**Ships and Shipping in the North Sea and Atlantic, 1400-1800** Richard W. Unger, 2019-05-23 First published in 1997 this collection of articles two of which hitherto only appeared in Dutch examines the technical changes in shipbuilding as well as new practices in shipping and fishing from the late Middle Ages to the Industrial Revolution It seeks to show how these changes transformed the European economy and affected the relationship between the economy and governments and to portray the process although most dramatic in the Dutch Republic as part of a general European phenomenon The studies also investigate the causes of these developments and suggest how improvements in shipping may have affected patterns of trade and behaviour of public authorities English/British Naval History to 1815 Eugene L. Rasor, 2004-10-30 The English British have always been known as the sailor race with hearts of oak the Royal Navy as the Senior Service and First Line of Defense It facilitated the motto The sun never set on the British Empire The Royal Navy has exerted a powerful influence on Great Britain its Empire Europe and ultimately the world This superior annotated bibliography supplies entries that explore the influence of the English British Navy through its history This survey will provide a major reference guide for students and scholars at all levels It incorporates evaluative qualitative and critical analysis processes the essence of historical scholarship Each one of the 4 124 annotated entries is evaluated assessed analyzed integrated and incorporated into the

historiographical scholarship **Britain, Canada and the North Pacific: Maritime Enterprise and Dominion, 1778-1914** Barry M. Gough, 2023-05-31 From the time of Cook the British and their Canadian successors were drawn to the Northwest coast of North America by possibilities of trade in sea otter and the wish to find a northwest passage The studies collected here trace how under the influences of the Royal Navy and British statecraft the British came to dominate the area with expeditions sent from London Bombay and Macau and the Canadian quest from overland The North West Company came to control the trade of the Columbia River despite American opposition and British sloop diplomacy helped overcome Russian and Spanish resistance to British aspirations Elsewhere in the Americas the British promoted trans Pacific trade with China harvested British Columbia forests conveyed specie from western Mexico and established the South America naval station The flag followed trade and vice versa empire was both formal at Vancouver Island and informal as in California or Mexico This book features individuals such as James Cook William Bolts Peter Pond and Sir Alexander Mackenzie It is also an account of the pressure that corporations placed on the British state in shaping the emerging world of trade and colonization in that distant ocean and its shores and of the importance of sea power in the creation of modern Canada **Geography, Cartography and Nautical Science in the Renaissance** W.G.L. Randles, 2022-01-26 The transformation of the medieval European image of the world in the period following the Great Discoveries of the 15th and 16th centuries is the subject of this volume The first studies deal specifically with the emergence of the concept of the terraqueous globe In the following pieces Dr Randles looks at the advances in Portuguese navigation and cartography that helped sailors overcome the

obstacles to the circumnavigation of Africa and the crossing of the Atlantic and at the impact of the Discoveries on European culture and science Other articles are concerned with Portuguese naval artillery and with attempts to classify the indigenous societies of the newly discovered lands and to map the interior of Africa      *The Dutch in the Atlantic Economy, 1580-1880* Pieter Emmer, 2024-10-28 This volume provides the first survey in English of the Dutch involvement in the Atlantic slave trade and slave system It covers the period from the origins of the trade and the Dutch conquest of part of Brazil in the early 17th century to the abolition of slavery in the Dutch West Indies in the later 19th century Individual chapters focus on the investment bubble in the Dutch plantation colonies Dutch participation in the illegal slave trade and the effects of ameliorisation policies and then emancipation on the slaves of Suriname Professor Emmer also highlights the particular characteristics of the Dutch West India Company markedly different from the better known East India Company and the low key nature of the debate on slave emancipation in The Netherlands      Essays in Naval History, from Medieval to Modern N.A.M. Rodger, 2023-05-31 The articles collected here two appearing for the first time in English cover a number of topics central to naval history and illustrate the author's contention that this is not only or even chiefly a distinct area of special study but rather a central theme running through the history of England and of the whole British Isles Though the subjects and the styles vary a good deal the studies are linked by a common approach and some common ideas Hence many examine ways in which naval history has formed a key element in such subjects as intellectual religious administrative or medical history and explored the nature and meaning of sea power as a theme At the same time naval history is a technical subject which demands a willingness to understand warships the most complex artefacts and the structure of large and complex organisations Detailed evidence about ships and weapons can build large conclusions for example about late Anglo Saxon government and military organisation or about the nature of warfare at sea in the Renaissance era While mostly written from the British point of view several essays explicitly survey naval developments over a range of countries and even the most narrowly focused are at least implicitly aware of the wider world of war at sea      The Seaforth Bibliography Eugene Rasor, 2009-04-17 This remarkable work is a comprehensive historiographical and bibliographical survey of the most important scholarly and printed materials about the naval and maritime history of England and Great Britain from the earliest times to 1815 More than 4 000 popular standard and official histories important articles in journals and periodicals anthologies conference symposium and seminar papers guides documents and doctoral theses are covered so that the emphasis is the broadest possible But the work is far far more than a listing The works are all evaluated assessed and analysed and then integrated into an historical narrative that makes the book a hugely useful reference work for student scholar and enthusiast alike It is divided into twenty one chapters which cover resource centres significant naval writers pre eminent and general histories the chronological periods from Julius Caesar through the Vikings Tudors and Stuarts to Nelson and Bligh major naval personalities warships piracy strategy and tactics exploration discovery and navigation archaeology

and even naval fiction Quite simply no one with an interest and enthusiasm for naval history can afford to be without this book at their side Buccaneers, Explorers and Settlers Glyndwr Williams, 2023-07-21 *Buccaneers Explorers and Settlers* studies how during the long 18th century British incursions into the Pacific transformed Europe's knowledge of that great ocean Buccaneers devastated Spanish settlements and shipping in the South Sea and the accounts by Dampier and his companions of their exploits became best sellers Anson's circumnavigation carried on the tradition of commerce raiding but it represented the beginnings of a more official interest in the Pacific and its resources Later in the 18th century the hopes of speculative geographers that unknown continents and sea passages existed in the Pacific prompted a series of expeditions by Cook and his contemporaries New peoples were discovered as well as new lands and the voyages led to changing perceptions of their lifestyles Exploration was followed by trade and settlement in which Cook's associates such as Banks played a leading part Before the end of the century there were British settlements in New South Wales Nootka Sound had become a centre of international dispute and across the Pacific traders whalers and missionaries were following the tracks of the explorers **Beyond the Catch** Louis Sicking, Darlene Abreu-Ferreira, 2009 Drawing on archaeological and written sources this collection of essays presents fascinating new interpretations in the history of the fisheries by highlighting the consequences of the northern fisheries through interdisciplinary approaches to various themes including the environment economy politics and society in the medieval and early modern periods *Urban Elite Culture* Luisa Radohs, 2023-10-09 Medieval towns were vibrant and complex social environments where diverse groups and lifestyles encountered and influenced each other Surprisingly in the study of urban archaeology the aristocracy one of the leading and most influential groups in medieval society has so far been neglected This book puts aristocracy in towns on the archaeological research agenda The interdisciplinary and comparative study explores the significance and representation of aristocrats and their interaction with civic elites in sea trading towns of the southwestern Baltic from the 12th to the 14th centuries Essentially however the analysis of urban elite culture leads to discussion of a much more fundamental issue the informative value of material culture for the investigation of social conditions The book provides new archaeological approaches to the study of social differentiation in towns and contributes to a deeper understanding of the complexity of urban social structures

Artisans, Entrepreneurs, and Machines David J. Jeremy, 1998 This is a collection of ten essays about the transfer of early industrial textile technology from Britain to the USA The whole is prefixed by an introduction arguing that the model of technology transfer found in the early industrial period has a wider and present day applicability *Migrants, Servants and Slaves* Russell R. Menard, 2001 Written by one of the leading economic historians of British America the essays in *Migrants servants and slaves* several of which have achieved the status of minor classics address a series of topics of central importance to the field The central theme is that of the transition from a labor force dominated by English indentured servants to one composed largely of African slaves In the enquiry the author examines the changing composition of the

servant population in the British North American colonies the determinants of the pace and volume of servant migration and the opportunities available to servants who completed their terms On the subject of slavery he looks at how the initial investments were financed and the ability of the slave population to reproduce itself     *The Mariner's Mirror* Leonard George Carr Laughton, Roger Charles Anderson, William Gordon Perrin, 2006     ***Ships and Shipping in the North Sea and Atlantic, 1400-1800*** Richard W. Unger, 2020-04-02 First published in 1997 this collection of articles two of which hitherto only appeared in Dutch examines the technical changes in shipbuilding as well as new practices in shipping and fishing from the late Middle Ages to the Industrial Revolution It seeks to show how these changes transformed the European economy and affected the relationship between the economy and governments and to portray the process although most dramatic in the Dutch Republic as part of a general European phenomenon The studies also investigate the causes of these developments and suggest how improvements in shipping may have affected patterns of trade and behaviour of public authorities     ***The Mariner's Mirror Bibliography for ...*** ,1998     ***Bibliographie D'histoire de L'art*** ,1991     *The English Revolution* Perez Zagorin, 1998 These essays concentrate on the social history and political thought of the English Revolution of 1640-1660 fields in which the author has been a leading contributor to historical discussion Topics covered include the origin and course of the revolt against the government of Charles I the social character of the revolution and important political figures such as Strafford Pym and Clarendon One set of studies focuses on the thought of Thomas Hobbes whose political philosophy was closely related to the revolutionary experience Other essays set the English Revolution in the wider context of early modern European revolutions and look at the English royal court courtiership and the practice of dissimulation associated with court politics     ***Fiere e mercati nella integrazione delle economie europee, secc.
