Shockwave Riders:

The Shockwave Rider John Brunner, 2014-04-01 In a world drowning in data a fugitive tries to outrun the forces that want to reprogram him in this smart edgy novel by a Hugo Award winning author Constantly shifting his identity among a population choking on information innovation and novelty Nickie Haflinger is a most dangerous outlaw yet he doesn't even appear to exist As global society falls apart in all directions with corporate power run amok and personal freedom surrendered to computers and bureaucrats Haflinger is caught and about to be reprogrammed Now he has to try to escape once again defy the government and turn the tide of organizational destruction in this visionary science fiction novel by the author of *The Sheep Look Up* and *Stand on Zanzibar* Brunner writes about the future as if he and the reader were already living in it The New York Times Book Review When John Brunner first told me of his intention to write the book I was fascinated but I wondered whether he or anyone could bring it off Bring it off he has with cool brilliance A hero with transient personalities animals with souls think tanks and survival communities fuse to form a future so plausibly alive it as twitched at me ever since Alvin Toffler author of *Future Shock* One of the most important science fiction authors Brunner held a mirror up to reflect our foibles because he wanted to save us from ourselves SF Site

The Shockwave Riders John Brunner, 1995-03-01 He was the most dangerous fugitive alive but he didn't exist Nickie Haflinger had lived a score of lifetimes but technically he didn't exist He was a fugitive from Tarnover the high powered government think tank that had educated him First he had broken his identity code then he escaped Now he had to find a way to restore sanity and personal freedom to the computerized masses and to save a world tottering on the brink of disaster He didn't care how he did it but the government did That's when his Tarnover teachers got him back in their labs and Nickie Haflinger was set up for a whole new education

Manshape John Brunner, 2011-09-29 The interstellar Bridge System was the greatest invention in the long history of

cosmic humanity Spread through dozens of planets men and their societies had drifted apart in isolation until the Bridge came to link together humanity's multifold worlds and had affirmed once more that all men were brothers and sisters under the skin But the far away world of Azreal was the exception the one dissident world that refused the Bridge It became the task of two agents a man and a woman to bring Azreal back into manshape unity to ferret out the hidden reasons for the stubborn refusal The problem with its perils and high risks was to involve more than just secrets for Manshape is John Brunner novel that deals with the very fabric of civilization **Timescoop** John Brunner,2011-09-29 A Pandora's box of evil Freitas had commanded the engineers of his vast world wide empire to build him a device that could ransack the past Now all the riches of the ages were his for the taking But mere wealth was not what Freitas was after Supreme power was what he sought and from the past he picked the men and women who could help him gain absolute mastery over his rivals But one thing he had not reckoned on the power these creatures from the past would have over him the reign of terror about to begin

The Stardroppers John Brunner, 2011-09-29 A stardropper got its name from the belief that the user was eavesdropping on the stars But that was only a guess nobody really knew what the instrument did The instrument itself made no sense scientifically A conventional earpiece an amplifier a power source all attached to a small vacuum box an alnico magnet and a calibrated tuner What you got from all this was some very extraordinary noises and the conviction that you were listening to beings from space and could almost understand what you were hearing What brought Special Agent Dan Cross into the stardropper problem was the carefully censored news that users of the instrument had begun to disappear They popped out of existence suddenly and the world s leaders began to suspect that somehow the fad had lit the fuse on a bomb that would either destroy the world or change it forever First published 1972

The Brink John Brunner, 2015-04-30 Ed Carter a New York reporter on his way to his home town in Omaha for a short vacation saw the missile in the last moments in its journey back to earth A sweller on the brink like all of us he had no doubt about what it was Oh God he thought this is it The blast of the impact flung him some distance and when he regained consciousness his first reaction was one of surprised to find himself still alive and not it seemed even badly hurt Presumably the missile had been directed at the big Air Force base nearby and should have destroyed everything and everyone within a radius of miles Could it have failed to explode Carter sees the remains of part of the missile in an adjacent field and hobbles over to it A minute or two later several Air Force officers arrive They examine the remains and find the burned up body of a pilot In other worlds the missile was not Russia s first shot in the Third World War

but a failure to launch a man into space But Carter knows that the Distant Early Warning line will have reported the missile that the senior Air Force officers in accordance with plan will have taken to the air in the country's interest their lives must of course be preserved if possible that by now the retaliatory American bombers will have passed the point of no recall and that the Third World War has begun Not so Colonel Ben Goldwater tells him I called the bombers back Goldwater the man who had been left in command has saved the world for at least a little longer So he becomes a world hero Not a bit of it On the contrary a nightmare looms ahead both for him and for Ed Carter and the reader watches it all with growing fury

controlled by a neutral people and until the greater powers could seize this strategic wonder planet and ferret out its secrets they were doomed to fretful inactivity But as a Cathrodyne vessel drew near to Waystation the all important balance of power stood in sudden peril The ship in itself was routine But on board was a stranger a man of undiscovered race who spoke too little and it appeared knew too much **The Infinitive of Go** John Brunner,2012-07-16 CODE NAME POSTER The first practical matter transmitter was a success or so everyone thought In spite of paranoid security restrictions Justin Williams and Cinnamon Wright co inventors of the device counted on it to revolutionise civilisation and gain them an honoured place in history But the first long distance field test with a human being a diplomatic courier carrying a vital message somehow misfired when the courier killed himself on arrival at his destination To prove his faith in his invention and to escape charges of sabotage Justin had himself posted thousands of miles He came through unchanged It was the world that was somehow different The Tides of Time John Brunner,2012-12-21 First there was the end After weeks of running from pursuers Gene and Stacy finally found refuge on an isolated island But around them the island changed and so did they Each time they awoke from sleep they lived a different life in a different time And the farther back they went the more they lost their anchor to their own world When at last they were found the people they had become no longer recognised their pursuers And that was the beginning **Give Warning to the World** John Brunner,2013-06-24 Are there aliens among us Are the chariots of the gods returning If so are they for us or against us John Brunner award winning author and science fiction writer extraordinary takes the questions now on everyone s mind and gives one possible answer in this startling novel Here is an edge of the seat story of the man who discovers that the vanguard of the aliens are indeed amongst us and that the human species has but a few hours left before our time runs out It s a science fiction thriller you won t be able to put down
