Shipping Practice:

Shipping Practice Edward Frank Stevens, 1962 **Economics of Shipping Practice and Management** A.E.

Branch, 2012-12-06 It is appropriate that the second edition of this established textbook sold in over 150 countries and regarded by many as the standard work on the subject should be published at a time of great change in the international shipping industry. This edition reflects such change. It also places considerable emphasis on the need for a professional approach in all areas of shipping practice and management in order to provide the high quality service required to sustain and expand international trade and will help to establish that professionalism. The book is ideal not only for students preparing for shipping examinations but also for persons employed in shipping companies ashore and afloat. In short, it is an aide memoire to those engaged in the industry throughout the world and is regarded by many as the shipping executive's handbook. Readers who wish to know more about the basic elements of the subject should also study the companion volume *Elements of Shipping* fifth edition. In addition, the sea port operator or executive should study my recently published book *Elements of Port Operation and Management*. The opportunity has been taken to widen the scope of the book. New chapters have been included on the economics of containerization, computerization, roll on roll off Ro Ro vessels and their features and counter trade. In addition, a number of existing chapters have been expanded in the areas of marketing, budgets, political factors, ship finance, BIFFEX, ICHCA, IMO, GCBS and shipping company mergers and acquisitions.

Economics of Shipping Practice and Management Alan E. Branch, 2013-11-11 BY Sir Frederic Bolton M C Chairman of F Bolton Group Ltd Director of Sealink Ltd and a past President of the General Council of British Shipping. The shipping industry has always lacked a body which can confer professional status on would be practitioners in that sense unlike those closely allied to his responsibilities the marine engineer the shipowner or manager is obliged to remain an unqualified amateur. The latest addition to Mr Branch's list of titles goes a long way towards correcting this position. A proper study of the material in his book would clearly go far to confer the status of complete ship operator upon anyone who was examined on its contents. Knowledge as comprehensive as that acquired through Mr Branch's book must provide a sound base on which to build the experience of practice.
