The Internet Revolution Emanuele Giovannetti, Mitsuhiko Kagami, Masatsugu Tsuji, 2003-05-15 Information technology has become a constant presence in contemporary life infiltrating community business and state affairs This book discusses the uses and problems of IT in both developing and advanced countries focusing on the ways in which IT changes society without neglecting the problematic aspects of the Internet

revolution such as computer crime and the lack of professionals with computer literacy particularly from a developing country's perspective. It examines such issues as the characteristics of network economies, connectivity, pricing, Internet access, regulation, changes in supply chains, IT gaps between supply and demand, productivity increases, and the digital divide. Emanuele Giovannetti, Mitsuhiro Kagami, and Masatsugu Tsuji have gathered together a group of international experts in economics and trade who discuss the impact of this revolution globally, looking at countries or regions including the UK, EU, Central and Eastern Europe, USA, Japan, India, South Africa, Singapore, Malaysia, Thailand, and China. **Economics of**

Maritime Business Shuo Ma, 2020-06-02. This book provides a comprehensive introduction to the economics of the business of maritime transport. It provides an economic explanation of four aspects of maritime transport: namely, the demand, the supply, the market, and the strategy. The book first explains why seaborne trade happens and what its development trends are; it then analyses the main features of shipping supply and how various shipping markets function; the book finally addresses the critical strategic issues of the shipping business. The full range of different types of shipping are covered throughout the chapters and cases. The book combines the basic principles of maritime transport with the modern shipping business and the latest technological developments, particularly in the area of digital disruption. The ideas and explanations are supported and evidenced by practical examples and more than 160 tables and figures. The questions posed by the book are similar to those that would be asked by the students in their learning process or the professionals in the business environment, with the answers concentrating on the reasons for what has happened and will happen in the future rather than merely fact-telling or any specific forecast. The book is most suited for students of shipping-related disciplines and is also a valuable reference for maritime professionals. *An Assessment of Maritime Trade and Technology*, 1983. **Intercity Domestic**

Transportation System for Passengers and Freight, 1977. *Advanced Maritime Technologies and Applications* Azman Ismail, Wardiah Mohd Dahalan, Andreas Öchsner, 2022-01-10. This book presents the outcomes from the 2nd International Conference on Marine and Advanced Technologies 2021 (Icmat2021) which was organized by the Research and Innovation section, University Kuala Lumpur, Malaysian Institute of Marine Engineering Technology. The theme 'Propelling to the Innovative Idea' highlights the prominence of recent developments in marine and advanced technologies in the field of marine application, maritime operation, energy, and reliability, advanced materials, and applied science. This online conference provided a platform for presentations and discussions at the local and international level between educationists, researchers, students, and industrialists. Furthermore, it created opportunities to establish networks and meet experts in addition to the exchange of up-to-date knowledge in the field. This book is the up-to-date reference especially to those who want to learn and explore more about the latest developments and technologies of maritime industries. **Intercity Domestic**
