew who perished due to the devastating symptoms of scurvy. Despite these setbacks, there were moments of pure joy, especially when the Centurion captured the fabulously wealthy Manila Acapulco Galleon in the Philippines, the Nuestra Senora de Covadonga. Throughout the Centurion's career as a royal naval warship in the eighteenth century, she played a role in the capture of Quebec during the French and Indian War and the invasion of Havana in the Seven Years War. She was also instrumental when dealing with the Barbary Corsairs of Algeria and Morocco. Amongst the famous men who sailed on this vessel were John Harrison, the inventor of the first maritime sea clock, and Joshua Reynolds, the celebrated portrait painter. The details of the journeys to the Americas, Asia and Europe are described in this biographical travelogue of the Centurion.

Creating Shapes in Civil and Naval Architecture Horst Nowacki, Wolfgang Lefèvre, 2009. The design

construction and verification of complex two and three dimensional shapes in architecture and ship geometry have always been a particularly demanding part of the art of engineering Before science based structural design and analysis were applied in the construction industries i e before 1800 the task of conceiving documenting and fabricating such shapes constituted the most significant interface between practitioner s knowledge and learned knowledge above all in geometry The history of shape development in these two disciplines therefore promises especially valuable insights into the knowledge history of shape creation This volume is a collection of contributions by outstanding scholars in their fields of study archaeology history of architecture and ship design in classic antiquity the Middle Ages and the early modern period The volume presents a comparative knowledge history in these two distinct branches of construction engineering

Marine Rudders, Hydrofoils and Control Surfaces Anthony F. Molland, Stephen R. Turnock, 2021-11-30 The course keeping and manoeuvring requirements for a ship are governed by international maritime law In assessing and predicting the course keeping and manoeuvring capabilities of the ship knowledge is required of the rudder forces necessary to keep a course or facilitate a manoeuvre The second edition of Marine Rudders Hydrofoils and Control Surfaces includes up to date data and rudder design techniques that enable the rudder forces to be estimated together with any interactions due to the hull and propeller The new edition describes the design and application of hydrofoils including shape adaptive design and their applications including hydrofoil craft yachts and kite surfing hydrofoils The professional will also face the need to design control surfaces for motion control such as roll and pitch for surface vessels and submersibles and the book contains the necessary techniques and data to carry out these tasks This book is for practicing naval architects and marine engineers small craft designers yacht designers hydrodynamicists undergraduate and postgraduate students of naval architecture maritime engineering and ship science and the broader engineering community involved in the development of marine craft that rely on the generation of lift such as control engineers and aerodynamicists Describes techniques for analyzing the performance characteristics of rudders hydrofoils and control surfaces Includes extensive design data and worked examples for the analysis of rudder hydrofoil and control surface performance Provides a detailed examination of the design of hydrofoils

Kondratieff Waves: Dimensions and Prospects at the Dawn of the 21st Century Leonid Grinin, Tessaleno Devezas, Andrey Korotayev, 2012-05-30 Kondratieff waves constitute a sort of mystery that has been haunting economic and social researchers for almost a century Why do we observe such regularity in the long term behavior of economic and non economic indicators Why in certain periods do we observe prolonged upswings whereas in other periods notwithstanding all the enormous efforts of interested macroeconomic actors economic development is accompanied by prolonged depressions What gets out of order in social and economic mechanisms Since the seminal works published by Kondratieff a number of outstanding researchers have made significant contributions to our understanding of the possible factors affecting and provoking long term fluctuations of human economic affairs On the other hand it has become more and

more clear that K waves influence many social related processes However nobody appears to have found yet an entirely satisfactory solution of Kondratieff s mystery and it continues to attract researchers That is why we have decided to try to unite the forces of such researchers around the new almanac This first issue offers a wide panorama of views on the Kondratieff waves phenomenon here one can also find information on Kondratieff s life and works This edition will be useful for economists social scientists as well as for a wide circle of those interested in the problems of the past present and future of world economics and globalization

Augustine of Canterbury Robin Mackintosh,2014-07-30 Augustine s mission to Britain in 597 was a pivotal event in English Christianity Yet little is known about Augustine himself and even less about his leadership Robin Mackintosh evaluates varied sources to produce a coherent narrative of Augustine s mission his journey through Merovingian France and the outcomes for British Christianity

Slavery, Geography and Empire in Nineteenth-Century Marine Landscapes of Montreal and Jamaica CharmaineA. Nelson,2017-07-05 Slavery Geography and Empire in Nineteenth Century Marine Landscapes of Montreal and Jamaica is among the first Slavery Studies books and the first in Art History to juxtapose temperate and tropical slavery Charmaine A Nelson explores the central role of geography and its racialized representation as landscape art in imperial conquest One could easily assume that nineteenth century Montreal and Jamaica were worlds apart but through her astute examination of marine landscape art the author re connects these two significant British island colonies sites of colonial ports with profound economic and military value Through an analysis of prints illustrated travel books and maps the author exposes the fallacy of their disconnection arguing instead that the separation of these colonies was a retroactive fabrication designed in part to rid Canada of its deeply colonial history as an integral part of Britain s global trading network which enriched the motherland through extensive trade in crops produced by enslaved workers on tropical plantations The first study to explore James Hakewill s Jamaican landscapes and William Clark s Antigua genre studies in depth it also examines the Montreal landscapes of artists including Thomas Davies Robert Sproule George Heriot and James Duncan Breaking new ground Nelson reveals how gender and race mediated the aesthetic and scientific access of such mainly white male artists She analyzes this moment of deep political crisis for British slave owners between the end of the slave trade in 1807 and complete abolition in 1833 who employed visual culture to imagine spaces free of conflict and to alleviate their pervasive anxiety about slave resistance Nelson explores how vision and cartographic knowledge translated into authority which allowed colonizers to civilize the terrains of the so called New World while belying the oppression of slavery and indigenous displacement

Living History Ana Lucia Araujo,2009-05-05 This book focusses on the several forms of reconstructing the slave past in the present The recent emergence of the memory of slavery allows those who are or who claim to be descendents of slaves to legitimize their demand for recognition and for reparations for past wrongs Some reparation claims encompass financial compensation but very often they express the need for memorialization through public commemoration museums and monuments In some contexts presentification of the slave

past has helped governments and the descendants of former masters and slave merchants to formulate public apologies For some expressing repentance is not only a means to erase guilt but also a way to gain political prestige The authors analyse different aspects of the recent phenomenon of memorializing slavery especially the practices employed to stage the slave past in both public and private spaces The essays present memory and oblivion as part of the same process they discuss reconstructions of the past in the present at different public and private levels through historiography photography exhibitions monuments memorials collective and individual discourses cyberspace religion and performance By offering a comparative perspective on the United States and West Africa as well as on Western Europe South America and the Caribbean the chapters offer new possibilities to explore the resurgence of the memory of slavery as a transnational movement in our contemporary world

Bligh Rob Mundle,2013-01-19 Beyond the Bounty A biography of the Royal Navy officer from a master of the maritime narrative The Sydney Morning Herald The eighteenth century was an era when brave mariners took their ships beyond the horizon in search of an unknown world Those chosen to lead these expeditions were exceptional navigators men who had shown brilliance as they ascended the ranks in the Royal Navy They were also bloody good sailors From ship s boy to vice admiral discover how much more there was to Captain Bligh than his infamous bad temper Meet a twenty four year old Master Bligh as he witnesses the demise of his captain and mentor Cook a thirty four year old Lieutenant Bligh at the helm of the famous Bounty then cast adrift by Fletcher Christian on an epic forty seven day open boat voyage from Tonga to Timor and a thirty six year old Captain Bligh as he takes HMS Providence in the company of a young Matthew Flinders on a grand voyage to Tahiti and back This book goes beyond the character we ve seen in movies into the real life of a complex and remarkable seaman

1453 a Tale of Two Battles Julian Reynolds,2021-10-13 This book is the author s second published by Xlibris the first being Defending Rome The Masters of the Soldiers published in 2011 It explores the consequences of two battles fought in 1453 the fall of Constantinople to the Ottoman Turks in May and the French victory over the English two months later at Castillon in the last battle of the Hundred Years War The book considers the impact of these events on a diverse range of topics including military outcomes strategic consequences economic developments and cultural and religious implications It concludes by assessing the significance of these two battles in influencing the transition of Europe from the medieval to the modern age

The Routledge Handbook of the Crimean War Candan Badem,2021-09-15 The Routledge Handbook of the Crimean War is an edited collection of articles on the various aspects of the Crimean War written by distinguished historians from various countries Part I focuses on diplomatic military and regional perspectives Part II includes contributions on social cultural and international issues around the war All contributions are based upon findings of the latest research While not pretending to be an exhaustive encyclopaedia of this first modern war the present volume captures the most important topics and the least researched areas in the historiography of the war The book incorporates new approaches in national historiographies to the war and is intended to be the most up to

date reference book on the subject Chapters are devoted to each of the belligerent powers and to other peripheral states that were involved in one way or another in the war The volume also gives more attention to the Ottoman Empire which is generally neglected in European books on the war Both the general public and students of history will find the book useful balanced and up to date

Ship Management Pengfei Zhang,Lijun Tang,2021-09-19 Ship Management Theory and Practice unpacks the complexity of this crucial maritime activity by spelling out its key elements and the connections and linkages between them Opening with an introduction and an overview of the special characteristics of ship management the text then focuses on different strands of management It offers dedicated chapters on strategic management commercial management operations management technical management human resource management and compliance management weaving in numerous international examples throughout The final chapter looks to the future exploring the challenges facing ship management and the impact of digitalisation Ship Management Theory and Practice is a valuable resource for upper level students of shipping management and maritime operations and can also serve as a one stop reference for researchers and industry practitioners

From the Lighthouse: Interdisciplinary Reflections on Light Veronica Strang,Tim Edensor,Joanna Puckering,2018-04-27 What is a lighthouse What does it mean What does it do This book shows how exchanging knowledge across disciplinary boundaries can transform our thinking Adopting an unconventional structure this book involves the reader in a multivocal conversation between scholars poets and artists Seen through their individual perspectives lighthouses appear as signals of safety beacons of enlightenment phallic territorial markers and memorials of historical relationships with the sea However the interdisciplinary conversation also reveals underlying and sometimes unexpected connections It elucidates the human and non human evolutionary adaptations that use light for signalling and warning the visual languages created by regularity and synchronicity in pulses of light how lighthouses have generated a whole family of related material objects and technologies and the way that light flows between social and material worlds
